

Pulses Domestic Fundamentals:

- Rabi pulses sowing area is running ahead by 5.29 % to 169.10 lakh ha as on 9th Feb-2018. Chana area was registered at 107.63 against 99.54 lakh ha. Masur area was registered at 17.36 against 17.30 lakh ha, peas area was recorded at 11.92 against 11.97 lakh ha. Even Urad and Moong area was recorded at 9.44 against 9.94 & 8.31 against 7.34 lakh ha. Other pulses area was recorded at 6.28 against 6.53 lakh ha. Sowing is almost over except Urad & Moong so far.
- Chana cash market traded slightly up due to bad weather condition in parts of Rajasthan and MP. Hailstorm reported in some parts of Maharashtra, that has affected crop to some extent. Weather still remains bad. More hailstorms in Maharashtra may encourage chana price from current level. Delhi market traded Rs 50 up to Rs 4150 per qtl. Overall trend still remains weak. Govt. has increased import duty from 30 to 40 % to bring import at complete halt this year sensing record crop size.
- Tur market traded almost steady in Gulberga despite ongoing procurement drive in producing states. It traded in the range of Rs 4000-4550 per qtl. Steady to slightly firm trend is expected in coming weeks as demand for dal is expected to improve with decreasing availability of green vegetables.
- Steady tone prevailed in Moong market with decreasing arrivals in mandis.It traded at Rs 4900 in Jaipur market. New crop is 3-4 months away from now, so steady tone may prevail .It is likely to trade in the range of Rs 4800-5100 per qtl in Jaipur market.
 - **Urad traded slightly down despite ongoing procurement drive. It is** being traded at Rs 4300 to Rs 4500 per qtl in Chennai market. Steady to slightly weak tone may prevail on selling at higher price by private trades.
- Govt has procured around 5.6 lakh tonne Urad and Moong on MSP during kharif season 2017-18 so far under price support scheme, according to official data. It is worth of Rs 3077 crore. By the end of January-2018 Agri cooperative and state agencies have collectively procured5,60,335 tonne Urad & Moong. It has been procured in 8 states like Telangana, Andhra Pradesh, Karnataka, Rajasthan, Maharashtra, Gujarat and Uttar Pradesh. Rajasthan has contributed around 3,93,059 tonne Urad & Moong, while Maharashtra and Karnataka purchased around 64 & 35 thousand tonne sofar. State agencies procured only Urad in states like Gujarat & UP. both contributed 19550 tonne & 17434 tonne Urad so far.
- Govt. has increased import duty on Chana from 30 to 40% now to support chana cash market just ahead of new crop in Maharashtra and Rajasthan. New crop in Chana already started in Karnataka, Maharashtra & Gujarat. Pressure on chana is likely to continue despite revised duty. In Delhi market Chana is ruling at Rs 4100-4150 per qtl.
- New arrival of kharif Moong crop is 4-5 months away now while rabi crop is smaller and is consumed locally. Besides, restricted import quantity at 1.5 lakh tonne till March-2018 and likely further extension amid increasing intension of retention may support market at current level. Moong at Jaipur market traded at Rs 4900-4950 per qtl.
- Masur crop is in good condition in all major producing states like MP,UP & Bihar.early sown crop in MP started hitting into mandis and almost 25 % harvest is said to be completed so far.As MP and UP contribute 65 to 75 % in total production,new crop from MP would pressurise prices in coming weeks.MP has covered 5.96 lakh ha this year and yield is better than last year,so production size is bound to increase in MP this year.Up has covered 5.97 lakh ha,lower by around 10 % this year. Lower are a coverage in UP is likely to be compensated by higher yield in MP.Even higher likely yield in UP would help to cover area loss in UP.In Bihar 2.16 lakh ha has been covered this year. Crop is in good condition. So Agriwatch expects production to increase from 11.78 to 13.50 lakh tonne this year.
- As 30 % import duty is on place, import flow has come down. However, after March new import deal is
 expected to start at higher rate due to import duty. Consumption is around 20 lakh tonne. With carryout of
 4.84 total availability is expected to be around 18 lakh tonne. If govt.'s start procureing on MSP and export
 starts, lentil price would start moving up in second half of the year. So, buying on dip is good.
- Tur procurement in Maharashtra commences and it may check decreasing prices of Tur in mandis of Maharashtra. It may trade steady in Gulberga and other producing region. Central govt has green signaled to buy 4.46 lakh tonne Tur in the state. Around 1.2 lakh farmers have got registered so far. As crop size is lower, steady to firm tone might be seen once again.

Pulses International Fundamental:

- Undertone in global chickpeas market remains subdued due to higher supply in exporting countries and lower demand from India. Global Chickpeas production is bound to increase from 115 to 125 lakh tonne due to higher area coverage in India. Global Chickpeas production of Kabuli Chana) too would increase from 20 to 28 lakh tonne this year. Besides global trade would decline as major buyers like India is out of the market right now.
- Even lentil price has come down from \$500 to \$475-80 per tonne. Major buyers like India is not going to enter into market for any bulk purchasing. So, other countries buying interest would not fulfill the gap. So price is likely to stabilize at current level.
- Canada Lentil ending stock in 2016-17 was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only36%.
- Chickpea production is estimated at 97100 tonne in 2017-18 in Canada. All peas production was estimated at 41.12 lakh tonne. Export has been estimated at 25.20 lakh tonne in 2017-18.
- Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18. It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- Green Lentils market remains unaffected from USDA 's final production estimate for 2017 and stock available on 1st December-2017. Available stock on 1st Dec was reported at around 1.9 lakh tonne, lower from 2.38 lakh tonne from Dec last year-2016. Production was estiamted at 3.39 lakh tonne in 2017 against 5.75 lakh tonne in 2016. However, market participants are not comfortable with this estimate.
- Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne in 2017 despite lower area coverage of 6.23 lakh acres.US farmers had covered 3.31 lakh acres in 2016. However, Chickpeas stock on 1st Dec-2017 was recorded at 72000 tonne, lower from 65000 tonne from Dec-2016. Small Chickpeas stock was recorded at 45750 tonne against 32600 tonne last year .Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.
- Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakhtonne in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- Imposition of import duty on all peas by50 % has started impacting export volume from Canada According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT(2016-17 to 2.4 MMT in 2017-18.Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price sare hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- AAFC (Canada) has revised down peas production estimated from 42.50 to 41.12 lakh tonne for 2017-18. In last one month production estimate has been revised down by 1.70 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- Peas import from Ukraine to India is bound to increase over 50 % to6.5 lakh tonne in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade range bound in the near term.

Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 (Area in Lakh Ha)
