

Pulses Domestic Fundamentals:

- **Chana traded down by Rs 50 to Rs4200 in Delhi market on reduced demand at higher level.** Any major decrease is unlikely. Tur traded almost steady with firm bias is expected to continue. Urad and Moong may trade steady despite higher stock. Masur may trade lower as new crop in Bihar begins. Govt is very keen to ensure MSP for farmers and it can offer more export incentives on export. Overall ,it seems market may stabilize near current level. Improvement might be seen after Holi . With increasing temperature dal demand is expected to improve further.
- **Tur too traded up on improved dal demand before festive season. Generally,** consumption of Tur dal demand increases with increasing temperature. Besides, higher procurement plan by state agencies would remain supportive to cash market fundamentals. Crop size id already lower and private buying continues. In Gulberga market Tur traded at Rs 4250 to 4550 per qtl. Steady to firm tone may prevail.
- **Moong market traded firm by Rs 100 to Rs 4900 in Jaipur market taking clue from firm pulses market and improved demand for dal.** Steady tone may prevail in Moong market. Bulk buyers still remain restrictive due to higher supply and stock available in domestic market.
- **Urad market may trade steady to slightly firm due to higher demand for dal and slower release by taders.** As stock is ample, major increase from current level is unlikely. There is no scope for dal export as major exporting country like Myanmar is offer Urad at very competitive price.
- **Maharashtra govt. would buy maximum quantity of Tur produced on estimated land for the crop in Maharashtra.** Previously, state govt. had decided to buy 50% of production. Besides, 4.63 lakh tonne procurement quota has been decided for the state. Karnataka has fixed 1 lakh tonne procurement target. It is likely to support cash market in the near to medium term. Procurement in AP & Telangana would also support Tur market.
- **Moong market is expected to trade steady to slightly weak due to higher rabi crop size in Odisha.** Tamil Nadu and AP are other major producers in rabi season. Area coverage in Odisha has increased from 5.17 to 5.86 lakh ha this year. At national level area under rabi Moong increased from 7.34 to 8.31 lakh ha this year. Out of total Orisha contributed 5.86 lakh ha. This show higher Moong production in Rabi season. Production is expected to increase from 5.50 lakh tonne to around 7 lakh tonne.It would ease supply in coming weeks.
- **New masur crop in Bihar is likely to hit market from 10th March. It is late by 10 days** in comparison to last year. Crop condition is good and old crop is being traded at Rs3550-3600 in Barh region of Bihar,the major producing belt after UP and MP. Price of lentil is expected to dip by 300 to 400 per qtl more from current level. Actually, demand is sluggish and major buyers like Bengal is absent from market at this time of the year. Imported lentil is fulfilling demand for Bengal. So price would continue to reel under pressure. Buyers should wait at least 15 days more. Production may cross 12 lakh tonne this year. As of now weather condition in producing belt is normal.
- **Rabi pulses sowing area is running ahead by 5.29 % to 169.10 lakh ha as on 9th Feb-2018.** Chana area was registered at 107.63 against 99.54 lakh ha. Masur area was registered at 17.36 against 17.30 lakh ha, peas area was recorded at 11.92 against 11.97 lakh ha. Even Urad and Moong area was recorded at 9.44 against 9.94 & 8.31 against 7.34 lakh ha. Other pulses area was recorded at 6.28 against 6.53 lakh ha. Sowing is almost over except Urad & Moong so far.
- **Govt has procured around 5.6 lakh tonne Urad and Moong on MSP** during kharif season 2017-18 so far under price support scheme, according to official data. It is worth of Rs 3077 crore. By the end of January-2018 Agri cooperative and state agencies have collectively procured 5,60,335 tonne Urad & Moong.It has been procured in 8 states like Telangana, Andhra Pradesh, Karnataka, Rajasthan, Maharashtra, Gujarat and Uttar Pradesh. Rajasthan has contributed around 3,93,059 tonne Urad & Moong, while Maharashtra and Karnataka purchased around 64 & 35 thousand tonne so far. State agencies procured only Urad in states like Gujarat & UP.both contributed 19550 tonne & 17434 tonne Urad so far.
- **As 30 % import duty is on place, import flow has come down. However,** after March new import deal is expected to start at higher rate due to import duty. Consumption is around 20 lakh tonne. With carryout of 4.84 total availability is expected to be around 18 lakh tonne. If govt.'s start procuring on MSP and export starts , lentil price would start moving up in second half of the year. So, buying on dip is good.

Pulses International Fundamental:

- **Lower demand from major importing countries lentil and peas area has declined** in Canada this year. Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around 44 lakh acres has been covered while pea area was reported at 41 lakh acres. Despite lower area coverage in 2017, it is second largest area coverage. So supply side is unlikely to be tight this year.
- **Undertone in global chickpeas market remains subdued due to higher supply in exporting countries** and lower demand from India. Global Chickpeas production is bound to increase from 115 to 125 lakh tonne due to higher area coverage in India. Global Chickpeas production of Kabuli Chana) too would increase from 20 to 28 lakh tonne this year. Besides global trade would decline as major buyers like India is out of the market right now.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne. it will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.
- **Chickpea production is estimated at 97100 tonne in 2017-18** in Canada. All peas production was estimated at 41.12 lakh tonne. Export has been estimated at 25.20 lakh tonne in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Green Lentils market remains unaffected from USDA 's final production estimate** for 2017 and stock available on 1st December-2017. Available stock on 1st Dec was reported at around 1.9 lakh tonne, lower from 2.38 lakh tonne from Dec last year-2016. Production was estimated at 3.39 lakh tonne in 2017 against 5.75 lakh tonne in 2016. However, market participants are not comfortable with this estimate.
- **Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne** in 2017 despite lower area coverage of 6.23 lakh acres. US farmers had covered 3.31 lakh acres in 2016. However, Chickpeas stock on 1st Dec-2017 was recorded at 72000 tonne, lower from 65000 tonne from Dec-2016. Small Chickpeas stock was recorded at 45750 tonne against 32600 tonne last year. Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Imposition of import duty on all peas by 50 % has started impacting export volume** from Canada. According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.12 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.70 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade range bound in the near term.

Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 (Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported
