Pulses Domestic Fundamentals:

- ***India has increased import duty for chickpeas from 40 to 60 %. It is applicable from*** *immediate effect. Earlier India had imposed 40 % duty on 07th Feb-2017.All these efforts have been made to promote domestic production and ensure MSP for farmers.It would affect export from Australia and Canada adversely. Last year Canada had exported 10,000 tonne Chickpeas to India.*
- ***The Cabinet Committee on Economic Affairs (CCEA) has doubled the credit limit*** *for Nafed to procure pulses and oilseeds. Currently market prices for many pulses are ruling below MSP. The provision of govt. guarantee would be helpful for protecting the farmers from distress sales in arrival season. The CCEA has approved an increase in bank guarantee from Rs 9,500 crore to Rs 19,000 crore bank to banks for Nafed. It is undertaking procurement operation of pulses and oilseeds under the Price Support Scheme (PSS) of the government. The bank guarantee till 2021-22.Besides,The CCEA has scraped 1% government guarantee fee and approved Rs45 crore for Small Farmers Agri-Business Consortium (SFAC) for meeting their existing liability.*
- ***Nafed had purchased 11.95 lakh tone of pulses under the Price Stabilization Fund*** *scheme for the buffer stock during 2016-17 (October-September).The government has allocated Rs 200 crore for both PSS(price support Scheme) and market intervention scheme (MIS) during FY2018-19..*
- ***Govt. has revised Tur production estimate slightly up from 3.99 MMT to 4.02 MMT*** *in second adv. estimate released on 27.02.2018 against set target of 4.25 MMT for 2017-18.Govt has released final production fig for last year at4.87 MMT.*
- ***Chana production estimate has been revised up from the target of 9.75 MMT to 11.1*** *MMT for 2017-18 in the 2nd adv estimate. For 2016-17 final chana production estimate has been pegged at 9.38 MMT.*
- ***Urad Kharif and Rabi production estimate has been pegged higher at 3.23 MMT against*** *production target of 2.6 MMT in the second adv estimate released on 27th Feb-2018.For 2016-17 final production Rabi and Kharif has been pegged at 2.84 MMT. Kharif Urad production has been pegged at 2.6 MMT against target of 1.85 MMT while Rabi production has been pegged at 0.63 MMT Against targt of 0.75 MMT.*
- ***Moong production for Kharif season has been pegged at 1.42 MMtT against the set target*** *of 1.65 MMT for 2017-18 in 2nd adv estimate. Final kharif moong production for Rabi has been pegged at 0.32 against target of 0.65 MMT. Total moong production has been pegged at 1.74 MMT against target of 2.3 MMT. Final moong production for last year has been pegged at 2.16 MMT.*
- ***Maharashtra govt. would buy maximum quantity of Tur produced on estimated*** *land for the crop in Maharashtra. Previously, state govt. had decided to buy 50% of production. Besides, 4.63 lakh tonne procurement quota has been decided for the state. Karnataka has fixed 1 lakh tonne procurement target. It is likely to support cash market in the near to medium term. Procurement in AP & Telangana would also support Tur market.*
- ***New masur crop in Bihar is likely to hit market from 10th March. It is late by 10 days*** *in comparison to last year. Crop condition is good and old crop is being traded at Rs3550-3600 in Barh region of Bihar,the major producing belt after UP and MP. Price of lentil is expected to dip by 300 to 400 per qtl more from current level. Actually, demand is sluggish and major buyers like Bengal is absent from market at this time of the year. Imported lentil is fulfilling demand for Bengal. So price would continue to reel under pressure. Buyers should wait at least 15 days more. Production may cross 12 lakh tonne this year. As of now weather condition in producing belt is normal.*
- ***Rabi pulses sowing area is running ahead by 5.29 % to 169.10 lakh ha as on 9th Feb-2018****. Chana area was registered at 107.63 against 99.54 lakh ha. Masur area was registered at 17.36 against 17.30 lakh ha, peas area was recorded at 11.92 against 11.97 lakh ha. Even Urad and Moong area was recorded at 9.44 against 9.94 & 8.31 against 7.34 lakh ha. Other pulses area was recorded at 6.28 against 6.53 lakh ha.Sowing is almost over except Urad & Moong so far.*

Pulses International Fundamental:

- ***India & Canada have agreed to solve fumigation issue by the end of this year.PM of*** *both the countries have announced that India and Canada will work closely together to finalize an arrangement within 2018 to enable the export of Canadian pulses to India free from pests of quarantine importance, with mutually acceptable technological protocols. However, no statement has been made over import duty ranging from 30 to 50 % applicable right now.*
- ***Pulse Australia has signed an agreement with Indian Pulse and Grain Association*** *(IPGA) for greater exchange of information on Indian pulse crops. IPGA says that better exchange of market information will benefit producers and the operation of the supply chain. Insight into pulse crop developments in India is especially important, given the global status of India in pulse markets-says Pulse Australia CEO, Nick Goddard.*
- ***Lower demand from major importing countries lentil and peas area has declined*** *in Canada this year. Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around44 lakh acres has been covered while pea area was reported at 41lakh acres. Despite lower area coverage in 2017,it is second largest area coverage. So supply side is unlikely to be tight this year.*
- ***Undertone in global chickpeas market remains subdued due to higher supply in exporting*** *countries and lower demand from India. Global Chickpeas production is bound to increase from115 to 125 lakh tonne due to higher area coverage in India. Global Chickpeas production of Kabuli Chana) too would increase from 20 to 28 lakh tonne this year. Besides global trade would decline as major buyers like India is out of the market right now.*
- ***Canada Lentil ending stock in 2016-****17 was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.*
- ***Chickpea production is estimated at 97100 tonne in 2017-****18 in Canada.All peas production was estimated at 41.12 lakh tonne.Export has been estimated at 25.20 lakh tonne in 2017-18.*
- ***Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017****-18. It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha.Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha.As production would decline, total supply would decline by 10.43 % to 30.35 lakh t.Average price in 2017-18 may rule in the range of C$720 to 750 per T.*
- ***Chickpeas production estimate for the US has been increased from 2.50 lakh*** *tonne (2016) to 3.15 lakh tonne in 2017 despite lower area coverage of 6.23 lakh acres.US farmers had covered 3.31 lakh acres in 2016.However,Chickpeas stock on 1st Dec-2017 was recorded at72000 tonne, lower from65000 tonne from Dec-2016.Small Chickpeas stock was recorded at 45750 tonne against32600 tonne last year .Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.*
- ***Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh****tonne in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.*
- ***Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne*** *in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.*
- ***AAFC (Canada) has revised down peas production estimated from 42.50 to 41.12*** *lakh tonne for 2017-18. In last one month production estimate has been revised down by 1.70 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.*
- ***Peas import from Ukraine to India is bound to increase over 50 % to6.5 lakh tonne*** *in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.*

Weekly Outlook: -*Pulses are likely to trade weak in the near term.*

Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 (Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported
