

Pulses Domestic Fundamentals:

- **To ensure better price of Chana for farmers and to prevent any possible manipulation** of prices through futures market, government has proposed to SEBI to suspend chana futures contracts. SEBI is yet to arrive at a conclusion in the matter but may be willing to concede to the government's request.
- **Pulses processing industry has demanded to stop import of pulses under set quota** (5 lakh tonne annually) as continuation of import April onward under quota system would further add surplus in the pulses market. Industry has requested the central government to immediately terminate the quota of 5 lakh tonne pulses import before the end of March. In August 2017, the government restricted import of tur, moong and urad. The free import of tur, moong and urad has been restricted by imposing quota of 2 lakh tonne import on tur and 3 lakh tonne on moong and urad taken together.
- **Lentil dal prices traded weak on the back of increasing arrival from new crop in Bihar and UP.** Buyers from Bengal remain active. Slight correction is expected as millers have restricted buying due to decreased demand from retailers. Fresh demand is expected from April and it may support market once again. Export volume for Nepal and B, desh has decreased at higher level. Imposition of 30% import duty would make lentil costly and would support cash market in the medium term.
- **Australian red lentils malka dal weekly average price traded slightly down by 0.12 %** to Rs 7320 per qtl during the week under review. Red Lentils Malka split dal weekly average price too traded down by 0.16 % to Rs 7450 per qtl. Market is likely to trade steady to slightly weak due to sluggish demand and new arrivals. Masur Canadian vessel is being offered at Rs 3300 to Rs 3350 per qtl. with 30% imposed duty. Canadian containers are being offered at Rs 3400-3500 per qtl. In Kolcatta broken red lentil is being offered at Rs 3700 and Chanti at Rs 4000 per qtl. Including duty. As new crop is coming now, import flow is expected to be at lower ebb as usual at this time of the year.
- **Tur lemon in Mumbai is being offered at Rs 3800-3850 per qtl. It traded almost unchanged** from previous close. Urad is being offered at Rs 3850. More dip is unlikely as demand is expected at current lower level. Australian chana is being offered at Rs 3650, at Mundra port it is being offered at Rs 3675 per qtl. There is no change in pea price. Canadian pea is being offered at Rs 2901 per qtl. Russian pea is being offered at Rs 2801-2811 per qtl. It is being offered at Rs 2841 at Hazira port & Rs 2741 at Mundra port. Green pea is being offered at Rs 3700-3800 per qtl. Masur is being offered at Rs 3300-3350 (Vessel) per qtl. in Mumbai.
- **Rajasthan govt would start Chana procurement from 14th March-2018 through Rajfed.** This year production of Chana is expected to be around 15.8 lakh tonne, higher by 1.8 lakh tonne from last year. Chana arrival in MP has declined as farmers are willing to sell it through Bhavantar Yojna. Besides, Maharashtra Govt would buy Chana.
- **Central govt. has decided to procure 3 lakh tonne Chana on MSP in Maharashtra** to support cash market price. The registration of farmers for the process has started from March 1 and 400 of them have been registered so far. The procurement — undertaken by the Small Farmers Agro Business Consortium (SFAC), National Agricultural Cooperative Marketing Federation of India Ltd (NAFED) and Food Corporation of India (FCI) — will collectively buy 3 L of Chana in the rabi season.
- **The Centre govt. would buy additional 1 lakh tonnes against the state demand of buying 2.35 lakh tonne of tur dal at MSP from Karnataka.** Centre has already procured 2.65 lakh tonnes of tur at the MSP under the price support scheme. Notably, state had requested to buy additional 2.35 lakh tonnes. The procurement is being undertaken by central agency Nafed and state agencies as prices have fallen below the MSP.
- **India has increased import duty for chickpeas from 40 to 60 %.** It is applicable from immediate effect. Earlier India had imposed 40 % duty on 07th Feb-2017.
- **Chana production estimate has been revised up from the target of 9.75 MMT to 11.1 MMT** for 2017-18 in the 2nd adv estimate. For 2016-17 final chana production estimate has been pegged at 9.38 MMT.
- **Urad Kharif and Rabi production estimate has been pegged higher at 3.23 MMT** against production target of 2.6 MMT in the second adv estimate released on 27th Feb-2018. For 2016-17 final production Rabi

and Kharif has been pegged at 2.84 MMT. Kharif Urad production has been pegged at 2.6 MMT against target of 1.85 MMT while Rabi production has been pegged at 0.63 MMT Against target of 0.75 MMT.

Pulses International Fundamental:

- **Global lentil market traded unchanged during the week under review. Weak demand from India and other importing nations has pressurized the Canadian lentil market too.** Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils was exported .It is downby 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **India & Canada have agreed to solve fumigation issue by the end of this year.**PM of both the countries have announced that India and Canada will work closely together to finalize an arrangement within 2018 to enable the export of Canadian pulses to India free from pests of quarantine importance, with mutually acceptable technological protocols. However, no statement has been made over import duty ranging from 30 to 50 % applicable right now.
- **Pulse Australia has signed an agreement with Indian Pulse and Grain Association (IPGA)** for greater exchange of information on Indian pulse crops. IPGA says that better exchange of market information will benefit producers and the operation of the supply chain. Insight into pulse crop developments in India is especially important, given the global status of India in pulse markets-says Pulse Australia CEO, Nick Goddard.
- **Lower demand from major importing countries lentil and peas area has declined in Canada this year.** Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around44 lakh acres has been covered while pea area was reported at 41lakh acres. Despite lower area coverage in 2017,it is second largest area coverage. So supply side is unlikely to be tight this year.
- **Undertone in global chickpeas market remains subdued due to higher supply in exporting countries and lower demand from India.** Global Chickpeas production is bound to increase from115 to 125 lakh tonne due to higher area coverage in India. Global Chickpeas production of Kabuli Chana) too would increase from 20 to 28 lakh tonne this year. Besides global trade would decline as major buyers like India is out of the market right now.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.
- **Chickpea production is estimated at 97100 tonne in 2017-18 in Canada.**All peas production was estimated at 41.12 lakh tonne.Export has been estimated at 25.20 lakh tonne in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha.Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha.As production would decline, total supply would decline by 10.43 % to 30.35 lakh t.Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne in 2017** despite lower area coverage of 6.23 lakh acres.US farmers had covered 3.31 lakh acres in 2016.However,Chickpeas stock on 1st Dec-2017 was recorded at72000 tonne, lower from65000 tonne from Dec-2016.Small Chickpeas stock was recorded at 45750 tonne against32600 tonne last year .Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakhtonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to

decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.12 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.70 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade weak in the near term.

Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 (Area in Lakh Ha)
