

### **Pulses Domestic Fundamentals:**

- **Nafed is active to procure Tur in various states. It has purchased 564182.99 metric tonne Tur in various states.** As on 17th March-2018 tur procurement in AP was registered at 39293.46MT, in Karnataka it was 322560.21 MT, in Maharashtra 126357.35 MT. Telangana contributed around 75,300 MT so far while it was 671.97 MT in Gujarat. Procurement is likely to continue till April-2018.
- **Pressure was seen on cash pulses markets on Monday on slack demand** from bulk buyers. However, downtrend is unlikely to continue. Fresh demand is expected by the end of this month. Lentil and Moong may trade lower.
- **Procurement of Chana in Rajasthan commences. State govt has decided** to procure 4 lakh tonne chana at MSP in the state. The latest decision of procuring 4 lakh tonne chana would ease pressure on MP. MP govt is procuring chana under Bhavantar Yojna. With increasing price of Chana difference of price would decrease and MP govt would have to pay less. It may lend support to cash market.
- **Pulses processing industry has demanded to stop import of pulses under set quota** (5 lakh tonne annually) as continuation of import April onward under quota system would further add surplus in the pulses market. Industry has requested the central government to immediately terminate the quota of 5 lakh tonne pulses import before the end of March. In August 2017, the government restricted import of tur, moong and urad. The free import of tur, moong and urad has been restricted by imposing quota of 2 lakh tonne import on tur and 3 lakh tonne on moong and urad taken together.
- **Lentil dal prices traded weak on the back of increasing arrival from new crop in Bihar and UP.** Buyers from Bengal remain active. Slight correction is expected as millers have restricted buying due to decreased demand from retailers. Fresh demand is expected from April and it may support market once again. Export volume for Nepal and B,des has decreased at higher level. Imposition of 30% import duty would make lentil costly and would support cash market in the medium term.
- **Tur lemon in Mumbai is being offered at Rs 3800-3850 per qtl.** It traded almost unchanged from previous close. Urad is being offered at Rs 3850. More dip is unlikely as demand is expected at current lower level. Australian chana is being offered at Rs3650, at Mundra port it is being offered at Rs3675 per qtl. There is no change in pea price. Canadian pea is being offered at Rs2901 peer qtl. Russian pea is being offered at Rs 2801-2811 per qtl. It is being offered at Rs 2841 at Hazira port & Rs2741 at Mundra port. Green pea is being offered at Rs 3700-3800. Masur is being offered at Rs 3300-3350 (Vessel) per qtl. in Mumbai.
- **Rajasthan govt would start Chana procurement from 14th March-2018 through Rajfed.** This year production of Chana is expected to be around 15.8 lakh tonne , higher by 1.8 lakh tonne from last year. Chana arrival in MP has declined as farmers are willing to sell it through Bhavantar Yojna. Besides, Maharashtra Govt would buy Chana.
- **Central govt. has decided to procure 3 lakh tonne Chana on MSP in Maharashtra to support cash market price.** The registration of farmers for the process has started from March 1 and 400 of them have been registered so far. The procurement — undertaken by the Small Farmers Agro Business Consortium (SFAC), National Agricultural Cooperative Marketing Federation of India Ltd (NAFED) and Food Corporation of India (FCI) — will collectively buy 3 lt of Chana in the rabi season.
- **India has increased import duty for chickpeas from 40 to 60 %.** It is applicable from immediate effect. Earlier India had imposed 40 % duty on 07th Feb-2017.
- **Chana production estimate has been revised up from the target of 9.75 MMT to 11.1 MMT for 2017-18** in the 2nd adv estimate. For 2016-17 final chana production estimate has been pegged at 9.38 MMT.
- **Urad Kharif and Rabi production estimate has been pegged higher at 3.23 MMT against** production target of 2.6 MMT in the second adv estimate released on 27th Feb-2018. For 2016-17 final production Rabi and Kharif has been pegged at 2.84 MMT. Kharif Urad production has been pegged at 2.6 MMT against target of 1.85 MMT while Rabi production has been pegged at 0.63 MMT Against targt of 0.75 MMT.

### **Pulses International Fundamental:**

- **Production of urad and moong has decreased in Myanmar due to lower price realization,** quality issue and virtually no demand from India,as per latest update by Myanmar Pulses, Beans and Sesame Seeds

Merchant Association. U Aung Htoo, deputy commerce minister of Myanmar is on India visit (18 to 20 th Mar-2018) and discussion with Indian counterpart is on. The minister has requested to end quantity limit imposed on import, valid upto 31st March-2018.Under quantity restriction Indian cann't import more than 1.5 lakh tonne Urad & Moong (each) and 2 lakh tonne Tur in a marketing year.

- **After two consecutive bumper crop years of pulses in India, prices of pulses decreased** below MSP level and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Global lentil market traded unchanged during the week under review. Weak demand from India and other importing nations has pressurized the Canadian lentil market too.** Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils was exported .It is downby 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **India & Canada have agreed to solve fumigation issue by the end of this year.** PM of both the countries have announced that India and Canada will work closely together to finalize an arrangement within 2018 to enable the export of Canadian pulses to India free from pests of quarantine importance, with mutually acceptable technological protocols. However, no statement has been made over import duty ranging from 30 to 50 % applicable right now.
- **Pulse Australia has signed an agreement with Indian Pulse and Grain Association (IPGA)** for greater exchange of information on Indian pulse crops. IPGA says that better exchange of market information will benefit producers and the operation of the supply chain. Insight into pulse crop developments in India is especially important, given the global status of India in pulse markets-says Pulse Australia CEO, Nick Goddard.
- **Lower demand from major importing countries lentil and peas area has declined** in Canada this year. Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around44 lakh acres has been covered while pea area was reported at 41lakh acres. Despite lower area coverage in 2017,it is second largest area coverage. So supply side is unlikely to be tight this year.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.
- **Chickpea production is estimated at 97100 tonne in 2017-18 in Canada.**All peas production was estimated at 41.12 lakh tonne.Export has been estimated at 25.20 lakh tonne in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha.Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha.As production would decline, total supply would decline by 10.43 % to 30.35 lakh t.Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakhtonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.12 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.70 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Peas import from Ukraine to India is bound to increase over 50 % to6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

**Weekly Outlook:** -Pulses are likely to trade range bound.
