

### **Pulses Domestic Fundamentals:**

- **Madhya Pradesh government has decided to procure Rabi crops of chana and masur at MSP** instead of using Bhavantar Bhugtan Yojana (BBY). This step by Madhya Pradesh government will reduce the flow of chana and masur in open market thereby providing support to domestic prices. Madhya Pradesh government is likely to procure 21 lakh tonnes of chana and 3 lakh tonnes of masur.
- **As per market sources**, Government is willing to ban import of all pulses. Official notification and gazettes is likely to come in few days. This is likely to support domestic prices of all pulses. MoA has also ordered government buying agencies to procure for three more months.
- **Lower prices of pulses like tur and chana are not benefitting millers in various regions.** On the other hand, lower prices accompanied with poor demand, increasing operational cost and high government stock has led many millers either to operate on lower capacity or completely stop operations. Demand is likely to dip further in coming weeks as consumers in Uttar Pradesh and Madhya Pradesh are likely to shift to mango.
- **Despite various attempts & efforts to increase pulses export it could not increase** as expected. With higher domestic production and uncompetitive local price govt has decided to extend support @ the rate of 7% to Bengal Gram(dal) & Besan through the Merchandise Exports from India Scheme(MEIS) for a limited period of three months. Under this scheme exporters get access to a scrip they can invoke as and when they import a similar quantity.
- **Chana & Tur continues to reel under pressure & the processing units across the country** are facing difficult phase. Actually lower price for both remain unfavorable as demand is weak and processing(operational) costs have gone up. It has forced millers to operate either at lower capacity or stopped it completely. Higher stock in govt.'s custody and the fear of intervention by the government too is affecting trade sentiment. Lack of interest by stockiest in a bearish market has also added to the woes of the millers.
- **Food corporation of India is working on setting up pulses silos under modernization** and technology adoption drive. A feasibility study regarding storage requirements is under way and final report is expected to be submitted by the end of this month, done by Price waterhouse-Coopers (PwC). The center has been procuring pulses for last two year and buffer stock of 20 lakh tonne has been created. Hence, modern storage is needed.
- **Nafed is active to procure Tur in various states. It has purchased 564182.99 metric tonne Tur** in various states. As on 17th March-2018 tur procurement in AP was registered at 39293.46MT, in Karnataka it was 322560.21 MT, in Maharashtra 126357.35MT. Telangana contributed around 75,300 MT so far while it was 671.97 MT in Gujarat. Procurement is likely to continue till April-2018.
- **Procurement of Chana in Rajasthan commences. State govt has decided** to procure 4 lakh tonne chana at MSP in the state. The latest decision of procuring 4 lakh tonne chana would ease pressure on MP. MP govt is procuring chana under Bhavantar Yojna. With increasing price of Chana difference of price would decrease and MP govt would have to pay less. It may lend support to cash market.
- **Pulses processing industry has demanded to stop import of pulses under set quota** (5 lakh tonne annually) as continuation of import April onward under quota system would further add surplus in the pulses market. Industry has requested the central government to immediately terminate the quota of 5 lakh tonne pulses import before the end of March. In August 2017, the government restricted import of tur, moong and urad. The free import of tur, moong and urad has been restricted by imposing quota of 2 lakh tonne import on tur and 3 lakh tonne on moong and urad taken together.
- **Lentil dal prices traded weak on the back of increasing arrival from new crop in Bihar and UP.** Buyers from Bengal remain active. Slight correction is expected as millers have restricted buying due to decreased demand from retailers. Fresh demand is expected from April and it may support market once again. Export volume for Nepal and B, desh has decreased at higher level. Imposition of 30% import duty would make lentil costly and would support cash market in the medium term.

**Pulses International Fundamental:**

- **Production of urad and moong has decreased in Myanmar due to lower price realization**, quality issue and virtually no demand from India, as per latest update by Myanmar Pulses, Beans and Sesame Seeds Merchant Association. U Aung Htoo, deputy commerce minister of Myanmar is on India visit (18 to 20<sup>th</sup> Mar-2018) and discussion with Indian counterpart is on. The minister has requested to end quantity limit imposed on import, valid upto 31<sup>st</sup> March-2018. Under quantity restriction Indian can't import more than 1.5 lakh tonne Urad & Moong (each) and 2 lakh tonne Tur in a marketing year.
- **After two consecutive bumper crop years of pulses in India, prices of pulses decreased** below MSP level and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Global lentil market traded unchanged during the week under review. Weak demand from India and other importing nations** has pressurized the Canadian lentil market too. Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils was exported. It is down by 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **India & Canada have agreed to solve fumigation issue by the end of this year.** PM of both the countries have announced that India and Canada will work closely together to finalize an arrangement within 2018 to enable the export of Canadian pulses to India free from pests of quarantine importance, with mutually acceptable technological protocols. However, no statement has been made over import duty ranging from 30 to 50 % applicable right now.
- **Pulse Australia has signed an agreement with Indian Pulse and Grain Association (IPGA)** for greater exchange of information on Indian pulse crops. IPGA says that better exchange of market information will benefit producers and the operation of the supply chain. Insight into pulse crop developments in India is especially important, given the global status of India in pulse markets—says Pulse Australia CEO, Nick Goddard.
- **Lower demand from major importing countries lentil and peas area has declined** in Canada this year. Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around 44 lakh acres has been covered while pea area was reported at 41 lakh acres. Despite lower area coverage in 2017, it is second largest area coverage. So supply side is unlikely to be tight this year.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne. It will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.
- **Chickpea production is estimated at 97100 tonne in 2017-18** in Canada. All peas production was estimated at 41.12 lakh tonne. Export has been estimated at 25.20 lakh tonne in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly firm.

<b>Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 ( Area in Lakh Ha)</b>					
Crop Name	Normal Area for whole Kharif Season	Area sown reported
