

Pulses Domestic Fundamentals:

- **Nafed procures 157320.308 MT Chana as on 4th April from rabi 2017-18 at MSP.** Out of total maximum quantity (73399.92 MT) has been purchased from Karnataka, followed by Telangana, which has procured 39779.30 MT so far. AP has procured 24482.75 MT, Rajasthan has purchased 11465.37 Mt & Maharashtra procurement was recorded at 8193.10 MT. Procurement continues.
- **In a latest development govt of India has approved purchase of 1.2 lakh MT chana and .12 lakh MT masur in Uttar Pradesh on MSP during rabi season 2017-18 to support cash market and ensure MSP to state farmers.**
- **DGFT removes mandatory roasted chana/ chana dal export in consumer pack** of one kg. Now it can be shipped in bulk. Now all pulses are free for export. Exporters have started making network in overseas market for export.
- **Nafed procures 678101.10 MT Tur till 4th April-2018 from kharif 2017-18 crop.** Out of total procurement Maharashtra contributed 198602.81 MT, Gujarat contributed 13098.42 MT, Karnataka procured 335499.88 MT, Andhra Pradesh procured 55600 MT and Telangana procured 75300 MT on MSP.
- **Chana buying at Jodhpur started by govt.'s agencies at Rs4400 per qtl.** Arrival in Jodhpur mandi is not upto the mark. Australian Chana at Mumbai was quoted at Rs 3750, unchanged from previous close. Delhi chana traded down by Rs 25 to Rs 3850. Downward movement is unlikely as arrival decreased from 40 to 25 motors. Steady to slightly firm tone may prevail in the short to medium term.
- **Central govt has given approval for buying 3000 tonne Urad from rabi season-2018 in Tamil Nadu on MSP.** Demand for Dhoya and Chilaka Urad is not upto the mark, import from overseas market at cheaper rate is unlikely and lower price in local market has helped to decrease stock to a considerable level. It helped market to recover slightly. It would move up by Rs 100 more from current level. Urad from Jhansi & Lalitpur is available at parity, so any major jump is unlikely. Besides new Urad in AP & Telangana is due now.
- **Demand for Moong dal is not good right now but sowing area in MP is likely to decline.** It is already lower by 18 to 20 % in Gujarat and Haryana. In Uttar Pradesh sowing has just commenced and it would end by 10th May-2018. New arrival from Bihar and UP is expected from June. So some improvement in Moong market is likely.
- **Tur Old stock accumulated in govt stock in past years has started declining now.** It had been imported from African countries. Restricted import quantity would not hamper cash market much this year. Yield is lower in Bihar, Jharkhand & Vishrampur is said to be lower by 25 % this year. Besides, marriage season would commence from mid-May to June, which will encourage demand for tur dal in the short to medium term.
- **New Urad crop from Rabi season is likely to commence soon in AP.** Rabi Urad and Moong crops are said to be in good condition in AP & Telangana. As demand continues, any major impact on price is unlikely. However, it would continue to restrict any firm move in the short to medium term.
- **As per a senior food ministry official, government has sold around 7 LMT of pulses from buffer stock of 20.5 LMT.** The government is selling stock through e-auctions to private traders, army and paramilitary forces in order to make space for new crop. The government created buffer stocks for the first time in 2015 through imports and after that by domestic procurement. Procurement helped in ensuring better prices for farmers and using stocks to support domestic supplies.
- **Madhya Pradesh government has decided to procure Rabi crops of chana and masur at MSP** instead of using Bhavantar Bhugtan Yojana (BBY). This step by Madhya Pradesh government will reduce the flow of chana and masur in open market thereby providing support to domestic prices. Madhya Pradesh government is likely to procure 21 lakh tonnes of chana and 3 lakh tonnes of masur.
- **Despite various attempts & efforts to increase pulses export it could not increase** as expected. With higher domestic production and uncompetitive local price govt has decided to extend support @ the rate of 7% to Bengal Gram(dal) & Besan through the Merchandise Exports from India Scheme (MEIS) for a limited period of three months. Under this scheme exporters get access to a scrip they can invoke as and when they import a similar quantity.
- **Procurement of Chana in Rajasthan commences.** State govt has decided to procure 4 lakh tonne chana at MSP in the state. The latest decision of procuring 4 lakh tonne chana would ease pressure on MP.

govt is procuring chana under Bhavantar Yojna. With increasing price of Chana difference of price would decrease and MP govt would have to pay less. It may lend support to cash market.

Pulses International Fundamental:

- **Production of urad and moong has decreased in Myanmar due to lower price realization**, quality issue and virtually no demand from India, as per latest update by Myanmar Pulses, Beans and Sesame Seeds Merchant Association. U Aung Htoo, deputy commerce minister of Myanmar is on India visit (18 to 20th Mar-2018) and discussion with Indian counterpart is on. The minister has requested to end quantity limit imposed on import, valid upto 31st March-2018. Under quantity restriction Indian can't import more than 1.5 lakh tonne Urad & Moong (each) and 2 lakh tonne Tur in a marketing year.
- **After two consecutive bumper crop years of pulses in India, prices of pulses decreased** below MSP level and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Global lentil market traded unchanged during the week under review. Weak demand from India** and other importing nations has pressurized the Canadian lentil market too. Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils was exported. It is down by 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **India & Canada have agreed to solve fumigation issue by the end of this year.** PM of both the countries have announced that India and Canada will work closely together to finalize an arrangement within 2018 to enable the export of Canadian pulses to India free from pests of quarantine importance, with mutually acceptable technological protocols. However, no statement has been made over import duty ranging from 30 to 50 % applicable right now.
- **Pulse Australia has signed an agreement with Indian Pulse and Grain Association (IPGA)** for greater exchange of information on Indian pulse crops. IPGA says that better exchange of market information will benefit producers and the operation of the supply chain. Insight into pulse crop developments in India is especially important, given the global status of India in pulse markets—says Pulse Australia CEO, Nick Goddard.
- **Lower demand from major importing countries lentil and peas area has declined** in Canada this year. Lower export volume from Canada also hints weak demand and it is likely to continue in 2018 too. Farmers in Canada had covered around 10 million acres in 2016, which was around 40 lakh acres higher than 2013-14 crop year. This year total area declined to 85 lakh acres. Under lentil crop around 44 lakh acres has been covered while pea area was reported at 41 lakh acres. Despite lower area coverage in 2017, it is second largest area coverage. So supply side is unlikely to be tight this year.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne. It will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.
- **Chickpea production is estimated at 97100 tonne in 2017-18** in Canada. All peas production was estimated at 41.12 lakh tonne. Export has been estimated at 25.20 lakh tonne in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to

decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Rabi Pulses Progressive Sowing Area Coverage Till 09.02.2018 (Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported			
		This Year 2017-18	% of Normal for whole season	Last Year 2016	% diff. till date from last year
