

### Pulses Domestic Fundamentals:

- **Govt. has extended the ban on import of pulses to processed pulses also last week.** Earlier, it was applicable to unprocessed pulses, like tur whole or moong, chana and peas. The latest move is expected to support pulses dal market to a certain extent. After this decision dal market moves up by Rs 100 to 150.
- **New moong arrival in MP continues to increase and touched 1500 bags.** Pressure is likely to continue till the end of May. Besides, arrival from Bihar and UP is about to begin. It may put pressure on price. Moong is being traded at Rs 4500 to Rs 5000 per qtl. in various mandis. Agriwatch expects market to move down by Rs 100-150 more from current level.
- **Govt. is about to start selling Tur from central pool stock.** It would restrict uptrend in tur price. Tur is being traded at Rs 3850-4450 in Gulberga market. Steady to slightly weak tone may prevail in Tur market.
- **Quotes for Burmese pulses decreased further with diminishing export possibility in India** in the first half of the year. Burma is offering Tur at \$300 per tonne, basis Indian port, down by almost \$30 per tonne in last two weeks. FAQ Urad is being offered at \$320 per tonne and SQ at \$410 per tonne basis Indian port against Indian (Chennai) prevailing price of \$630 per tonne. As & when govt. allows import, it will enter Indian market without any delay. Burma is offering Moong Pakaku at \$640 and Pediseva at \$980 per tonne basis Indian port. In INR term at Jaipur price it comes to \$705 to 710 per tonne. So Pakaku grade import is possible as and when govt. allows import.
- **Chana market is expected to improve as arrivals in major markets have started declining** and sellers are unwilling to sell at prevailing lower price. In Delhi market arrival declined from 20-25 motors to 10-15 motors. Market may move up from current level taking clue from improved online market and decreasing arrivals. Delhi market may move up to 3750-3800 soon. Farmers may prefer to sell the remaining marketing surplus to govt.'s agencies.
- **Tur market traded slightly up from previous level.** Improvement in demand at lower level may help market to get firmer. In Gulberga market Tur is being traded at Rs 3850-Rs4200 per qtl. Improvement is likely to continue as marriage season is about to start and it normally encourages demand. Urad & Moong may continue to trade under pressure as there is ample stock available in cash market. Besides, selling from central pool stock continues. It would continue to cap uptrend in the near to medium term.
- **India imported around 30,000 T yellow peas in March-2018 against 85000 T in Feb-2018.** Green peas import increased from 4800 T To 10,000 T during same period. Tur import decreased from 14332 to 10273 T & chana import decreased slightly from 8584 to 8212 T. Lentil import decreased from 12160 to 3273 T in March-2018. Urad import too decreased from 4217 to 3020 T & while Moong import increased from 1074 to 2476 T during the same period. Chana import includes mainly kabuli Chana. See comparative import table below.
- **Central govt has approved to buy Tur produced in kharif 2017-18 at MSP till 15<sup>th</sup> May-2018 in Maharashtra.** The state has procured around 254576.38 MT so far against the set target of 4.467 lakh tonne. Chana market could not sustain its uptrend and moved down again. Pressure continues and it may decrease further. Tur Urad and Moong too are waiting for bulk buyers. Demand remains weak.
- **There is news circulating in the market that Indian exporters have been able** to clinch order around 6000 tonne chana export to west Asian countries & Bangladesh after announcement of 7 % export incentive to exporters. Around 5000 tonne chana has been shipped to Bangladesh last week at \$540 per tonne basis B, desh port. Besides, around 1000 tonne Chana & Chana dal are in process to be loaded for Dubai and Jeddah at the rate of \$575 & 675 basis CnF in the 2<sup>nd</sup> week of May
- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018.** It will be affective from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1 April to 25th April too. Till 24 th April around 40,000 tonne yellow peas have been imported. So now only 60,000 more yellow peas can be imported till June-2018. new restriction is on yellow peas. Green peas and Duunn peas import remains unaffected. It would badly affect France. France had exported 41000 tonne yellow peas to Indian from April to June last year. This means residual supplies of yellow peas in global market would be higher than normal expectation, that will affect global peas price in coming weeks.
- **Urad market traded almost flat during the week under review.** As per pre-sowing market intension area under kharif urad may decline by 10 to 15 percent on all India basis. Lower price realization remains discouraging for farmers. Burma is offering Urad FAQ at \$365 and SQ at \$480 per tonne basis CnF Indian

port. At this price possibility of import seems very much in sight. under current norm, importers can import 1.5 lakh tonne Urad.

- **Nafed will procure 450930MT Chana in Madhya Pradesh during rabi season 2017-18** at MSP from farmers.Chana procurement in Gujarat would commence from 20<sup>th</sup> April-2018.Odisha govt. has approved Urad, Moong and Tur from farmers on MSP. Markfed will procure pulses in the state.

#### Pulses International Fundamental:

- **Global lentil markets continued to reel under pressure.**At one hand green lentil price is being affected by good seeding prospects, on the other excess stock is weighing on red lentil price.The latest grain commission data suggests that export from Canada has improved in April to 40,800 MT.Notably Canada had exported 17,900 MT in March -2018.It had exported 33,100 MT in April 2017.Total export in ongoing season has been registered at 235,400 MT against 700,600 MT last year till date.
- **Higher volume of export has lent support to global peas market.** According to latest data received from Canadian Grain Commission Canada has exported around 183,900 MT peas in April-2018. It is considerably higher than 57,500 MT in March-2018.Canada had exported 418,200 MT peas in April-2017.Higher demand from China has neutralized the lower import from India.
- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas**, import & quantity restriction up to the level of 1lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area. Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher(2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Despite price distortion caused by Indian prohibitive import policy (30 % duty on Lentil import)** farmers in Canada may not reduce their lentil area as much as expected for the year. This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year .It is not as much lower as expected. However, market participants say that area may be lower than actual intention. farmers may shift to green peas as Canada is not much dependent on India for green peas export.
- **Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area** by 10 lakh acres to 40.5 lakh acres .It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011.So it seems that lentil area might be higher than 40.5 lakh acres.
- **After two consecutive bumper crop years of pulses in India,prices of pulses decreased** below MSP level and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY,starting from April.Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

**Weekly Outlook:** -Pulses are likely to trade range bound.

**Comparative Import fig during Feb & Mar-2018 in India with Average CiF:**

Month	Chickpea		Tur		Green Peas		Lentil
