

### Pulses Domestic Fundamentals:

- **Govt. has allowed only millers to import of pulses under set quantity and they would** have to import it under quota system set by DGFT till March-2019. There is a common view in the market that it would help market to recover in the short to medium term. Millers have to apply till 25th May-2018 for Import and center would allocate quota for mills on 1st June-2018. Mills would be required to give weekly information regarding import.
- **Chana could not sustain its uptrend taking clue from online market. More down side** move is unlikely in coming days. Demand for chana is likely to improve due to incoming Ramadan starting from 15th May-2018. Chana in Delhi market traded at Rs 3700-3750 per qtl. Recovery in market is expected soon. Arrival flow has decreased in major mandis. In a latest development MP state govt has approved buying of 11,27,325 tonne chana on MSP. Nafed has procured total 7.09 lakh tonne chana so far. Out of total it has procured 3.03 lakh tone chana in MP.
- **Urad market traded almost steady. In Chennai it is being traded at Rs 4000-4250** per qtl. Buyers are not active for bulk buying right now as demand remains weak. Possibility of import is increasing as Burma is quoting Urad FAQ at \$ 350 per tonne and SQ at \$470 per tonne. In INR term it comes to Rs 2360 & Rs 3160 per qtl. Sentiments remain weak for Urad market.
- **Moong market traded slightly up at Rs 4900-5000 in Jaipur market. Demand is good.** However, new arrival in MP and selling through central pool stock would not allow market to move up beyond a certain level. Possibility of import from Myanmar is taking shape now with govt.'s decision to import 1.5 lakh tonne moong in current fiscal year 2018-19. Myanmar offers Moong Pakaku at \$640 at Indian port. In INR term it comes to Rs 43100 per tonne against Rs 46000-50000 per tonne in Indian market.
- **Chana cash market traded slightly up by Rs 25 to Rs 3725 in Delhi market. Despite** slight recovery bulk buying remains restricted. The flow of arrivals has declined and market is expected to stabilize near current level. Chana demand is expected to improve due to Ramadan month. Procurement drive and hope for improvement in demand may support cash chana market to a certain extent in coming weeks.
- **Mumbai Tur market traded Rs50 up to Rs3850-3900 and may move up Rs 100** more as demand is expected to improve at current level. However, selling from central pool stock would not allow market to cross a certain level. In Gulberga market Tur is being traded at Rs 3900-4350 per qtl. Steady to slightly firm tone may prevail in the near term. Burma offers Tur at \$290-95 per tonne and likely at \$300-305 per tonne.
- **India imported around 30,000 T yellow peas in March-2018 against 85000 T in Feb-2018.** Green peas import increased from 4800 T To 10,000 T during same period. Tur import decreased from 14332 to 10273 T & chana import decreased slightly from 8584 to 8212 T. Lentil import decreased from 12160 to 3273 T in March-2018. Urad import too decreased from 4217 to 3020 T & while Moong import increased from 1074 to 2476 T during the same period. Chana import includes mainly kabuli Chana. See comparative import table below.
- **There is news circulating in the market that Indian exporters have been able** to clinch order around 6000 tonne chana export to west Asian countries & Bangladesh after announcement of 7 % export incentive to exporters. Around 5000 tonne chana has been shipped to Bangladesh last week at \$540 per tonne basis Bangladesh port. Besides, around 1000 tonne Chana & Chana dal are in process to be loaded for Dubai and Jeddah at the rate of \$575 & 675 basis CnF in the 2<sup>nd</sup> week of May.
- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018. It will be affective** from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1 April to 25th April too. Till 24th April around 40,000 tonne yellow peas have been imported. So now only 60,000 more yellow peas can be imported till June-2018. New restriction is on yellow peas. Green peas and Duunn peas import remains unaffected. It would badly affect France. France had exported 41000 tonne yellow peas to India from April to June last year. This means residual supplies of yellow peas in global market would be higher than normal expectation, that will affect global peas price in coming weeks.
- **Nafed will procure 450930MT Chana in Madhya Pradesh during rabi season 2017-18** at MSP from farmers. Chana procurement in Gujarat would commence from 20<sup>th</sup> April-2018. Odisha govt. has approved Urad, Moong and Tur from farmers on MSP. Markfed will procure pulses in the state.

### Pulses International Fundamental:

- **Mayanmar pulses market has improved slightly on increasing hope that India will buy 3lakh tonne Urad and Moong during fiscal year 2018-19, starting from April-2018.** This means 1.5 lakh tonne Moong and 1.5 lakh tonne Urad May be imported this year in total excluding G 2 G basis import .India's new pulse and bean quota also includes. imports from other market. The crop will be purchased at prevailing market price.
- **Mayanmar export around 10 lakh tonne pulses yearly. Before imposition of quota limit in August 2017, it had exported 7lakh tonne Mung to India.** Under the restrictions, Indian importers were permitted to buy a maximum of 30,000 tonnes of green beans and mung beans and 20,000 tonnes of pigeon peas from Myanmar. Under new scenario some recovery in Myanmar pulses market is expected as it is ruling at its recent lowest level.
- **Burma is offering Tur Lemon at \$290 & linelely at \$300 per tonne basis Indian port. Urad is being offered at \$350 & SQ at \$470.** Mung Pakaku is at \$640 per tonne. Burmeese quotes may move up by \$10 to 20 per tonne in coming weeks. Any major jump is unlikely as there is plenty of stock available in domestic market. Importers may avoid any fresh deal immediately. Agriwatch expects import in second half of the year.
- **Global lentil markets continued to reel under pressure.** At one hand green lentil price is being affected by good seeding prospects, on the other excess stock is weighing on red lentil price. The latest grain commission data suggests that export from Canada has improved in April to 40,800 MT. Notably Canada had exported 17,900 MT in March -2018. It had exported 33,100 MT in April 2017. Total export in ongoing season has been registered at 235,400 MT against 700,600 MT last year till date.
- **Higher volume of export has lent support to global peas market. According to latest data received from Canadian Grain Commission Canada has exported around 183,900 MT peas in April-2018.** It is considerably higher than 57,500 MT in March-2018. Canada had exported 418,200 MT peas in April-2017. Higher demand from China has neutralized the lower import from India.
- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas,** import & quantity restriction up to the level of 1lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area. Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher (2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Despite price distortion caused by Indian prohibitive import policy (30 % duty on Lentil import)** farmers in Canada may not reduce their lentil area as much as expected for the year. This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year .It is not as much lower as expected. However, market participants say that area may be lower than actual intention. farmers may shift to green peas as Canada is not much dependent on India for green peas export.
- **Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area** by 10 lakh acres to 40.5 lakh acres .It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011. So it seems that lentil area might be higher than 40.5 lakh acres.
- **After two consecutive bumper crop years of pulses in India, prices of pulses decreased** below MSP level and pressure is still on. So Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Canada Lentil ending stock in 2016-17 was recorded at 4 lakh tonne.** it will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.

- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly firm.

**Comparative Import fig during Feb & Mar-2018 in India with Average CiF:**

Month	Chickpea		Tur		Green Peas		Lentil
