

### Pulses Domestic Fundamentals:

- **According to agriculture ministry, import of pulses in India has declined by around 10 lakh tonne** from 66 in 2016-17 to 56.5 lakh tonne in 2017-18 due to bumper rabi & kharif crops in two consecutive years and import restriction imposed by govt to support domestic cash market. Lower import last year has saved around 9775 crore in foreign exchange.
- **Notably, according to govt. data India has produced record 23.95 MMT pulses in 2017-18** against 23.13 in 2016-17. This year too there is good production prospects and India expects one more bumper crop in kharif 2018-19. Good monsoon rainfall and higher MSP have encouraged farmers to grow more pulses. However, situation is not favorable for farmers due to lower realization this year. If prices continue to rule below MSP, farmers may reduce Tur and Urad Area in kharif season.
- **Govt is trying to support market through procurement drive on MSP, import restriction**, opening up export and imposition of duty too. Its impact might be felt in the second half of the year. Import duty on chickpeas has been fixed at 60 per cent, yellow peas at 50 per cent, lentils at 30 per cent and tur at 10 per cent. Pulses export has been allowed from 22 Nov-2017. As parity is not there, export volumes seem negligible so far.
- **Nafed has procured around 8.57 lakh tonne Tur as on 14<sup>th</sup> May-2018.** Karnataka & Maharashtra contributed around 3.35 & 3.24 lakh tonne. Masur purchase has been recorded at 76255.75 tonne. MP contributed around 76000 tonne so far. Total Moong purchase has been recorded at 2.94 lakh tonne against progressive sale of 22000 tonne only.
- **Chana in Delhi market is being traded up by Rs 3725-3750 per qtl. Cash market is likely** to move up further in due course. In a latest development MP state govt has approved buying of 11,27,325 tonne chana on MSP. Nafed has procured total 7.09 lakh tonne chana so far. Out of total it has procured 3.03 lakh tonne chana in MP.
- **Tur market improved slightly on increased buying interest from millers. Conditional** import only through millers based on allocated quota too has helped market sentiments to improve. In Gulberga market Tur is being traded at Rs 4000-4500 per qtl. Overall sentiment remains firm. Stockists have started retaining stock on increasing possibility of lower area coverage this year. Burma offers Tur at \$290-95 per tonne and linkely at \$300-305 per tonne.
- **Govt. has allowed only millers to import of pulses under set quantity and they would** have to import it under quota system set by DGFT till March-2019. There is a common view in the market that it would help market to recover in the short to medium term. Millers have to apply till 25th May-2018 for Import and center would allocate quota for mills on 1st June-2018. Mills would be required to give weekly information regarding import.
- **Urad market traded almost steady. In Chennai it is being traded at Rs 4000-4250 per qtl.** Buyers are not active for bulk buying right now as demand remains weak. Possibility of import is increasing as Burma is quoting Urad FAQ at \$ 350 per tonne and SQ at \$470 per tonne. In INR term it comes to Rs 2360 & Rs 3160 per qtl. Sentiments remain weak for Urad market.
- **Despite some improvements Moong and Urad market is likely to trade range** bound to slightly weak. New Urad started hitting in MP market while crop of Moong in UP, Bihar is in excellent condition. New incoming crop would continue to cap market inner tone despite good demand. Possibility of import from Myanmar is taking shape now with govt.'s decision to import 1.5 lakh tonne moong in current fiscal year 2018-19. Myanmar offers Moong Pakaku at \$640 at Indian port. In INR term it comes to Rs 43100 per tonne against Rs 46000-50000 per tonne in Indian market.
- **There is news circulating in the market that Indian exporters have been able** to clinch order around 6000 tonne chana export to west Asian countries & Bangladesh after announcement of 7 % export incentive to exporters. Around 5000 tonne chana has been shipped to Bangladesh last week at \$540 per tonne basis B, desh port. Besides, around 1000 tonne Chana & Chana dal are in process to be loaded for Dubai and Jeddah at the rate of \$575 & 675 basis CnF in the 2<sup>nd</sup> week of May
- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018. It will be affective** from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1 April to 25th April too. Till 24 th April around 40,000 tonne yellow peas have been imported. Green peas and Duunn peas import remains unaffected.

### Pulses International Fundamental:

- **Global chickpeas market continued to trade steady to slightly firm as exporters and processors** continue to buy for fulfilling their immediate demand for the market. Chickpea planting is underway in Canada & US and slow progress of seeding and delayed sowing have increased fear of lower crop size as crop may face bad weather condition during flowering stages. Sowing progress is running behind by 60 % so far. It is only 20 % so far against last year of 46 % and recent average of 35%.
- **Despite higher inventory (farms & commercial combined) of lentil in Canada lentil market remained unaffected.** At the end of March total lentil inventory in Canada was registered at 1.53 million metric tons (MT). Inventory was highest at record at 1.55 million MT in 2014. Out of this farmers have over 1.36 million MT and the trades 168,000 MT in their custody. According to Statistics Canada inventories in Saskatchewan increased from 835,000 MT last year to 1.25 million MT this year. However, it was decreased from 130,000 to 112,000 MT in Alberta.
- **Myanmar pulses market has improved slightly on increasing hope that India will buy 3 lakh tonne Urad and Moong during fiscal year 2018-19, starting from April-2018.** This means 1.5 lakh tonne Moong and 1.5 lakh tonne Urad may be imported this year in total excluding G 2 G basis import. India's new pulse and bean quota also includes imports from other market. The crop will be purchased at prevailing market price.
- **Myanmar export around 10 lakh tonne pulses yearly. Before imposition of quota limit in August 2017, it had exported 7 lakh tonne Mung to India.** Under the restrictions, Indian importers were permitted to buy a maximum of 30,000 tonnes of green beans and mung beans and 20,000 tonnes of pigeon peas from Myanmar. Under new scenario some recovery in Myanmar pulses market is expected as it is ruling at its recent lowest level.
- **Burma is offering Tur Lemon at \$290 & lineley at \$300 per tonne basis Indian port. Urad is being offered at \$350 & SQ at \$470. Mung Pakaku is at \$640 per tonne.** Burmese quotes may move up by \$10 to 20 per tonne in coming weeks. Any major jump is unlikely as there is plenty of stock available in domestic market. Importers may avoid any fresh deal immediately. Agriwatch expects import in second half of the year.
- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas, import & quantity restriction up to the level of 1 lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area.** Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher (2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown—says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Despite price distortion caused by Indian prohibitive import policy (30 % duty on Lentil import) farmers in Canada may not reduce their lentil area as much as expected for the year.** This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year. It is not as much lower as expected. However, market participants say that area may be lower than actual intention. Farmers may shift to green peas as Canada is not much dependent on India for green peas export.
- **Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area by 10 lakh acres to 40.5 lakh acres.** It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011. So it seems that lentil area might be higher than 40.5 lakh acres.
- **Canada Lentil ending stock in 2016-17 was recorded at 4 lakh tonne. It will move up to 7.8 lakh tonne in 2017-18, almost double from last year.** Against this stock to use ratio is only 36%.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18 from record 2004 lakh tonne 2016-17.** Despite 4.43 % higher area coverage, production is bound to

decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.

- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

**Weekly Outlook:** -Pulses are likely to trade range bound..

**Comparative Import fig during Feb & Mar-2018 in India with Average CiF:**
