

### Pulses Domestic Fundamentals:

- **Tur market is likely to trade steady to firm as it has adjusted the impact of opening** of import(2 lakh tonne) from Burma & Mozambique (1.5 lakh tonne) this year(2018-19).As govt has ample stock(around 8.5 to 9 lakh tonne),any major spike is unlikely. However,it would continue to trade steady to slightly firm. Higher MSP (Rs 5850) may encourage farmers to maintain area at least at last year level. Good monsoon rain is expected, so production is unlikely to decrease this kharif season. In Gulberga market Tur is being traded at Rs 3700 to Rs4100 per qtl. It is necessary to have a close eye on recent Developments that are still Influencing Markets.
- **Moong arrival from summer crop has started increasing in various markets. Demand** from millers remains limited and it has started pressurizing cash moong market once again.Carryout is ample amid sufficient stock available in govt.'s hand. New arrivals have been reported from MP,UP, Rajasthan & Gijarat. Besides, Nafed & other agencies are selling Moong on lower level. So any firm trend is unlikely in the weeks ahead. Moong in Jaipur market is being traded at Rs 4800-4900 while it is being traded at Rs 4500 to 5000 in Indore. New Moong is being traded at Rs 5000 -5200 per qtl.
- **MP Govt extends Procurement date for Chana till 9th June -2018.Nafed has procured total** 12.29 lakh tonne Chana till 20th May-2018.Out of total procurement in MP cross over6.63 lakh tonne. With 2.23 lakh tonne Rajasthan stand at second place. Karnataka contribution was 1.27 lakh tonne. AP & Maharashtra have contributed around 77662.45 & 67566.444 MT respectively. Telangana contributed around 50,000 MT while Gujarat contributed over 19,000 MT. Nafed has procured only 513 MT in UP. Procurement in Karnataka and Telangana is over now.
- **MP state govt has extended the date for procurement of Chana & Masur till 9th June -2018.**This means higher procurement from farmers.As procurement process was slow,farmers was unable to sell entire marketable surplus to govt.'s agencies.Nafed has procured total 10989.34 MT Masur in MP and %92.90 MT in UP as on 21st May-2018.Total procurement recorded at 109782.24MT.The extension of procurement date may bring total procurement at 1.25 to 1.35 lakh tonne this season
- **Kharif Pulses MSP for 2018-19 has been increased from Rs 5400 to Rs 5800 for Urad, Rs 5450 to Rs 5850 for Tur and Rs 5575 to Rs 5925 per qtl.** Confirmation/notification is yet awaited. It would lend some support to cash pulses market and encourage farmers to increase pulses area.Farmer may retain pulses area at least at previous year level. If They receive good rainfall in monsoon season, Urad Moong area may increase.It may affect Tur area too.
- **Nafed has procured total 12.29 lakh tonne Chana till 20th May-2018.Out of total procurement** in MP cross over6.63 lakh tonne.With 2.23 lakh tonne Rajasthan stands at second place.Karnataka contribution was 1.27 lakh tonne.AP & Maharashtra have contributed around 77662.45 & 67566.444 MT respectively. Telangana contributed around 50,000 MT while Gujarat contributed over 19,000 MT.Nafed has procured only 513 MT in UP. Procurement in Karnataka and Telangana is over now..
- **Even Urad price in Burma move up from \$350 to \$420 per tonne basis Indian port in** last two weeks. Around \$70 per tonne improvement has lent some support to cash Urad market too in India. Price rise is mainly attributed to permission of conditional import by Indian govt. However, import through allocation would limit volume and current quote is expected to decrease once again as demand from India is unlikely to increase. Ample stock is available in Indian market. Sowing of kharif planting may be major price driver in coming weeks.
- **Masur market in Mumbai is being traded at Rs 3600-3700 per qtl. Improvement** is likely to continue as stockists have started retaining stock analyzing uptrend in coming weeks. Import at 30%comes to Rs 3400/3500. So likely restricted supply would continue to push market up.
- **DES has revised pulses production estimates from23.95 to 24.51MMT in the 3<sup>rd</sup> Adv.Est** released on16th May-2018 for 2017-18 season.It has finalized last year production at 23.13 MMT.
- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018.It will be affective** from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1April to 25th April too.Till 24 th April around 40,000 tonne yellow peas have been imported.Green peas and Duunn peas import remains unaffected.

### Pulses International Fundamental:

- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne** in 2018.Lentil production may steady at around 3.39 lakh tonne this year.Pea production too would increase from 6.43 to

6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.

- **Planting of lentil continues in Canada and almost 60 percent crop has been sown** so far. The pace and coverage of sowing is higher than last year. However, moisture stress in the field and comparative dry weather may affect germination. There is a dire need for rains in growing belts. Lentil cash market traded mixed despite improved pace of export. Large green Laird, 15/64 is being delivered to plant at an average price of 26.25 CND cents per pound. Medium green Richlea is being delivered at 23.50 CND cent per pound. Small red is being delivered at 17.03 CND per pound.
- **Global chickpeas market continued to trade steady to slightly firm as exporters and processors** continue to buy for fulfilling their immediate demand for the market. Chickpea planting is underway in Canada & US and slow progress of seeding and delayed sowing have increased fear of lower crop size as crop may face bad weather condition during flowering stages. Sowing progress is running behind by 60 % so far. It is only 20 % so far against last year of 46 % and recent average of 35%.
- **Despite higher inventory (farms & commercial combined) of lentil in Canada** lentil market remained unaffected. At the end of March total lentil inventory in Canada was registered at 1.53 million metric tons (MT). Inventory was highest at record at 1.55 million MT in 2014. Out of this farmers have over 1.36 million MT and the trades 168,000 MT in their custody. According to Statistics Canada inventories in Saskatchewan increased from 835,000 MT last year to 1.25 million MT this year. However, it was decreased from 130,000 to 112,000 MT in Alberta.
- **Myanmar pulses market has improved slightly on increasing hope that India will buy 3 lakh tonne** Urad and Moong during fiscal year 2018-19, starting from April-2018. This means 1.5 lakh tonne Moong and 1.5 lakh tonne Urad may be imported this year in total excluding G 2 G basis import. India's new pulse and bean quota also includes imports from other market. The crop will be purchased at prevailing market price.
- **Burma is offering Tur Lemon at \$290 & new at \$300 per tonne basis Indian port.** Urad is being offered at \$350 & SQ at \$470. Mung Pakaku is at \$640 per tonne. Burmese quotes may move up by \$10 to 20 per tonne in coming weeks. Any major jump is unlikely as there is plenty of stock available in domestic market. Importers may avoid any fresh deal immediately. Agriwatch expects import in second half of the year.
- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas,** import & quantity restriction up to the level of 1 lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area. Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher (2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres** in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Despite price distortion caused by Indian prohibitive import policy (30 % duty on Lentil import)** farmers in Canada may not reduce their lentil area as much as expected for the year. This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year. It is not as much lower as expected. However, market participants say that area may be lower than actual intention. Farmers may shift to green peas as Canada is not much dependent on India for green peas export.
- **Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area** by 10 lakh acres to 40.5 lakh acres. It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011. So it seems that lentil area might be higher than 40.5 lakh acres.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne. It will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to

decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.

- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

**Weekly Outlook:** -Pulses are likely to trade range bound to slightly firm
