Pulses Domestic Fundamentals:

- ***Central govt has increased the procurement limit for Chana and Masur on MSP. Now*** *procurement agencies can procure 1577000 tonne Chana and 271,600 tonne Masur during ongoing Rabi season. Nafed has procured 14.59 lakh tonne Chana and 1.35 lakh tonne Masur so far. Nafed has procured 9.09 lakh tonne chana in MP,2.67 lakh tonne in Rajasthan & 1.34 lakh tonne Masur. This indicates that stock in central pool may cross 28 lakh tonne. Govt. would continue to sell pulses from hefty accumulated stock in central pool and it will limit any upward momentum in coming weeks.*
- ***Chana cash market could not sustain its upward momentum as futures continue*** *to move in southward direction. Delhi Chana traded down by Rs 50 to Rs 3725-50 per qtl. Inner tone remains bearish. In a latest development MP state govt. has increased chana procurement target from 11 to over 13 lakh tonne this year. Stocking in central pool is increasing continuously and it may touch 28-30 lakh tonne. This means govt would continue to sell below MSP and price in cash market would continue to reel under pressure.*
- ***Even Tur market seems under pressure once again as Maharashtra govt has decreased Tur*** *dal price from Rs55 to Rs35 per kg for distribution through PDS. If people get dal at Rs35 kg,who would buy Tur at Rs4000 or more. Stock in central pool is over 1 MMT. Besides 3.5 lakh tonne(2 lakh tone under set quota and 1.5 lakh tonne from Mozambique on G2 G basis) import seems very much in sight. So any respite is unlikely in the short to medium term.*
- ***Higher pulses production during last two years and good production prospects this year too*** *would not allow pulses market to move up beyond a certain level in spite of procurement drive and opening up export with 7% export incentives. Besides, obligation of import under WTO norm import would continue despite higher availability in domestic market. India would import over 5 lakh tonne pulses (Tur, Urad, Chana & Moong) this year. Besides, lentil and yellow pea import would continue as per domestic requirements. Pulses production in 2017-18 has been pegged at 23.95 MMT which is higher than 0.82 MMT(23.13 MMT).This year too bumper production seems on the card. So any spike in pulses market is unlikely.*
- ***Moong arrival from summer crop has started increasing in various markets. Demand*** *from millers remains limited and it has started pressurizing cash moong market once again.Carryout is ample amid sufficient stock available in govt.'s hand. New arrivals have been reported from MP,UP, Rajasthan & Gijarat. Besides, Nafed & other agencies are selling Moong on lower level. So any firm trend is unlikely in the weeks ahead. Moong in Jaipur market is being traded at Rs 4800-4900 while it is being traded at Rs 4500 to 5000 in Indore. New Moong is being traded at Rs 5000 -5200 per qtl.*
- ***Kharif Pulses MSP for 2018-19 has been increased from Rs 5400 to Rs 5800 for Urad****, Rs 5450 to Rs 5850 for Tur and Rs 5575 to Rs 5925 per qtl. Confirmation/notification is yet awaited. It would lend some support to cash pulses market and encourage farmers to increase pulses area.Farmer may retain pulses area at leat at previous year level. If They receive good rainfall in monsoon season, Urad Moong area may increase. It may affect Tur area too.*
- ***Nafed has procured total 12.29 lakh tonne Chana till 20th May-2018.Out of total procurement*** *in MP cross over6.63 lakh tonne. With 2.23 lakh tonne Rajasthan stands at second place. Karnataka contribution was 1.27 lakh tonne. AP & Maharashtra have contributed around 77662.45 & 67566.444 MT respectively. Telangana contributed around 50,000 MT while Gujarat contributed over 19,000 MT. Nafed has procured only 513 MT in UP. Procurement in Karnataka and Telangana is over now..*
- ***Even Urad price in Burma move up from $350 to $420 per tonne basis Indian port in*** *last two weeks. Around $70 per tonne improvement has lent some support to cash Urad market too in India. Price rise is mainly attributed to permission of conditional import by Indian govt. However, import through allocation would limit volume and current quote is expected to decrease once again as demand from India is unlikely to increase. Ample stock is available in Indian market. Sowing of kharif planting may be major price driver in coming weeks.*
- ***Masur market in Mumbai is being traded at Rs 3600-3700 per qtl. Improvement*** *is likely to continue as stockists have started retaining stock analyzing uptrend in coming weeks. Import at 30% comes to Rs 3400/3500. So likely restricted supply would continue to push market up.*
- ***DES has revised pulses production estimates from23.95 to 24.51MMT in the*** *3rd Adv.Est released on16th May-2018 for 2017-18 season.It has finalized last year production at 23.13 MMT.*
- ***Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018.It will be affective*** *from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1April to 25th April*

too.Till 24 th April around 40,000 tonne yellow peas have been imported. Green peas and Duunn peas import remains unaffected.

Pulses International Fundamental:

- ***The current 2017-18 season for pulses in Black Sea Region is coming to an end now.*** *Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17.This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.*
- ***Global lentil market traded almost unchanged due to limited buying interest from importing*** *countries. Market is awaiting to see planted area this year before starting buying. Area may decline by 5 to 10 % this year from actually planned-say market experts. Almost 80 % sowing is complete in Canada. Given current weather conditions, it should be at least 90% complete by the time Statistics Canada starts its seeded area survey from 1st week of June-2018.*
- ***Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne*** *in 2018.Lentil production may steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018.Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.*
- ***Despite higher inventory (farms & commercial combined) of lentil in Canada lentil*** *market remained unaffected. At the end of March total lentil inventory in Canada was registered at 1.53 million metric tons (MT).Inventory was highest at record at 1.55 million MT in 2014.Out of this farmers have over 1.36 million MT and the trades 168,000 MT in their custody. According to Statistics Canada inventories in Saskatchewan increased from 835,000 MT last year to 1.25 million MT this year. However, it was decreased from 130,000 to 112,000 MT in Alberta.*
- ***Mayanmar pulses market has improved slightly on increasing hope that India will*** *buy 3lakh tonne Urad and Moong during fiscal year 2018-19,starting from April-2018.This means 1.5 lakh tonne Moong and 1.5 lakh tonne Urad May be imported this year in total excluding G 2 G basis import .India's new pulse and bean quota also includes. imports from other market.The crop will be purchased at prevailing market price.*
- ***Burma is offering Tur Lemon at $290 & new at $300 per tonne basis Indian port. Urad*** *is being offered at $350 & SQ at $470.Mung Pakaku is at $640 per tonne. Burmeese quotes may move up by $10 to 20 per tonne in coming weeks. Any major jump is unlikely as there is plenty of stock available in domestic market. Importers may avoid any fresh deal immediately. Agriwatch expects import in second half of the year.*
- ***Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh*** *acres in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.*
- ***Despite price distortion caused by Indian prohibitive import policy (30 % duty on*** *Lentil import) farmers in Canada may not reduce their lentil area as much as expected for the year. This year Saskatchewan farmers may plant 3.591 million acres of lentils against 3.920 million acres last year .It is not as much lower as expected. However, market participants say that area may be lower than actual intention. farmers may shift to green peas as Canada is not much dependent on India for green peas export.*
- ***Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area*** *by 10 lakh acres to 40.5 lakh acres .It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011.So it seems that lentil area might be higher than 40.5 lakh acres.*
- ***Canada Lentil ending stock in 2016-****17 was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.*
- ***Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh****tonne in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to*

decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.

- ***Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.*

Weekly Outlook: -*Pulses are likely to trade steady to slightly weak.*
