

Pulses Domestic Fundamentals:

- **Import quota for Tur,Urad & Moong has been allocated and is available on the DGFT official website.** Quota has been allocated to 338 millers for import. Total 1,99,887 MT Tur, 1,49,963 MT Moong & 1,49,996 MT Urad import has been allowed in current MY starting from April-2018. Total 1049 MT Tur, 1536 MT Moong and 904 MT Urad per application has been permitted. Millers can import lower than stipulated quantity too. Shipment should be dated prior to 31st Aug-2018. By 31st Aug all importers would have to send report of import made by them to DGFT.
- **Burma offers Tur(new) at \$465(both ols & new) per tonne basis Indian port. If 10 percent duty is applied it comes to \$511.5 per tonne.** In INR term it brings costing at Rs 3427 per qtl. This means parity is in favour of importers. Importers can import 2 lakh tonne in current MY starting from April to March-2018. Besides, 1.5 lakh tonne will be imported through govt. channel this year. In domestic market Tur is being traded at Rs 3900 to Rs 4400 per qtl. Import volume, govt.'s stock would not allow market to move up continuously. Maharashtra govt has decided to sell Tur dal at Rs 35 per kg through ration shop. It was selling Rs 55 per kg earlier. All these developments have put a cap on Tur market despite fear of lower area coverage.
- **However, Tur Buying by Nafed & demand for 25,000 MT Tur dal from Tamil Nadu Civil Supply** may lend support to Tur market to a certain extent. Slower start of Tur sowing and growing fear of lower acreage would push market up in coming weeks.
- **Pressure on Moong and Urad may continue as there is plenty of supply in the market.** Govt too is sitting on huge stock pile. It will continue to cap any move of uptrend in the near term. New Moong crop in Bihar starts while arrival in UP is increasing. Burma offers Tur lemon at \$465 per MT, Urad FAQ at \$460 and SQ at \$570 per MT. Moong Pakako is being offered at \$670 and Pediseva at \$1100 per tonne basis Indian port. As there is parity in favour of Indian importers/dal millers, import is expected to increase June onward.
- **Normal pulses area for all pulses in kharif season is 111.93 lakh ha.** The planting season started with slower sowing pace. Farmers have covered 1.08 lakh ha so far against 1.61 lakh ha last year. It is lagging behind by 33.33% so far. Tur area coverage reported 0.08/0.10, urad area 0.28/0.42, Moong area 0.23/0.32, others 0.45/0.73 lakh ha as on 1st June -2018. See table below for details:
- **Central govt has increased the procurement limit for Chana and Masur on MSP.** Now procurement agencies can procure 1577000 tonne Chana and 271,600 tonne Masur during ongoing Rabi season. Nafed has procured 14.59 lakh tonne Chana and 1.35 lakh tonne Masur so far. Nafed has procured 9.09 lakh tonne chana in MP, 2.67 lakh tonne in Rajasthan & 1.34 lakh tonne Masur. This indicates that stock in central pool may cross 28 lakh tonne. Govt. would continue to sell pulses from hefty accumulated stock in central pool and it will limit any upward momentum in coming weeks.
- **Kharif Pulses MSP for 2018-19 has been increased from Rs 5400 to Rs 5800 for Urad, Rs 5450 to Rs 5850 for Tur and Rs 5575 to Rs 5925 per qtl.** Confirmation/notification is yet awaited. It would lend some support to cash pulses market and encourage farmers to increase pulses area. Farmer may retain pulses area at least at previous year level. If they receive good rainfall in monsoon season, Urad Moong area may increase. It may affect Tur area too.
- **Nafed has procured total 12.29 lakh tonne Chana till 20th May-2018.** Out of total procurement in MP cross over 6.63 lakh tonne. With 2.23 lakh tonne Rajasthan stands at second place. Karnataka contribution was 1.27 lakh tonne. AP & Maharashtra have contributed around 77662.45 & 67566.444 MT respectively. Telangana contributed around 50,000 MT while Gujarat contributed over 19,000 MT. Nafed has procured only 513 MT in UP. Procurement in Karnataka and Telangana is over now..
- **Even Urad price in Burma move up from \$350 to \$420 per tonne basis Indian port in last two weeks.** Around \$70 per tonne improvement has lent some support to cash Urad market too in India. Price rise is mainly attributed to permission of conditional import by Indian govt. However, import through allocation would limit volume and current quote is expected to decrease once again as demand from India is unlikely to increase. Ample stock is available in Indian market. Sowing of kharif planting may be major price driver in coming weeks.
- **Masur market in Mumbai is being traded at Rs 3600-3700 per qtl.** Improvement is likely to continue as stockists have started retaining stock analyzing uptrend in coming weeks. Import at 30% comes to Rs 3400/3500. So likely restricted supply would continue to push market up.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est released on 16th May-2018 for 2017-18 season.** It has finalized last year production at 23.13 MMT.

- **Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018.** It will be effective from 1st April to 30th June-2018 for three months. The restricted quantity includes import from 1 April to 25th April too. Till 24th April around 40,000 tonne yellow peas have been imported. Green peas and Duunn peas import remains unaffected.

Pulses International Fundamental:

- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Global lentil market traded almost unchanged due to limited buying interest from importing countries.** Market is awaiting to see planted area this year before starting buying. Area may decline by 5 to 10 % this year from actually planned-say market experts. Almost 80 % sowing is complete in Canada. Given current weather conditions, it should be at least 90% complete by the time Statistics Canada starts its seeded area survey from 1st week of June-2018.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Despite higher inventory (farms & commercial combined) of lentil in Canada lentil market remained unaffected.** At the end of March total lentil inventory in Canada was registered at 1.53 million metric tons (MT). Inventory was highest at record at 1.55 million MT in 2014. Out of this farmers have over 1.36 million MT and the trades 168,000 MT in their custody. According to Statistics Canada inventories in Saskatchewan increased from 835,000 MT last year to 1.25 million MT this year. However, it was decreased from 130,000 to 112,000 MT in Alberta.
- **Burma is offering Tur Lemon at \$290 & new at \$300 per tonne basis Indian port. Urad** is being offered at \$350 & SQ at \$470. Mung Pakaku is at \$640 per tonne. Burmeese quotes may move up by \$10 to 20 per tonne in coming weeks. Any major jump is unlikely as there is plenty of stock available in domestic market. Importers may avoid any fresh deal immediately. Agriwatch expects import in second half of the year.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Lentil seeding intentions in Canada shows that farmers are going to reduce lentil area by 10 lakh acres to 40.5 lakh acres.** It is a surprising factor. However, when we see last five years average sowing, area is 10% higher than actually intended. Before this farmers had seeded less than intended area in 2011. So it seems that lentil area might be higher than 40.5 lakh acres.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne. It will move up to 7.8 lakh tonne in 2017-18, almost double from last year. Against this stock to use ratio is only 36%.

- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to trade range bound.
