

### Pulses Domestic Fundamentals:

- **Rain is unlikely in most parts of India during next 10days.** Significant rain will be limited in some eastern crop areas and along the west coast. Lack of rains elsewhere will be erratically raise some concern over planting and emergence. Monsoon has entered into weak phase and was considered as normal phenomenon. IMD stands by its prediction of normal rains over the region. However, it will slow down the pace of kharif pulses sowing this week.
- **Around 35000 MT yellow peas has touched Indian ports.** Out of total 15000 has been reported from Tuticorin port and 20,000 MT from Hazira port. Besides, around 30,000 MT is expected to reach Mumbai by 22<sup>nd</sup> June-2018. It would restrict pea market to move further up as supply side would ease.
- **All mandis in MP will remain closed from 21 to 23 June-2018.** Grains, pulses & oilseeds traders association has announced it against govt.'s ongoing policy that is disrupting market and its sentiments. Actually, MP govt has decided to start trade through e-auction from 1st July-2018. Against this move trades community would not trade in all 230 grains markets in MP.
- **With increasing procurement and accumulating stock in central pool actual buyers remain wary of any fresh deal for pulses.** Demand for dal & pulses remain flat. There is fear in the market that govt. would sell pulses in open market below MSP price and can't retain it for longer time as sowing of kharif is on and it has to procure from kharif crop too. So there seems no respite for pulses market immediately.
- **Govt. is not in a position to ban import completely despite prevailing price is much lower than MSP.** Import would continue in a restricted way. Urad Moong & Tur import volume is expected to be in the range of 6.5 lakh tonne excluding peas and lentils.
- **Hefty carryout for Chana, Moong and Urad remains problematic for cash market.** Buyers are out of the market. So govt. may consider barter trade to offload excess stock wherever it is possible. There is a rumor circulating in the market that some agreement regarding barter trade between India and Venezuela is under considerations. Under this trade India will supply pulses to Venezuela and Venezuela would supply crude oil.
- **Under current situation pulses market is heavily burdened with surplus stock and** consumption of surplus stock is posing a great challenge for govt. as well as private trades.
- **Rajasthan govt has increased the quantity of Chana for procurement under PSS** from 2 lakh tonne to 5.5 lakh tonne. Till date around 4 lakh tonne Chana has been procured in the state.
- **There is a rumor in the market that Indian govt is considering barter trade.** Under this scheme govt would import crude oil and pay them exporting grains including pulses. A proposal in this regard has been given to Venezuela. Conversation regarding this with many Arab countries too is under way. If it clicks, it would support pulses market.
- **Burma is offering lemon Tur at \$420 and linkly at \$430 per tonne basis Indian port.** Urad FAQ is being offered at \$410 and SQ at \$540 per tonne basis Indian port. Chana Kabuli is being offered at \$650 per tonne. Moong Pkaku is being offered at \$670 per tonne basis Indian port.
- **All India Chana procurement under price support scheme reached at record high at 2258654.792 MT** till 6th June-2018. procurement is still on in some states. Total figure may touch 25 lakh tonne as Nafed continue to procure Chana till 20th June in two states. The highest procurement (1431675.447MT) has been registered in MP, followed by Rajasthan (395318.248 MT), Karnataka (127301.264MT) Maharashtra (108039.644), Gujarat (65647.039MT), Andhra Pradesh (77662.450MT), Telangana (50000.059MT) and UP (3010.65 MT). procurement target is over in AP, Telangana and Karnataka. Higher procurement this year signals lower private participation as it weakens inner tone.
- **Import quota for Tur, Urad & Moong has been allocated and is available on the DGFT official website.** Quota has been allocated to 338 millers for import. Total 1,99,887 MT Tur, 1,49,963MT Moong & 1,49,996MT Urad import has been allowed in current MY starting from April-2018. Total 1049MT Tur, 1536 MT Moong and 904 MT Urad per application has been permitted. Millers can import lower than stipulated quantity too. Shipment should be dated prior to 31st Aug-2018. By 31<sup>st</sup> Aug all importers would have to send report of import made by them to DGFT.
- **Kharif Pulses MSP for 2018-19 has been increased from Rs 5400 to Rs 5800 for Urad, Rs 5450 to Rs 5850 for Tur and Rs 5575 to Rs 5925 per qtl.** Confirmation/notification is yet awaited. It would lend some support to cash pulses market and encourage farmers to increase pulses area. Farmer may retain pulses

area at least at previous year level. If they receive good rainfall in monsoon season, Urad Moong area may increase. It may affect Tur area too.

- **Masur market in Mumbai is being traded at Rs 3600-3700 per qtl. Improvement** is likely to continue as stockists have started retaining stock analyzing uptrend in coming weeks. Import at 30% comes to Rs 3400/3500. So likely restricted supply would continue to push market up.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3<sup>rd</sup> Adv. Est.** released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.

#### Pulses International Fundamental:

- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in** bulk importers countries remains bleak. France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. Major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093 MT together out of 21235 MT shipped in April-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded** well below average. However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crop sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely** to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops.
- **The United States Farmers have covered lower area under pulses in 2018** as compared to 2017. As per latest update released by the USA Dried Pea and Lentil Council, return of average field is still more than previous year. Among major pulses crop in US area under pea has been pegged at 9.08 and lentil at 7.91 lakh acres. In comparison to last year both pulses area coverage is down by 11 lakh acres. Just opposite to it Chickpeas area increased to 6.65 lakh acres, up by 70 percent from last year.
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne** pea in April-2018. The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, it is higher by 3500 MT shipped** in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, D, and US were major buyers for lentil in April-2018. However, total shipped quantity in this May has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Global lentil market traded almost unchanged due to limited buying interest from importing** countries. Market is awaiting to see planted area this year before starting buying. Area may decline by 5 to 10 % this year from actually planned—say market experts. Almost 80 % sowing is complete in Canada. Given current

weather conditions, it should be at least 90% complete by the time Statistics Canada starts its seeded area survey from 1st week of June-2018.

- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.
- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

**Comparative Import fig during Feb, Mar & Apr-2018 in India with Average CiF:**
