

### Pulses Domestic Fundamentals:

- **All round demand at lower level from mills Tur in Mumbai** driven Tur price up by Rs 100 to Rs 3650 per qtl. Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- **Import of urad seems under parity amid ample availability of domestic stock.** There is no short supply of Urad in domestic market. SQ urad may move up as there is good demand for it. In comparison to producing region Urad is trading lower by Rs 200 in Delhi market. So buyers are active in Delhi. Besides, there is no stock in mills and stockists too have sold out 75 to 80 % stock due to liquidity crunch. It would push up urad price by Rs 200 from current level this week. However, stake holders should sell Urad at higher level as ample stock is available in domestic market.
- **There is a report of 30 to 40 % lower Moong crop in Bihar and UP.** Resultantly arrival is not increasing as per expectation. Despite lower demand for dhoya and chilka dal and affected purchasing power due to liquidity crunch moong is likely to trade at current level. Dal mills are active. Moong from Allahabad line was traded up by Rs 100 to Rs 4800-4850. Moong market is expected to trade in the range of Rs 4800 to Rs 5200 per qtl. this week.
- **Arrival of chana in mandis of Rajasthan and MP is decreasing so fast.** Arrivals in these mandis have decreased by 20 to 25 % in comparison to last year at this point of time. Despite imposition of 60% import duty and lower arrival prices are ruling below expectation. As demand for marriage season begins, there is a chance of improvement in chan price in coming weeks. Chana may move up by Rs 200 in next two weeks.
- **Masur seems to move up as stock pressure is likely to end in coming months.** Demand from millers is expected from this week and there is no report of any bulk import volume this month. New crop is far ahead and it may push market up by Rs 200 per qtl. As import dependence will continue and lower crop size in Canada may push global lentil price up, so import would be more costly at 30% duty. It would support Indian market at current level.
- **Rain is unlikely in most parts of India during next 10 days.** Significant rain will be limited in some eastern crop areas and along the west coast. Lack of rains elsewhere will be erratically raise some concern over planting and emergence. Monsoon has entered into weak phase and was considered as normal phenomenon. IMD stands by its prediction of normal rains over the region. However, it will slow down the pace of kharif pulses sowing this week.
- **Around 35000 MT yellow peas has touched Indian ports.** Out of total 15000 has been reported from Tuticorin port and 20,000 MT from Hazira port. Besides, around 30,000 MT is expected to reach Mumbai by 22<sup>nd</sup> June-2018. It would restrict pea market to move further up as supply side would ease.
- **All mandis in MP will remain closed from 21 to 23 June-2018.** Grains, pulses & oilseeds traders association has announced it against govt.'s ongoing policy that is disrupting market and its sentiments. Actually, MP govt has decided to start trade through e-auction from 1<sup>st</sup> July-2018. Against this move trades community would not trade in all 230 grains markets in MP.
- **There is a rumor in the market that Indian govt is considering barter trade.** Under this scheme govt would import crude oil and pay them exporting grains including pulses. A proposal in this regard has been given to Venezuela. Conversation regarding this with many Arab countries too is under way. If it clicks, it would support pulses market.
- **Burma is offering lemon Tur at \$420 and linkly at \$430 per tonne basis Indian port.** Urad FAQ is being offered at \$410 and SQ at \$540 per tonne basis Indian port. Chana Kabuli is being offered at \$650 per tonne. Moong Pkaku is being offered at \$670 per tonne basis Indian port.
- **All India Chana procurement under price support scheme reached at record high at 2258654.792 MT till 6th June-2018.** procurement is still on in some states. Total figure may touch 25 lakh tonne as Nafed continue to procure Chana till 20th June in two states. The highest procurement (1431675.447 MT) has been registered in MP, followed by Rajasthan (395318.248 MT), Karnataka (127301.264 MT) Maharashtra (108039.644), Gujarat (65647.039 MT), Andhra Pradesh (77662.450 MT), Telangana (50000.059 MT) and UP (3010.65 MT). procurement target is over in AP, Telangana and Karnataka. Higher procurement this year signals lower private participation as it weakens inner tone.

- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3<sup>rd</sup> Adv.Est released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.**

#### **Pulses International Fundamental:**

- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak.** France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093 MT together out of 21235 MT shipped in April-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded well below average.** However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crop sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne.** The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops.
- **The United States Farmers have covered lower area under pulses in 2018 as compared to 2017.** As per latest update released by the USA Dried pea and Lentil council, return of average field is still more than previous year. Among major pulses crop in US area under pea has been pegged at 9.08 and lentil at 7.91 lakh acres, In comparison to last year both pulses area coverage is down by 11 lakh acres. Just opposite to it Chickpeas area increased to 6.65 lakh acres, up by 70 percent from last year.
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, it is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this May has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Global lentil market traded almost unchanged due to limited buying interest from importing countries.** Market is awaiting to see planted area this year before starting buying. Area may decline by 5 to 10 % this year from actually planned—say market experts. Almost 80 % sowing is complete in Canada. Given current weather conditions, it should be at least 90% complete by the time Statistics Canada starts its seeded area survey from 1st week of June-2018.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown—says Carl Potts, executive director of the Saskatchewan Pulse

Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

- **Canada Lentil ending stock in 2016-17** was recorded at 4 lakh tonne.it will move up to 7.8 lakh tonne in 2017-18,almost double from last year. Against this stock to use ratio is only36%.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

**Comparative Import fig during Feb, Mar & Apr-2018 in India with Average CiF:**
