

### **Pulses Domestic Fundamentals:**

- Bengal gram export incentives are valid till 20th June only. Notice for further extension is still awaited. Under MEIS scheme 7 % incentive was announced earlier. It may be discussed in tomorrow meeting and decision over it might come by next week.
- Deficient rain in June has hit the sowing of pulses in Odisha with the area under coverage dropping more than 45 per cent with the Kharif season so far. Odisha has set a target to bring 1.09 million hectares under pulses sowing. The output target of pulses during the crop season of 2018-19 has been set at 0.67 million tonne, including 0.218 million tonne of Arhar and 0.166 million tonne of Mung. Farmers in the state have delayed the sowing of pulses owing to deficient rain. Rains are expected only after June 25.
- With improving demand for all pulses just ahead of marriage season prices of dal/pulses are expected
  to improve from current level in coming weeks.
- Nafed has procured around 25.81 lakh tonne chana as on 16th June-2018. It procured around 15.91 lakh tonne in MP,4.75 lakh tonne in Rajasthan,1.27 lakh tonne in Karnataka, Maharashtra 1.71 lakh tonne,0.5 lakh tonne in Telangana,0.77 lakh tonne in AP,0.87 lakh tonne in Gujarat, 0.05 lakh tonne in Uttar Pradesh. Procurement is almost over now. Selling from central pool stock is expected August onward. As there is plenty of stock in central pool, govt .stock would not allow chana to beyond a certain level. Market is expected to stabilize near Rs3900 to 4100 per qtl.
- Kharif pulses sowing area is lagging behind by 9.8 % to 2.53 lakh ha against 2.79 lakh ha last year as on 15th June-2018. Tur & Kulthi area is running ahead by 13.10 and 113.33 % to 0.51 & 0.16 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 2.26 lakh ha for kulthi. Sowing pace has got delayed by lack of rains in many growing states. Fresh showers of rains are expected from next week again.
- Urad kharif area too is lagging behind by 29.10 % to 0.47 lakh ha against 0.67 lakh ha last year till date. Normal kharif Urad area is 26.99 lakh ha. Farmers preliminary sowing intention shows that some Urad area might be shifted to other lucrative crops like Soybean, Groundnut and Chili. Even kharif Moong area is running behind by 7.59 % to 0.69 lakh ha o far. Normal area under moong is 24.92 lakh ha. As farmers have received better price for moong in comparison to other pulses, any major decline in area is unlikely. Production size would depend on rains in growing regions.
- All round demand at lower level from mills Tur in Mumbai drove Tur price up by Rs 100 to Rs 3650
  per qtl. Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs3625
  per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As
  there is a fear of lower acerage too, tur market is likely to move up By Rs 200 to Rs250 more from current
  level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- Import of urad seems under parity amid ample availability of domestic stock. There is no short supply of Urad in domestic market. SQ urad may move up as there is good demand for it. In comparison to producing region Urad is trading lower by Rs 200 in Delhi market. So buyers are active in Delhi. Besides, there is no stock in mills and stockists too have sold out 75 to 80 % stock due to liquidity crunch. It would push up urad price by Rs 200 from current level this week. However, stake holders should sell Urad at higher level as ample stock is available in domestic market.
- Masur seems to move up as stock pressure is likely to end in coming months. Demand from millers is expected from this week and there is no report of any bulk import volume this month. New crop is far ahead and It may push market up by Rs 200 per qtl. As import dependance will continue and lower crop size in canada may push global lentil price up, so import would be more costly at 30% duty. It would support Indian market at current level.
- Around 35000 MT yellow peas has touched Indian ports. Out of total 15000 has been reported from Tuticorin port and 20,000 MT from Hazira port. Besides, around 30,000 MT is expected to reach Mumbai by 22<sup>nd</sup> June-2018. It would restrict pea market to move further up as supply side would ease.
- Burma is offering lemon Tur at \$420 and linkly at \$430 per tonne basis Indian port. Urad FAQ is being offered at \$410and SQ at \$540 per tonne basis Indian port. Chana Kabuli is being offered at \$650 per tonne. Moong Pkaku is being offered at \$670 per tonne basis Indian port.
- DES has revised pulses production estimates from23.95 to 24.51MMT in the 3<sup>rd</sup> Adv.Est released on16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.

## **Pulses International Fundamental:**

- Lentil markets were traded steady in dull buying interest during the past week. Seeding of the North American crop is now complete, with many areas reporting improvements in soil moisture conditions on account of recent rainfall events. Markets continue to doubt that farmers planted as many lentils as intended in Canada, with expectations high that the coming June 29 seeded area estimate will show a bigger drop in area than the current official forecast.
- Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak. France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year. Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to .1.85 lakh ha.Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19.Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha(last year 11.16 lakh ha) in 2018-19.Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded well below average. However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crop sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19.Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops.
- The United states Farmers have covered lower area under pluses in 2018 as compare to 2017. As per latest update released by the USA Dried pea and Lentil council, return of average field is still more than previous year. Among major pulses crop in US area under pea has been pegged at 9.08 and lentil at 7.91 lakh acres, In comparison to last year both pulses area coverage is down by 11 lakh acres. Just opposite to it Chickpeas area increased to 6.65 lakh acres, up by 70 percent from last year.
- As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018. The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However. it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- The current 2017-18 season for pulses in Black Sea Region is coming to an end now. Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first

- ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.
