

Pulses Domestic Fundamentals:

- **All India kharif sowing is lagging behind by 24.42% to 5.91 lakh ha as on 22nd June-2018.** Farmers had planted 7.82 lakh ha last year till date. Tur and Urad sowing is running behind by 44.81 & 42.36 % so far. For details see table given below.
- **India has revised import duty on Chana from 60 to 70% plus surcharge** for US origin Chickpeas. It has also revised import duty on lentil from 30% to 40% plus surcharge for US origin lentil. It will be applicable from 4th August-2018. Import duty will remain same for other origins as was applicable before this hike.
- **Closure of Mandis in MP has affected trading activities completely. Mandi would remain closed till Saturday.** Traders are opposing e-auctions and additional octroy/taxes. Some trading activities have been reported from Bhopal.
- **Gujarat , MP and Uttar Pradesh are waiting for monsoon rains. Kharif pulses** sowing has been affected. IMD department expect monsoon to revive again by the end of the week.
- **Indian importers imported total 114244.86 MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May. Even Tur import increased by 280 % from 4958.77 MT to 18821.66 MT in May. Even moong import increased by 9.29% to 829 MT. However, import of other pulses declined in comparison to April. Chana import declined from 2209.55 to 1266.23 MT. Lentil import decreased from 2659.33 to 1703.9 MT during the same period. Urad import declined by 7.35 % from 3931.62 to 3642.52 MT. Even yellow peas import declined by 18.01 % from 87889.81 MT to 72062.99 MT. Kidneybean import declined by 30.15 % from 12823.5 to 8957.42 MT. India had imported 117909.73 MT in April. Import flow is likely to decline further in coming weeks.
- **Nafed has procured around 25.81 lakh tonne chana as on 16th June-2018. It procured** around 15.91 lakh tonne in MP, 4.75 lakh tonne in Rajasthan, 1.27 lakh tonne in Karnataka, Maharashtra 1.71 lakh tonne, 0.5 lakh tonne in Telangana, 0.77 lakh tonne in AP, 0.87 lakh tonne in Gujarat, 0.05 lakh tonne in Uttar Pradesh. Procurement is almost over now. Selling from central pool stock is expected August onward. As there is plenty of stock in central pool, govt. stock would not allow chana to beyond a certain level. Market is expected to stabilize near Rs 3900 to 4100 per qtl.
- **Kharif pulses sowing area is lagging behind by 9.8 % to 2.53 lakh ha against 2.79 lakh ha last year as on 15th June-2018.** Tur & Kulthi area is running ahead by 13.10 and 113.33 % to 0.51 & 0.16 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 2.26 lakh ha for kulthi. Sowing pace has got delayed by lack of rains in many growing states. Fresh showers of rains are expected from next week again.
- **Urad kharif area too is lagging behind by 29.10 % to 0.47 lakh ha against 0.67 lakh ha last year till date.** Normal kharif Urad area is 26.99 lakh ha. Farmers preliminary sowing intention shows that some Urad area might be shifted to other lucrative crops like Soybean, Groundnut and Chili. Even kharif Moong area is running behind by 7.59 % to 0.69 lakh ha so far. Normal area under moong is 24.92 lakh ha. As farmers have received better price for moong in comparison to other pulses, any major decline in area is unlikely. Production size would depend on rains in growing regions.
- **All round demand at lower level from mills Tur in Mumbai drove Tur price up by Rs 100 to Rs 3650 per qtl.** Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- **Import of urad seems under parity amid ample availability of domestic stock. There is no short supply of Urad in domestic market.** SQ urad may move up as there is good demand for it. In comparison to producing region Urad is trading lower by Rs 200 in Delhi market. So buyers are active in Delhi. Besides, there is no stock in mills and stockists too have sold out 75 to 80 % stock due to liquidity crunch. It would push up urad price by Rs 200 from current level this week. However, stake holders should sell Urad at higher level as ample stock is available in domestic market.
- **Around 35000 MT yellow peas has touched Indian ports. Out of total 15000 has been reported from Tuticorin port and 20,000 MT from Hazira port.** Besides, around 30,000 MT is expected to reach Mumbai by 22nd June-2018. It would restrict pea market to move further up as supply side would ease.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est released on 16th May-2018 for 2017-18 season.** It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- **Lentil markets were traded steady in dull buying interest during the past week.** Seeding of the North American crop is now complete, with many areas reporting improvements in soil moisture conditions on account of recent rainfall events. Markets continue to doubt that farmers planted as many lentils as intended in Canada, with expectations high that the coming June 29 seeded area estimate will show a bigger drop in area than the current official forecast.
- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in** bulk importers countries remains bleak. France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded** well below average. However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crops sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to** decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops.
- **The United states Farmers have covered lower area under pulses in 2018** as compare to 2017 . As per latest update released by the USA Dried pea and Lentil council, return of average field is still more than previous year. Among major pulses crop in US area under pea has been pegged at 9.08 and lentil at 7.91 lakh acres, In comparison to last year both pulses area coverage is down by 11 lakh acres. Just opposite to it Chickpeas area increased to 6.65 lakh acres, up by 70 percent from last year.
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne** pea in April-2018. The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped** in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this May has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first

ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.

- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Comparative Import fig during Mar, Apr & May-2018 in India with Average CiF:
