

Pulses Domestic Fundamentals:

- **In a latest development Indian govt has imposed 70% duty on US origin Chana last week.** However, its impact would be negligible as volume imported from US is very small in nature. Even import from Australia at 60 % duty is not feasible at this point of time. Pressure on cash market continues as demand from bulk users remains restricted. There is plenty of stock available in domestic market besides massive stocking by Nafed for central pool. It would not allow market to move up beyond a certain level.
- **Nafed has procured around 2673318.29 MT chana as on 21st June-2018.** The highest procurement was registered in MP, where around 15.91 lakh tonne has been procured. Rajasthan has contributed around 5.22 lakh tonne, Maharashtra 1.94 lakh tonne, Karnataka around 1.27 lakh tonne, AP 0.91 lakh tonne, Telangana 0.50 lakh tonne and Gujarat around 0.89 lakh tonne so far. UP has contributed 6665 MT so far.
- **Demand for red lentil and dal got affected by cheaper availability of Tur and Chana dal.** Consumers are shifting from lentil to tur dal. Millers have restricted buying as they are unable to execute normal sales. Supply side is higher so far against subdued demand. Illegal import from Nepal at cheaper price too is impacting market sentiments. It would continue to affect cash market in the near to medium term.
- **Australian red lentils malka dal weekly average price traded down by 2.23% to Rs 7004 per qtl** during the week under review. Red Lentils Malka split dal weekly average price too traded down by 2.17 % to Rs 7141 per qtl. Market is likely to trade steady to slightly weak in the near term. Stock at port is said to be around 1 lakh tonne.
- **All India Pulses Kharif pulses sowing area is lagging by 24.42 % to 5.91 lakh ha** against 7.82 lakh ha last year as on 22nd June-2018. Tur & Moong area is running behind by 44.81 and 1.46 % to 1.70 & 2.02 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 24.93 lakh ha for Moong. Urad area too is running behind by 42.36 to 0.83 lakh ha so far. Sowing pace has been delayed by lack of rains in many growing states. Fresh showers of rains are expected from this week as monsoon revives again. See details in table below at page no -12: Kharif sowing activities are expected to improve with good rainfall in Gujarat, Maharashtra & South India. It is likely to move towards north and central India soon.
- **India has revised import duty on Chana from 60 to 70% plus surcharge** for US origin Chickpeas. It has also revised import duty on lentil from 30% to 40% plus surcharge for US origin lentil. It will be applicable from 4th August-2018. Import duty will remain same for other origins as was applicable before this hike.
- **Indian importers imported total 114244.86 MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May. Even Tur import increased by 280 % from 4958.77 MT to 18821.66 MT in May. Even moong import increased by 9.29% to 829 MT. However, import of other pulses declined in comparison to April. Chana import declined from 2209.55 to 1266.23 MT. Lentil import decreased from 2659.33 to 1703.9 MT during the same period. Urad import declined by 7.35 % from 3931.62 to 3642.52 MT. Even yellow peas import declined by 18.01 % from 87889.81 MT to 72062.99 MT. Kidney bean import declined by 30.15 % from 12823.5 to 8957.42 MT. India had imported 117909.73 MT in April. Import flow is likely to decline further in coming weeks.
- **All round demand at lower level from mills Tur in Mumbai drove Tur price up by Rs 100 to Rs 3650 per qtl.** Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- **Import of urad seems under parity amid ample availability of domestic stock.** There is no short supply of Urad in domestic market. SQ urad may move up as there is good demand for it. In comparison to producing region Urad is trading lower by Rs 200 in Delhi market. So buyers are active in Delhi. Besides, there is no stock in mills and stockists too have sold out 75 to 80 % stock due to liquidity crunch. It would push up urad price by Rs 200 from current level this week. However, stake holders should sell Urad at higher level as ample stock is available in domestic market.
- **Around 35000 MT yellow peas has touched Indian ports.** Out of total 15000 has been reported from Tuticorin port and 20,000 MT from Hazira port. Besides, around 30,000 MT is expected to reach Mumbai by 22nd June-2018. It would restrict pea market to move further up as supply side would ease.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est** released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- **Global chickpeas markets ended with a mixed note last week, with processors and exporters of medium caliber kabuli product adopting a more aggressive attitude in new crop shipping positions.** Markets participants in Canada and the United States are increasingly worried about the yield potential of this year's crop, and concerned the seeded area reports due at the end of the month could show a bigger than intended increase in seeded area-says media sources.
- **Farmers in Canada said they intended to boost land in the crop from 209,000 to 346,000 acres, while growers in the United States indicated area would climb from 623,000 to almost 669,000 acres.**
- **North American lentil markets were little changed, despite reports of improved export demand for large green product.** Markets remain more focused on the Statistics Canada seeded area report. Due for release on June 29, many market participants expect it to show a steeper than intended drop in actual plantings. At the end of March, growers said they would only reduce seeded area from 4.4 million to just over four million acres. Markets were expecting a steeper drop to around 3.5 million acres because of relatively poor prices and movement for red lentils- as per latest media sources.
- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak.** France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded well below average.** However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crop sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne.** The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops.
- **The United states Farmers have covered lower area under pulses in 2018** as compare to 2017 . As per latest update released by the USA Dried pea and Lentil council, return of average field is still more than previous year. Among major pulses crop in US area under pea has been pegged at 9.08 and lentil at 7.91 lakh acres, In comparison to last year both pulses area coverage is down by 11 lakh acres .Just opposite to it Chickpeas area increased to 6.65 lakh acres, up by 70 percent from last year.
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.

- **Canada exported 36,600 MT lentil in April-2018,It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017.It is also higher than March shipment(17,900MT).B,desh and US were major buyers for lentil in April-2018.However,total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17.This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade range bound.

Comparative Import fig during Mar,Apr & May-2018 in India with Average CiF:
