

Pulses Domestic Fundamentals:

- **All India Pulses Kharif pulses sowing area is lagging by 41.07 % to 10.72 lakh ha** against 18.18 lakh ha last year as on 29th June-2018. Tur & Moong area is running behind by 18.62 and 53.44 % to 4.74 & 3.06 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 24.93 lakh ha for Moong. Urad area too is running behind by 37.64 to 1.25 lakh ha so far. Revival of monsoon and recent rains in major growing belts has increased sowing activities once again and coverage area is likely to improve in coming weeks. See details in table below at page no -12:
- **Food ministry is gearing up to distribute dals at highly subsidized rate in 201 backward districts** through ration shops. As per market updates there is over 4 million tonne pulses in govt.'s godowns and it has been procured at MSP. As prevailing price in market is much lower than MSP, govt. is considering option to consume it to 201 most backward districts. If it is sold at prevailing market price, huge loss is inevitable.
- **Problem of plenty is not only affecting govt.'s revenue, traders too are incurring heavy losses.** Buyers are unwilling to buy as pressure on market continues. Market is well aware of the fact that govt has to sell huge stock in domestic market and it will pressurize market further. Export option is not working due to disparity even after 7% export incentives.
- **There is a difference of opinion between the Commission of Economic Affairs & Nitti Ayog over SMP** for kharif crops. Govt. wants to ensure 1.5 times price for farmers from actual production costing while other see it as influencing inflation. Govt has to do it for every crops. The Policy Commission said that this is not a good step because the Prime Minister has promised so it is his compulsion to give 50% benefit.
- **Good rainfall in major growing states has ensured better sowing activities in MP, Rajasthan, UP, Bihar. Maharashtra, Gujarat, Odisha & eastern states.** It may cover early sowing area loss in coming weeks.
- **Demand for red lentil and dal got affected by cheaper availability of Tur and Chana dal.** Consumers are shifting from lentil to tur dal. Millers have restricted buying as they are unable to execute normal sales. Supply side is higher so far against subdued demand. Illegal import from Nepal at cheaper price too is impacting market sentiments. It would continue to affect cash market in the near to medium term.
- **India has revised import duty on Chana from 60 to 70% plus surcharge** for US origin Chickpeas. It has also revised import duty on lentil from 30% to 40% plus surcharge for US origin lentil. It will be applicable from 4th August-2018. Import duty will remain same for other origins as was applicable before this hike.
- **Indian importers imported total 114244.86 MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May. Even Tur import increased by 280 % from 4958.77 MT to 18821.66 MT in May. Even moong import increased by 9.29% to 829 MT. However, import of other pulses declined in comparison to April. Chana import declined from 2209.55 to 1266.23 MT. Lentil import decreased from 2659.33 to 1703.9 MT during the same period. Urad import declined by 7.35 % from 3931.62 to 3642.52 MT. Even yellow peas import declined by 18.01 % from 87889.81 MT to 72062.99 MT. Kidneybean import declined by 30.15 % from 12823.5 to 8957.42 MT. India had imported 117909.73 MT in April. Import flow is likely to decline further in coming weeks.
- **All round demand at lower level from mills Tur in Mumbai drove Tur price up by Rs 100 to Rs 3650 per qtl.** Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est released on 16th May-2018 for 2017-18 season.** It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- **The latest release of The Canadian Grain Commission hints that Canada exported around 19600MT lentils through licensed facilities in May-2018.** It was lower than 83,900MT shipped in May-2017. It is 17000MT lower than April. Canada had exported 36600MT in April-2018. Total export in this marketing year was registered at 254,800 MT against 784,600MT during the same time last year. Demand remains unexpectedly at lower level.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018.** Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **Farmers in Canada said they intended to boost land in the crop from 209,000 to 346,000 acres,** while growers in the United States indicated area would climb from 623,000 to almost 669,000 acres.
- **North American lentil markets were little changed, despite reports of improved export demand for large green product.** Markets remain more focused on the Statistics Canada seeded area report. Due for release on June 29, many market participants expect it to show a steeper than intended drop in actual plantings. At the end of March, growers said they would only reduce seeded area from 4.4 million to just over four million acres. Markets were expecting a steeper drop to around 3.5 million acres because of relatively poor prices and movement for red lentils- as per latest media sources.
- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak.** France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **The winter crop season 2018-19 started with mixed note. Autumn rainfall was recorded well below average.** However, timely rainfall in May in most parts of growing region in Australia helped timely commencement of winter crop sowing. However, Queensland & northern New South Wales were comparatively drier where normal planting progress got affected. Winter rainfall is likely to be around average in cropping regions in Western Australia but below average in most other cropping regions.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne.** The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse

Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade range bound.

Comparative Import fig during Mar,Apr & May-2018 in India with Average CiF:
