Pulses Domestic Fundamentals:

- Pulses cash market traded almost steady to slightly firm as buyers in mandis remain active. Some downward correction is expected this week. Lower area coverage and higher MSP have given support to cash market in the short to medium term.Govt.'s selling strategy would impact pulses cash market as there is massive stock in govt.'s custody and there is a fear in the market that govt. would start releasing it before new kharif crop hits the market. Flooding/excess rains in some states and lower rains in some particular region have affected normal sowing activities. Next two weeks remain very crucial for kharif sowing.
- All India kharif Pulses area is lagging behind by 19.36 % to 33.60 against41.67 lakh ha last year as on 6th July 2018.Farmers have covered 13.30 lakh ha against 16.63 last year under Tur till date, lower by 20.02 %. Normal area under Tur is 41.90 lakh ha. Even Urad area is lagging behind by 18.45 % to 7.38 against 9.05 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running behind by 15.57 % to 9.84 lakh ha against 11.66 lakh ha last year. Normal area under Moong is 24.93 lakh ha. other pulses area too is lower than last year. farmers have covered 36.40 % lower area so far.It is 2.63 against 4.14 lakh ha so far against normal of 15.83 lakh ha. However, area under Kulthi has increased by 125 % to 0.45 lakh ha against normal of 2.27 lakh ha.
- Tur market is expected to improve from current level by Rs 300 to 400 per qtl in coming weeks. Higher MSP for new crop, lower all India area coverage by 25 to 30% and increasing intention of retaining stock by stockists amid slower pace of release from central pool stock are likely to support Tur market in weeks ahead. Stock in private hands is said to be decreased by 50 % from normal. It would continue to lend support to cash market. Maximum stock is in central pool and restricted release seems favorable for Tur market.Tur in Gulberga market is up by Rs100 to Rs3700 -Rs4100 per qtl.
- Urad market moved up by Rs 100 to Rs 4100-4300 per qtl in Chennai. Good demand amid higher MSP may push market further up by Rs 200/300 from current level. Lower area coverage would remain supportive. As loading is under process in Burma and is expected to hit Indian market by 20 to 24th July, firmness may be contained at higher level. However, in continuation of good demand in domestic market would restrict downward correction. Urad market is expected to stabilize at Rs 4400/4600 per qtl.SQ may trade at Rs 5400 in the near term.
- Moong market too may trade up as retention would increase due to higher MSP for new kharif crop. It may touch MSP level soon. However, higher availability in govt.'s custody and new crop expected to hit market by August end may restrict uptrend in the market. Area under moong is expected to increase by 30 % and it will add surplus. Overall scenario for moong in the short term seems firm. In Jaipur market moong traded at Rs 5200-5300 per qtl. Millers are active at this price right now.
- Chana market may move up by Rs 300 to 400 from current level as millers are active to buy. There is a common perception in the market that govt would increase MSP for Chana by 50 % of its production cost(Rs 3250 per qtl.If basis for increase is applied like kharif pulses, MSP for chana may be declared at Rs4825 for the new crop. Besides, maximum stock is in govt.'s custody and govt would not release it before sept. It would push market up.
- Even lentil and peas prices are expected to move up getting support from other pulses.Lentil import at 30 % duty from Canada/Australia & at40% from US origin would make it costly. Marketable surplus in domestic market is expected to come down by August end. Besides,likely higher MSP for new crop(50% higher than production cost) in October would support market. Lentil and pea price may move up by 200 to 300 from current level.
- India has revised import duty on Chana from 60 to 70% plus surcharge for US origin Chickpeas. It has also revised import duty on lentil from 30% to 40% plus surcharge for US origin lentil. It will be applicable from 4th August-2018.Import duty will remain same for other origins as was applicable before this hike.
- Indian importers imported total114244.86MT pulses in May-2018, lower by3.11 % from previous month. The latest import data shows that green peas import increased by158 % to6961.54 MT in May. Even Tur import increased by280 % from4958.77 MT to18821.66 MT in May. Even moong import increased by9.29% to829MT. However, import of other pulses declined in comparison to April. Chana import declined from2209.55 to 1266.23 MT. Lentil import decreased from2659.33 to1703.9 MT during the same period. Urad import declined by7.35 % from3931.62 to3642.52 MT. Even yellow peas import declined by 18.01 % from87889.81 MT to72062.99MT. Kidneybean import declined by30.15 % from12823.5 to 8957.42MT. India had imported 117909.73 MT in April. Import flow is likely to decline further in coming weeks.

• **DES has revised pulses production estimates from23.95 to 24.51MMT in the** 3rd Adv.Est released on16th May-2018 for 2017-18 season.It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4million acres in 2018.Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- Chickpeas area in Canada & US has been registered higher than previous intention. US farmers have planted6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018.Data does not include containers export. The exported volume is higher by85% from2.01lakh MT exported in May-2017.It is almost double from exported volume of1.77 lakh MT in April-2018.India imported around 30,000 MT from Canada in May-2018.
- Farmers in Canada said they intended to boost land in the crop from 209,000 to 346,000 acres, while growers in the United States indicated area would climb from 623,000 to almost 669,000 acres.
- Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak. France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year. Production is expected to decline by 17.20 lakh tonne to3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to .1.85 lakh ha.Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19.Australia Chickpeas area is expected to decrease by 52.69% to5.28 lakh ha(last year11.16 lakh ha) in 2018-19.Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19.Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..
- As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018. The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However. it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment(17,900MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.
