### Pulses International Fundamental:

- **Trading activities in global lentil market remains restricted. Asking price for spot market** was seen on line with new crop. Market participants were seen attending Canada Special Crops Association annual meeting in Regina. As summer holiday is on no major activities are expected this week. Higher temperature in growing belt still remains a cause of concern .It may impact yield potential. Despite this concern crop condition is said to be good so far.
- **Global Chickpeas demand-supply scenario seems balanced right now, barring India. Total marketable surplus** is around 6 lakh tonne including Australian new estimated crop size of 4.5 lakh tonne. Against it demand is around 5.25 lakh tonne in next 9 to 12 months including 2 lakh tonne demand from Pakistan. This means availability is Only 0.75 lakh tonne higher than projected demand. Situation may be changed if India starts importing from Burma & Tanzania without duty. Marketable surplus in both countries is said to be around 1 lakh tonne. Prices of Chana in India have started firming up and at current prices it comes to around \$510-515 per tonne. If prices moves up further, Indian importers can start importing from Burma and Myanmar .It would push up global chickpeas price in coming months.
- **Peas demand from France has increased from European union.It has lent much needed support to pea market in France.** However, import volume from France in May was registered at 17,910 MT, lower by 7% to 19310 MT loaded in April. France had exported 9490 MT in May last year. France has exported total 268,720 MT peas so far in the season. Belgium brought around 12,300 MT, Netherland brought 2015 MT and Spain purchased around 1925 MT.
- **Global Chickpeas market traded almost mixed while gap between large and medium caliber** has started increasing. Even growers bids have been on decrease from May-2018. US farmers bids decreased by 26 % to \$705 MT. In Canada it decreased by 19% to \$490 in last two months. recovery is expected at current level.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT. Agri experts expected it to be 4.05 million acres.** Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea** through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne** this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea** in April-2018. The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped** in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for

lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.

- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

**Weekly Outlook:** -Pulses are likely to trade firm.
