

Pulses Domestic Fundamentals:

- **Chana market traded lower due to stockists selling at higher level.** With decreased release from stockists pressure in market is expected to ease once again. This week market may move up by Rs 100 to Rs150 from current level. In August market may face pressure once again as firmness would encourage small stockists to release stock. August onward govt may start releasing stock from its godowns. So it is good to sell around mid-August above Rs4600-4700. Chana traded at Rs 4500 in Delhi market amid 15-20 motors arrival.
- **Tur price is unlikely to decline from current level despite continuous selling by govt.'s agencies** and ample stock available in private hands. Area under Tur is bound to decline this year and production would be in the range of 31 to 35 lakh tonne. Import remains restricted. Around 50 % old stock is said to be sold out. So there is a chance for improvement at this level. Govt would procure new crop at Rs5650 and it would remain supportive to cash market. Dal demand is likely to improve due to festive season. Overall tone remains firm.
- **Urad market too improved slightly and it traded in the range of Rs5350-3650 in Mumbai and Rs 4100-4200 in Chennai.** Import continues in restricted quantity. Stockists are active and area is expected to decline this year by 10 to 12 %. Besides, govt would buy Urad at Rs5600. It would not allow market to decrease from current level. Market is expected to move in the range of Rs3500 to Rs 4000 in Mumbai and Rs 4000 to Rs4500 in Chennai.
- **Moong market traded slightly up and stayed steady around Rs 5300 in jaipur market.** Despite higher MSP market is unlikely to move up from current level as there is sufficient stock in private as well as govt.'s hands. Kharif Moong area has improved and will continue to improve. This means higher production this year too. However, govt would buy moong at MSP of Rs 6975, so market is unlikely to move lower. Normal trade might be seen in weeks ahead. It may trade in the range of Rs5000 to Rs5600 at various centers.
- **Masur may trade firm as stock in Canada have come down while area have declined this year.** Crop condition is good so far. As dependency of import would continue, Indian market is bound to go up further by Rs 300 to Rs400. Stake holders should buy on dip. Stockists are unwilling to sell at current level and it may push lentil price up in coming weeks. Govt would start releasing stock from August end and it would cap uptrend beyond a certain level.
- **FCI has offered 31084.46MT Tur for e-auction today and e-auction from Khari 2016-17 stock** would continue till stock ends. The highest quantity was offered for sale in Karnataka at 8 centers. The quantity in question is 12058.60MT. In Maharashtra total 10051.63 MT has been offered at 9 centers by FCI. In south Indian states Telangana (FCI) has offered 8330.29 MT while AP FCI has offered 530.32MT Tur for auction. The lowest quantity (114.15MT) was offered in MP. Actually, FCI and other state agencies are trying to lighten its stock as soon as possible. New crop starts hitting the market from mid Nov.
- **India imported total 484248MT pulses from March to June-2018.** Out of total Chickpea import was registered at 14742.3MT, Tur 45963.6MT, Green peas 28361.3MT, Lentil 19544.5MT, Black Mapte 18330.7MT, Moong 8464.04MT, yellow pea 318726MT, Kidneybean 33715.9MT. Chickpea import increased by 141.21% to 3054.22 MT from May-2018. However, Tur import decreased by 36.72% to 11910.1 MT in June. Green Peas import increased by 22.45 % to 8524.17 MT, lentil import increased by 598.87% to 19544.5 MT in June. Even Urad import increased by 112.39% to 7736.39MT. Moong import decreased by 3.52% to 799.85MT during the same period. Yellow pea import increased from 72063MT in May to 128719MT in June. It increased by 78.62% in June. However, Kidney bean import decreased by 30.81% to 6197.42MT. Overall import flow is considerably lower than last year.
- **Export incentive Of 7 % for pulses and dal has been extended up to 20th Sept-2018.** It has been extended from June to Sept. If prices of chana in global market would move up, export volume for chana may increase. Exporters may be active once again.
- **Indian importers imported total 114244.86MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May.
- **DES has revised pulses production estimates from 23.95 to 24.51MMT in the 3rd Adv. Est** released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- **Trading activities in global lentil market remains restricted.** Asking price for spot market was seen on line with new crop. Market participants were seen attending Canada Special Crops Association annual meeting in Regina. As summer holiday is on no major activities are expected this week. Higher temperature in growing belt still remains a cause of concern .It may impact yield potential. Despite this concern crop condition is said to be good so far.
- **Global Chickpeas demand-supply scenario seems balanced right now, barring India.** Total marketable surplus is around 6 lakh tonne including Australian new estimated crop size of 4.5 lakh tonne. Against it demand is around 5.25 lakh tonne in next 9 to 12 months including 2 lakh tonne demand from Pakistan. This means availability is Only 0.75 lakh tonne higher than projected demand. Situation may be changed if India starts importing from Burma & Tanzania without duty. Marketable surplus in both countries is said to be around 1 lakh tonne. Prices of Chana in India have started firming up and at current prices it comes to around \$510-515 per tonne. If prices moves up further, Indian importers can start importing from Burma and Myanmar .It would push up global chickpeas price in coming months.
- **Peas demand from France has increased from European union.**It has lent much needed support to pea market in France. However, import volume from France in May was registered at 17,910 MT, lower by 7% to 19310 MT loaded in April. France had exported 9490 MT in May last year. France has exported total 268,720MT peas so far in the season. Belgium brought around 12,300 MT, Netherland brought 2015 MT and Spain purchased around 1925 MT.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4million acres in 2018.Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.**US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018.**Data does not include containers export. The exported volume is higher by 85% from 2.01lakh MT exported in May-2017.It is almost double from exported volume of 1.77 lakh MT in April-2018.India imported around 30,000 MT from Canada in May-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to .1.85 lakh ha.Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19.Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha(last year 11.16 lakh ha) in 2018-19.Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19.**Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne.The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.**The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017,higher by 57 % from export in April-2018.However.it is quite higher from march shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018,It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017.It is also higher than March shipment(17,900MT).B,desh and US were major buyers for lentil in April-2018.However,total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions

they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade firm.
