

Pulses Domestic Fundamentals:

- **Chana Rajasthan line traded at Rs4525 and MP line at Rs 4450 in Delhi market. Arrival was reported at 12to15 motors.** In Rajkot Chana kanta traded at Rs3850-3900 and arrival was recorded at 1800 bags. There is good buying interest for dal and market is expected to get firmer in coming days in normal condition. If Nafed start releasing stock from central pool, market may see downward correction. Selling schedule by Nafed is yet to decide despite green signal from central govt to sell.
- **Tur market traded steady at Rs 3850-3900 in Gulberga market. There is good demand for dal** and market is expected to stay steady to slightly firm despite continuous selling from central pool stock. Area coverage is lagging behind by 4.4% so far, however it is higher than normal till date. Cash market is expected to trade steady to slightly firm. Burma is offer in new and old Tur at \$380 per tonne.
- **Urad market trades steady and is being traded at Rs 3800-4100 in Chennai market. Demand is normal.** Selling from govt.'s stock has put a cap on uptrend despite lower area coverage. There is ample stock available in cash as well as central pool. So any major upward momentum in the near term is unlikely. Burma is offering Urad at \$320 and SQ at \$465 per tonne basis Indian port.
- **There is good demand for moong in cash market. Buyers are active while sellers are unwilling** to sale at current level. Supply and demand side seems balanced right now and it is keeping price at higher level, near last year's MSP. Area under moong is expected to increase as MSP for kharif has been increased from Rs5575 to Rs6975 per qtl. Range bound movement is expected in cash moong market in the near term.
- **Lentil market may trade steady to slightly weak this week. Domestic demand for dal may support market to a certain extent.** Uptrend in Masur market is unlikely to continue despite lower availability of imported stock in Kolkata and Mumbai. It would not allow market to go unexpectedly down. However, market should not ignore huge stock (243450.18MT) in central pool procured during the season. Other price limiting factor is lower price for Tur and it is directly affecting Masur dal consumers right now. Tur dal is still available at Rs55-60 per kg against 50 to 55 per kg for Masur. So consumers have option to shift from Masur to Tur. Govt. agencies have around 10 lakh tonne Tur stock and they would start liquidating it before Nov when new crop hits the market. It would pressurize lentil price in the months ahead.
- **All India kharif Pulses area is lagging behind by 8.73 % to 103.35 against 113.24 lakh ha** last year as on 27th July 2018. Farmers have covered 35.05 lakh ha against 36.66 last year under Tur till date, lower by 4.40 %. Normal area under Tur is 41.90 lakh ha. Even Urad area is lagging behind by 16.08 % to 29.51 against 35.17 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 3.69 % to 27.45 lakh ha against 26.47 lakh ha last year. Normal area under Moong is 24.93 lakh ha. other pulses area too is lower by 26.49% than last year .It is 10.71 against 14.57 lakh ha so far against normal of 15.83 lakh ha. However, area under Kulthi has increased by 71.39 % to 0.63 lakh ha against normal of 2.27 lakh ha. See table in 3rd page.
- **India imported total 484248MT pulses from March to June-2018.** Out of total Chickpea import was registered at 14742.3MT, Tur 45963.6MT, Green peas 28361.3MT, Lentil 19544.5MT, Black Mapte 18330.7MT, Moong 8464.04MT, yellow pea 318726MT, Kidneybean 33715.9MT. Chickpea import increased by 141.21% to 3054.22 MT from May-2018. However, Tur import decreased by 36.72% to 11910.1 MT in June. Green Peas import increased by 22.45 % to 8524.17 MT, lentil import increased by 598.87% to 19544.5 MT in June. Even Urad import increased by 112.39% to 7736.39MT. Moong import decreased by 3.52% to 799.85MT during the same period. Yellow pea import increased from 72063MT in May to 128719MT in June. It increased by 78.62% in June. However, Kidney bean import decreased by 30.81% to 6197.42MT. Over all import flow is considerably lower than last year.
- **Export incentive Of 7 % for pulses and dal has been extended up to 20th Sept-2018.** It has been extended from June to Sept. If prices of chana in global market would move up, export volume for chana may increase. Exporters may be active once again.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est** released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.

Pulses International Fundamental:

- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **The Canadian Grain Commission latest update shows that Canada has 29,800 metric tons lentils** through licensed facilities in June against 68,600 MT were shipped the same month last year, while movement is up from the 19,600 MT shipped the previous month. Thus total export for the current marketing year touched to 284,600 MT against 853,100 MT during the same period last season.
- **Masur Crop condition in Canada is said to be good so far. the latest update shows that 55% Masur crop is in good condition** while 28% is in fair condition and 9% is said to be in bad condition. Harvesting of masur early sown crop may start from 2nd week of August. Canada has huge old stock of Masur (around 18-20 lakh tonne) and India being out of market, Canadian exporters may seek other buyers to consume its surplus stock. It may pressurize global masur market to some extent in coming weeks.
- **Global Chickpeas demand-supply scenario seems balanced right now, barring India.** Total marketable surplus is around 6 lakh tonne including Australian new estimated crop size of 4.5 lakh tonne. Against it demand is around 5.25 lakh tonne in next 9 to 12 months including 2 lakh tonne demand from Pakistan. This means availability is Only 0.75 lakh tonne higher than projected demand. Situation may be changed if India starts importing from Burma & Tanzania without duty. Marketable surplus in both countries is said to be around 1 lakh tonne. Prices of Chana in India have started firming up and at current prices it comes to around \$510-515 per tonne. If prices moves up further, Indian importers can start importing from Burma and Myanmar. It would push up global chickpeas price in coming months.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea** through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.
- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne** this year against last year around 10 lakh tonne. The area planted to chickpeas is forecast to fall by 52 per cent in 2018-19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..

- **Canada exported 36,600 MT lentil in April-2018,It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017.It is also higher than March shipment(17,900MT).B,desh and US were major buyers for lentil in April-2018.However,total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.
