

Pulses Domestic Fundamentals:

Today's Update:

- **All India kharif Pulses area is lagging behind by 3.91 % to 115.57 against 120.27 lakh ha** last year as on 03rd Aug 2018. Farmers have covered 39.89 lakh ha against 39.38 last year under Tur till date, up by 1.30 %. Normal area under Tur is 41.90 lakh ha. Even Urad area is lagging behind by 11.28 % to 32.51 against 36.65 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 2.53 % to 29.79 lakh ha against 29.05 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is lower by 14.03% than last year. It is 12.74 against 14.82 lakh ha so far against normal of 15.83 lakh ha. However, area under Kulthi has increased by 71.08 % to 0.63 lakh ha against normal of 2.27 lakh ha. See table on 3rd page.
- **Mayanmar offered lemon tur (new & old) at \$ 370 per tonne. Basis Indian port. Linkly too is being offered at \$370 per tonne**, down by \$10 , urad FAQ was offered down by \$5 to \$310 and SQ at \$445 basis Indian port. Chana v2 Kabuli was offered at \$620 per tonne and Hollan at \$655 per tonne. Moong Pakaku was offered at \$680 per tonne. Red Rajma was quoted at \$1120 per MT.

Previous Update:

- Govt. has assured trades association in a meeting of GST council that 12 & 18 % slab may be replaced in one slab of 14-15% soon.
- *Nafed seems not in a hurry to sell chana immediately. Total stock in central pool under govt. custody is said to be around 27.5 to 28 lakh tonne. Nafed may start selling chana from end Aug-Sep. As six months is left for consumption and stock in private hands is 50 to 60% lower than normal years, Nafed selling would not impact market much. Experts expect Nafed selling would start above MSP in restricted way. Arrival in Mandis has decreased to a negligible level and demand for dal is improving. It may remain supportive for Chana market in coming weeks. Govt may retain 10 lakh tonne chana for buffer. So 17 to 18 lakh tonne might be sold in next six months. So pressure is unlikely to be felt on cash market.*
- *MP state govt. has provided a much awaited respite to local dal millers. It has waived mandi tax of 2.25% on pulses coming from neighboring states. It will be applicable only for millers. There is no waiver for traders. Dal millers have welcomed the decision. It would help them to cut end product costing.*
- *Moong market may trade steady to slightly firm as stock holding is said to be increased. Higher MSP for new kharif crop has encouraged trades/stockists to restrict selling as they are aware of the fact that govt would buy 25 to 30 % moong on MSP and it would push up price in cash market despite expectation of higher acreage under kharif moong this year.*
- *Burma offered lemon tur new & old at \$380 per tonne basis Indian port. Linkely was offered at \$390 per tonne. Urad FAQ was offered at \$315 and SQ at \$ 455 per tonne basis Indian port. Chana kabuli was offered at \$620 per tonne, Hollan at \$655 basis Indian port. Moong Pakaku was offered at \$680 and Chana at \$618 per tonne. Prices have improved slightly this week.*
- **Lentil market may trade steady to slightly weak this week. Domestic demand for dal may support market to a certain extent.** Uptrend in Masur market is unlikely to continue despite lower availability of imported stock in Kolkata and Mumbai. It would not allow market to go unexpectedly down. However, market should not ignore huge stock (243450.18MT) in central pool procured during the season. Other price limiting factor is lower price for Tur and it is directly affecting Masur dal consumers right now. Tur dal is still available at Rs55-60 per kg against 50 to 55 per kg for Masur. So consumers have option to shift from Masur to Tur. Govt. agencies have around 10 lakh tonne Tur stock and they would start liquidating it before Nov when new crop hits the market. It would pressurize lentil price in the months ahead.
- **India imported total 484248MT pulses from March to June-2018. Out of total Chickpea import was registered at 14742.3MT, Tur 45963.6MT, Green peas 28361.3MT, Lentil 19544.5MT, Black Mapte 18330.7MT, Moong 8464.04MT, yellow pea 318726MT, Kidneybean 33715.9MT. Chickpea import increased by 141.21% to 3054.22 MT from May-2018. However, Tur import decreased by 36.72% to 11910.1 MT in June. Green Peas import increased by 22.45 % to 8524.17 MT, lentil import increased by 598.87% to 19544.5 MT in June. Even**

Urad import increased by 112.39% to 7736.39MT. Moong import decreased by 3.52% to 799.85MT during the same period. Yellow pea import increased from 72063MT in May to 128719MT in June. It increased by 78.62% in June. However, Kidney bean import decreased by 30.81% to 6197.42MT. Over all import flow is considerably lower than last year.

- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.**

Pulses International Fundamental:

- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **The Canadian Grain Commission latest update shows that Canada has 29,800 metric tons lentils** through licensed facilities in June against 68,600 MT were shipped the same month last year, while movement is up from the 19,600 MT shipped the previous month. Thus total export for the current marketing year touched to 284,600 MT against 853,100 MT during the same period last season.
- **Masur Crop condition in Canada is said to be good so far. The latest update shows that 55% Masur crop is in good condition while 28% is in fair condition and 9% is said to be in bad condition.** Harvesting of masur early sown crop may start from 2nd week of August. Canada has huge old stock of Masur (around 18-20 lakh tonne) and India being out of market, Canadian exporters may seek other buyers to consume its surplus stock. It may pressurize global masur market to some extent in coming weeks.
- **Global Chickpeas demand-supply scenario seems balanced right now, barring India.** Total marketable surplus is around 6 lakh tonne including Australian new estimated crop size of 4.5 lakh tonne. Against it demand is around 5.25 lakh tonne in next 9 to 12 months including 2 lakh tonne demand from Pakistan. This means availability is only 0.75 lakh tonne higher than projected demand. Situation may be changed if India starts importing from Burma & Tanzania without duty. Marketable surplus in both countries is said to be around 1 lakh tonne. Prices of Chana in India have started firming up and at current prices it comes to around \$510-515 per tonne. If prices move up further, Indian importers can start importing from Burma and Myanmar. It would push up global chickpeas price in coming months.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea** through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **Lentil area is bound to decline 23.51 % to 2.70 lakh ha against 3.53 lakh ha last year.** Production is expected to decline by 17.20 lakh tonne to 3.85 lakh tonne against 4.65 lakh tonne last year. Even pea area is expected to decline 2.22 lakh ha to 1.85 lakh ha. Pea production in Australia is expected to decline from 2.89 to 2.13 lakh tonne in 2018-19. Australia Chickpeas area is expected to decrease by 52.69% to 5.28 lakh ha (last year 11.16 lakh ha) in 2018-19. Production is bound to decline by 40.08 % to 6.16 lakh tonne against 10.28 lakh tonne last year.

- **Chickpeas area is expected to decrease by 53% to 5.28 lakh ha in 2018-19. Production is likely to decline 40 % to 6.16 lakh tonne this year against last year around 10 lakh tonne.** The area planted to chickpeas is forecast to fall by 52 per cent in 2018–19 to around 215,000 hectares. The fall reflects lower expected returns from chickpeas relative to cereal crops..
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Comparative Import fig during Feb to June-2018 in India with Average CiF:
