

### Pulses Domestic Fundamentals:

#### Today's Update:

- **Chana cash market is bound to trade firm in domestic market as chana stock available in central pool** would not be sold out in cash market. Govt would consume it through PDS and midday meal. Private trades are unlikely to sell chana at current level as they know that import from Australia is not possible due to increasing price and lower crop size (around 3.5 lakh tonne against 10.53 lakh tonne last year). Even Tanzanian crop is lower in size and prices are increasing continuously. Private trades have started exporting chana to Bangladesh and around 5000 MT have been brought by Bangladesh traders so far.
- **Market size of Bangladesh is around 2 lakh tonne and India can export around 75000 MT Chana** this year. Besides, there is an increasing possibility of export to Pakistan as new govt. may allow chana import from India. Besides, festival demand in domestic market may lend support to chana market. All these developments may push up chana price to Rs 5000 level soon. Exporters would not leave any stone unturned regarding export opportunity with 7% export incentive. In Delhi market chana traded at Rs 4450-4500 per qtl. Overall sentiments remain firm in the short to medium term.
- **Area under major kharif Pulses has crossed the level of 42 lakh ha so far as projected by Agriwatch.** As sowing is at final stage, any major recovery in Tur area is unlikely now. Farmers have covered around 43 lakh ha last year. This year almost same area coverage is likely despite fear of lower acreage. Actually higher MSP and good rainfall in growing belt have covered lower area coverage in last two weeks. So production is expected to be same as last year in normal condition. As demand in domestic market is likely to improve, Tur price is expected to move up from current level. Stock available in central pool would not come in physical market and govt would try to consume it through various welfare schemes. It would lend support to Tur market in coming weeks.

#### Previous Update:

- **Pulses will not be disposed of immediately as govt has decided to consume pulses stock** through state govt.'s various welfare schemes. It would not be sold for open market through auction. The burden of this stock has been shifted to all states and union territories, which they have to consume over the period of next twelve months under various running welfare programs. So supply of pulses would remain restricted for open market. State govt. has to utilize it. As maximum stock available in central pool is of Chana and Tur. So it would help market to recover from current level.
- **Rajasthan state govt has waived the tradition of renewal of license of dal industry** having investment lower than 5 crores regarding air pollution act. Now such pulses industries can get acknowledgement once under air act 1981 & water act 1974 from Rajya mandal. It would help dal industries in Rajasthan from unnecessary delay and documental procedure. All India dal mills association has welcomed this step.
- **Arrival of moong is below expectation in harda, Pipariya and other adjoining markets.** Lower arrival and millers improved interest lent support to moong cash market and it traded up by Rs 100-200 in Auction. MP govt has extended the procurement date to 20<sup>th</sup> Aug now under Bhavantar Yojna. Even farmers are unwilling to sell moong to private traders. As new MSP for moong is much higher than prevailing price, farmers would not sell entire quantity. It may support moong market at current level. There is a common view among farmers that they would sell moong at new MSP when govt would start procurement. All these developments would not allow moong market to dip more from current level. Stake holders should buy on dip.
- **Mayanmar offered lemon tur (new & old) at \$ 370 per tonne.** Basis Indian port. Linkly too is being offered at \$370 per tonne, down by \$10, urad FAQ was offered down by \$5 to \$310 and SQ at \$445 basis Indian port. Chana v2 Kabuli was offered at \$620 per tonne and Hollan at \$655 per tonne. Moong Pakaku was offered at \$680 per tonne. Red Rajma was quoted at \$1120 per MT.
- **Lentil market may trade steady to slightly weak this week.** Domestic demand for dal may support market to a certain extent. Uptrend in Masur market is unlikely to continue despite lower availability of imported stock in Kolkata and Mumbai. It would not allow market to go unexpectedly down. However, market should not ignore huge stock (243450.18 MT) in central pool procured during the season. Other price limiting factor is lower price for

Tur and it is directly affecting Masur dal consumers right now. Tur dal is still available at Rs55-60 per kg against 50 to 55 per kg for Masur. So consumers have option to shift from Masur to Tur. Govt. agencies have around 10 lakh tonne Tur stock and they would start liquidating it before Nov when new crop hits the market. It would pressurize lentil price in the months ahead.

- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3<sup>rd</sup> Adv. Est released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.**

#### Pulses International Fundamental:

- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.**
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018. Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.**
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year. According to data released by Eurostat and Terres Univia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.**
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year. The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).**
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT. Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.**
- **Chickpeas area in Canada & US has been registered higher than previous intention. US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.**
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.**
- **Canada exported 36,600 MT lentil in April-2018, it is higher by 3500 MT shipped in April-2017. Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.**
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.**

**Weekly Outlook:** -Pulses are likely to trade steady to slightly firm.

**Comparative Import fig during Feb to June-2018 in India with Average CiF:**

Month	Chickpea		Tur		Green Peas		Lentil
