

Pulses Domestic Fundamentals:

Today's Update:

- **Gossips are circulating into market that Indian exporters have exported around 300** containers chana for Saudi Arab and more deals are under process. It is Australian chana imported in 2017. Besides, Bangladesh has brought round 5000 MT Indian chana from Maharashtra. As demand for chana and chana dal is likely to increase in festive months, prices are expected to move up from current level.
- **Other bullish factor like fear of lower rainfall in some major producing states may affect chana sowing in Oct-Nov.** Govt may maintain buffer stock of 1MMT this year as Australian crop is expected to be lower than 3.5 lakh tonne due to severe drought. This means supply from central pool through state govt. would not impact prevailing market sentiment much. Around 17 lakh tonne out of 27 lakh tonne would be distributed in next six months for midday meal and PDS. Import is not possible and export opportunity is increasing. All these developments remain supportive to chana cash market. It is expected to move up.

Previous Update:

- **New arrival from kharif moong has started increasing in Karnataka and it has pressurized market once** again. Cash moong market may dip by Rs200 from current level. Procurement of new MSP (Rs6975) announced for Kharif crop is yet to begin. In cash market moong is being traded at Rs 5100 to 5650 per qtl. Farmers in Karnataka have demanded to procure moong on MSP as soon as possible.
- **Lack of fresh demand and continued auction from state agencies have capped cash tur market** this week despite higher MSP (Rs 5675). Area under Tur is almost same as last year. However, lower rainfall in major growing region may impact normal yield and resultantly final crop size too. Market is still awaiting demand to pick up as it improves in Sep/Oct due to festive months.
- **Area under Urad is lagging behind by 12% so far to 34.93 lakh ha against 69.69 lakh ha last year.** As sowing season is at final stage, no major change in area is expected now. Lower rainfall too may impact final size of the crop this season. Higher MSP, likely lower production size, import limit and expected festive demand may support urad market in coming weeks. Commencement of buying expected by the end of this month may push Urad price up by Rs 250 to Rs 400 from current level.
- **Pulses will not be disposed of immediately as govt has decided to consume pulses stock** through state govt.'s various welfare schemes. It would not be sold for open market through auction. The burden of this stock has been shifted to all states and union territories, which they have to consume over the period of next twelve months under various running welfare programs. So supply of pulses would remain restricted for open market. State govt. has to utilize it. As maximum stock available in central pool is of Chana and Tur. So it would help market to recover from current level.
- **Rajasthan state govt has waived the tradition of renewal of license of dal industry having** investment lower than 5 crores regarding air pollution act. Now such pulses industries can get acknowledgement once under air act 1981 & water act 1974 from Rajyamandal. It would help dal industries in Rajasthan from unnecessary delay and documental procedure. All India dal mills association has welcomed this step.
- **Arrival of moongis below expectation in harda, Pipariya and other adjoining markets. Lower arrival and** millers improved interest lent support to moong cash market and it traded up by Rs 100-200 in Auction. MP govt has extended the procurement date to 20th Aug now under Bhavantar Yojna. Even farmers are unwilling to sell moong to private traders. As new MSP for moong is much higher than prevailing price, farmers would not sell entire quantity. It may support moong market at current level. There is a common view among farmers that they would sell moong at new MSP when govt would start procurement. All these developments would not allow moong market to dip more from current level. Stake holders should buy on dip
- **Mayanmar offered lemon tur (new & old) at \$ 370 per tonne. Basis Indian port. Linkly too is being** offered at \$370 per tonne, down by \$10, urad FAQ was offered down by \$5 to \$310 and SQ at \$445 basis Indian port. Chana v2 Kabuli was offered at \$620 per tonne and Hollan at \$655 per tonne. Moong Pakaku was offered at \$680 per tonne. Red Rajma was quoted at \$1120 per MT.
- **DES has revised pulses production estimates from 23.95 to 24.51 MMT in the 3rd Adv. Est released on 16th May-2018 for 2017-18 season. It has finalized last year production at 23.13 MMT.**

Pulses International Fundamental:

- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year.** According to data released by Eurostat and TerresUnivia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018.** Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this My has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade range bound.
