

Pulses Domestic Fundamentals:

Today's Update:

- **Chana from Rajasthan and MP is coming into Delhi market. Arrival was recorded at around 15 to 18 motors.** Millers of Jaipur are active in Bikaner line. It has helped market to sustain at Rs 4300. Even chana supply from Nohar, Bhadra, Sawai Madhopur line is out of parity and delivered price at Delhi comes to Rs 4500 for average quality. It has encouraged local millers to buy at higher price at Rs4325-4350 per qtl. Even dal price was quoted higher by Rs 50 per qtl. However, statement given by central govt. this week that Nafed may start selling chana from next month has capped market uptrend. If quantity for selling remains restricted, chana price may recover again and may move up by Rs 200 from current level. It would be important to see at which price Nafed decides to sell.
- **Sluggish demand for Tur dal and steady quotes in Burma at \$275-80 per MT have discouraged importers** to strike fresh deal for Tur. Assuming that private import would not touch the level of 2 lakh tonne during current MY, prices should recover from current level to a certain extent. However, main bottleneck for a major recovery is availability of old imported Tur from Mozambique, Malawi and Sudan stored in big millers godowns. Mills continues to sell old stock. Mills from Katni lines have started selling dal at discount of Rs 50 per qtl. Besides, in Mumbai stockists have resumed selling once again and offered Tur at Rs 3450/3500. Lemon Tur is being offered at Rs3650 to Rs 3680 per qtl. At current price stake holders should buy Tur, it is ruling at recent bottom level. It may recover by Rs 100 to Rs 200 from current level.
- **There is no parity for moong from any markets. However, weak demand for dal has suppressed moong price** in major domestic markets. As there is lower supply from Rajasthan this year, any downfall at current level is unlikely. There is a report of lower crop in Kekri, Shekhawati and Kishangarh lines. Besides, some quality issue may surface from Akola and Khamgaon line. All these developments may not allow moong to decrease from current level. Moong from Kanpur and Allahabad line too is not good. So any major dip is unlikely. It is being traded at Rs5200 to Rs 5400 per qtl in Kanpur. Allahabad line. Besides, govt. would procure moong at MSP. So buy at current level seems good.
- **Urad dal supply in Delhi from other states continues and there is parity of Rs 200 right now.** It has affected local Urad dal prices in Delhi market. Offtake from mills located in Narela, Bawana and NCR has decreased considerably. Pressure is likely to continue as new Urad from MP is expected from first week of Sept, followed by Udgir and Latur from Maharashtra line. In Delhi market SQ quality is being traded at Rs5100-5200 and Desi at Rs 3750-3850 per qtl. So under prevailing condition any major recovery is unlikely. however, procurement on MSP would not allow market to decrease from current level.
- **Improvement in local dal mills demand for bold lentil helped lentil market to sustain at previous level.** Supply from MP at higher price hints market to stay steady or move up from current level. MMTC has sold out its stock. Besides, stock at ports too is depleting fast. Small traders/stockiest too have sold out 70 % stock due to liquidity crunch. So masur may trade slightly up in coming weeks. Nafed too may start selling Masur from next month at regular interval.

Previous Update:

- **Lentil market is expected to trade steady to weak due to low domestic demand.** Furthermore export demand is also low as Nepal is offering lentils at \$820 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip. Government has offered 5998.528 tonnes of lentils in its tender on 21st August 2018. Government sales won't make much difference as the quantity is small and it will be consumed locally.
- **Government has allowed traders to import 125 MT or less peas per contract** irrespective of advance payment made by them before 25th April-2018. Eligible applicants will approach their concerned jurisdictional regional authorities for registering and enhancing their contracts. Regional authorities will issue or amend the registration certificate for allowing import.
- **New arrival from Kharif moong has started increasing in Karnataka and it has pressurized market once again.** Cash moong market may dip by Rs200 from current level. Procurement of new MSP Rs6975) announced for Kharif crop is yet to begin. **Myanmar offered lemon tur (new & old) at \$ 370 per tonne. Basis Indian port. Linkly too is being offered at \$370 per tonne,** down by \$10 ,urad FAQ was offered down by \$5 to \$310 and SQ at \$445 basis Indian port. Chana v2 Kabuli was offered at \$620 per tonne and Hollan at \$655 per tonne. MoongPakaku was offered at \$680 per tonne. RedRajma was quoted at \$1120 per MT.

Pulses International Fundamental:

Today's Update:

- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%.As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.

Previous Update:

- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year.** According to data released by Eurostat and Terres Univia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade range bound.
