

Pulses Domestic Fundamentals:

Today's Update:

- **Govt has released Fourth Advance Estimates of Production of Food grains for 2017-18** on 28t Aug-2018. For Tur production, target has been set at 42.25 lakh tonne. Final estimate for Tur has been pegged at 48.7 lakh tonne, up by over one lakh tonne from 4th Adv. Est. for 2016-17.
- **Chana production estimate for 2017-18 has been pegged at 112.3 lakh tonne against the set target of 97.5 lakh tonne** in fourth adv estimate. It was pegged at 93.8 lakh tonne for 2016-17.
- **Kharif urad production estimate has been pegged at 28.4 lakh tonne against set target of 18.5 lakh tonne** for 2017-18 in fourth Adv Est. Final estimate for 2016-17 is 21.8 lakh tonne for kharif and 6.6 lakh tonne for rabi. For rabi 2017-18 production has been pegged at 7.3 lakh tonne. Total production estimate (kharif and rabi) for 2017-18 has been pegged at 35.6 lakh tonne against set target for 26 lakh tonne. For 2016-17 total production has been pegged at 28.3 lakh tonne.
- **Kharif moong production estimate has been pegged at 14.4 lakh tonne against 16.5 lakh tonne target** for 2017-18 in fourth Adv Est. Final estimate for kharif moong for 2016-17 is 16.2 lakh tonne. For rabi moong it has been pegged at 5.7 lakh tonne against target of 6.5 lakh tonne. Total production for kharif and rabi has been pegged at 20.1 lakh tonne against set target of 23 lakh tonne. Final estimate for kharif and rabi moong 2016-17 is 21.7 lakh tonne.

Previous Update:

- **All India kharif Pulses area is lagging behind by 2.27 % to 130.83 against 133.87 lakh ha** last year as on 24th Aug 2018. Farmers have covered 43.82 lakh ha against 43.82 last year under Tur till date, same as last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.97 % to 37.02 against 42.54 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 6.33 % to 33.31 lakh ha against 31.33 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is up by 1.60 % than last year. It is 15.94 against 15.69 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has increased by 47.09 % to 0.73 lakh ha against normal of 0.27 lakh ha so far.
- **Chana market extended its loss further taking clue from weak demand and likely selling from Nafed soon.** There is a common perception in the market that likely commencement of sale by Nafed in various states may increase supply and would continue to cap uptrend. Market expects sale might be started at MSP. Nafed has to decide selling strategy. Chana in Delhi market traded down by Rs100 to Rs 4150-4200 per qtl. market is expected to stabilize at this level, as millers may turn active at decreased price. Nafed may decide to sell in small quantity. however, bulk sale may pressurize market further.
- **Sluggish demand for Tur dal and steady quotes in Burma at \$275-80 per MT have discouraged importers** to strike fresh deal for Tur. Assuming that private import would not touch the level of 2 lakh tonne during current MY, prices should recover from current level to a certain extent. However, main bottleneck for a major recovery is availability of old imported Tur from Mozambique, Malawi and Sudan stored in big millers godowns. Mills continue to sell old stock. Mills from Katni lines have started selling dal at discount of Rs 50 per qtl. Besides, in Mumbai stockists have resumed selling once again and offered Tur at Rs 3450/3500. Lemon Tur is being offered at Rs3650 to Rs 3680 per qtl. At current price stakeholders should buy Tur, it is ruling at recent bottom level. It may recover by Rs 100 to Rs 200 from current level.
- **There is no parity for moong from any markets. However, weak demand for dal has suppressed moong price** in major domestic markets. As there is lower supply from Rajasthan this year, any downfall at current level is unlikely. There is a report of lower crop in Kekri, Shekhawati and Kishangarh lines. Besides, some quality issue may surface from Akola and Khamgaon line. All these developments may not allow moong to decrease from current level. Moong from Kanpur and Allahabad line too is not good. So any major dip is unlikely. It is being traded at Rs5200 to Rs 5400 per qtl in Kanpur. Allahabad line. Besides, govt. would procure moong at MSP. So buy at current level seems good.
- **Urad dal supply in Delhi from other states continues and there is parity of Rs 200 right now. It has affected local Urad dal prices** in Delhi market. Offtake from mills located in Narela, Bawana and NCR has decreased considerably. Pressure is likely to continue as new Urad from MP is expected from first week of Sept, followed by Udgir and Latur from Maharashtra line. In Delhi market SQ quality is being traded at Rs5100-5200 and Desi at Rs 3750-3850 per qtl. So under prevailing condition any major recovery is unlikely. however, procurement on MSP would not allow market to decrease from current level.
- **Lentil market is expected to trade steady to weak due to low domestic demand.** Furthermore export demand is also low as Nepal is offering lentils at \$820 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per

tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip. Government has offered 5998.528 tonnes of lentils in its tender on 21st August 2018. Government sales won't make much difference as the quantity is small and it will be consumed locally.

Pulses International Fundamental:

Today's Update:

- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%.As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.

Previous Update:

- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks.** Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year.** According to data released by Eurostat and TerresUnivia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says

Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

Weekly Outlook: -Pulses are likely to trade range bound.
