

## Pulses Domestic Fundamentals:

### Today's Update:

- **Nafed chana sale tender was cancelled on lower bids received by it.** traders bid in Hanumangarh was Rs3915, Chomu-Rs4000, Kota Rs3900 per qtl. Nafed offered it at Rs 4200 per qtl. It means nafed would not sell chana below Rs 4200 per qtl. It may give chana cash market much needed support in coming days.
- **Arrival of new Moong and Urad in Karnataka mandi is increasing fast and pressure is being seen on price.** State agencies need to support cash market by starting procurement on MSP. Urad harvesting and threshing started in Harda region of MP. Farmers have received yield of 3 qtl. per acre, normal as expected.
- **Market strike in Rajasthan has been called off and trading activities are expected to commence** normally from tomorrow. State govt has assured higher commission for trading agents.

### Previous Update:

- **All All India kharif Pulses area is lagging behind by 2.5 % to 132.66 against 136.12 lakh ha** last year as on 31st Aug 2018. Farmers have covered 44.47 lakh ha against 44.70 last year under Tur till date, slightly lower than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.8 % to 37.57 against 43.09 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 6.5 % to 33.70 lakh ha against 31.65 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is up by 0.9 % than last year. It is 16.15 against 16.00 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has increased by 47.09 % to 0.73 lakh ha against normal of 2.27 lakh ha so far
- **Central govt has approved 23,250 MT Moong buying from Karnataka.** The entire quantity would be procured under price support scheme from ongoing kharif marketing season. As per official from agriculture department, the decision has been taken in view of lower prevailing price of moong in open markets and save farmers from distress sale and ensure MSP. Notably govt. has fixed MSP for moong at Rs 6975 per qtl. for ongoing kharif season. The procurement would be conducted through FCI, Nafed, NCCF and FMAC. The procurement would continue for three months and farmers would receive payments within 15 day after selling their crop.
- **Chana market is bound to recover as there is not much stock in private hands.** Nafed selling would cap market for some times. There is a rumour in the market that nafed would not sold entire quantity in open market. It would sell only half of entire quantity in open market. The would be supplied through PDS, midday meal and others schemes.
- **Govt has published 4th Adv estimate for 2017-18 Vs 2016-17 on 28th Aug-2018.** For Tur it is 4.25/4.87MMT, For Chana it is 11.23/9.38MMT, For Urad it is 3.56/2.83MMT, For Moong it is 2.01/2.17MMT, for Masur it is 1.61/1.21MMT.
- **Sluggish demand for Tur dal and steady quotes in Burma at \$310-315-80 per MT have discouraged importers** to strike fresh deal for Tur. Assuming that private import would not touch the level of 2 lakh tonne during current MY, prices should recover from current level to a certain extent. However, main bottleneck for a major recovery is availability of old imported Tur from Mozambique, Malawi and Sudan stored in big millers godowns. Mills continues to sell old stock. Mills from Katni lines have started selling dal at discount of Rs 50 per qtl. Besides, in Mumbai stockists have resumed selling once again and offered Tur at Rs 3450/3500. Lemon Tur is being offered at Rs3650 to Rs 3680 per qtl. At current price stake holders should buy Tur, it is ruling at recent bottom level. It may recover by Rs 100 to Rs 200 from current level.
- **There is no parity for moong from any markets.** However, weak demand for dal has suppressed moong price in major domestic markets. As there is lower supply from Rajasthan this year, any downfall at current level is unlikely. There is a report of lower crop in Kekri, Shekhawati and Kishangarh lines. Besides, some quality issue may surface from Akola and Khamgaon line. All these developments may not allow moong to decrease from current level. Moong from Kanpur and Allahabad line too is not good. So any major dip is unlikely. It is being traded at Rs5200 to Rs 5400 per qtl in Kanpur. Allahabad line. Besides, govt. would procure moong at MSP. So buy at current level seems good.
- **Lentil market is expected to trade steady to weak due to low domestic demand.** Furthermore export demand is also low as Nepal is offering lentils at \$820 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip. Government has offered 5998.528 tonnes of lentils in its

tender on 21<sup>st</sup> August 2018. Government sales won't make much difference as the quantity is small and it will be consumed locally.

#### **Pulses International Fundamental:**

#### **Today's Update:**

- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.

#### **Previous Update:**

- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year.** According to data released by Eurostat and TerresUnivia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

**Weekly Outlook:** -Pulses are likely to trade range bound.

**Comparative Import fig during May to Jul-2018 in India with Average CiF:**

| Month  | Chickpea    |            | Tur         |            | Green Peas  |            | Lentil      |            |
