

## **Pulses Domestic Fundamentals:**

### **Today's Update:**

- **All India kharif Pulses area is lagging behind by 2.2 % to 134.41 against 137.45 lakh ha last year as on 7th Sep- 2018.** Farmers have covered 45.20 lakh ha against 45.11 last year under Tur till date, slightly higher than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.5 % to 38.02 against 43.44 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 7.3 % to 34.05 lakh ha against 31.72 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is down by 0.1 % than last year. It is 16.34 against 16.35 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has decreased by 3 % to 0.81 lakh ha against normal of 2.27 lakh ha so far.
- **Heavy rainfall in Hadauti region from last two-three days has increased concern for Urad farmers.** Water lodging in Urad field in many growing places in Rajasthan may damage urad crop standing in the field. Rajasthan has covered 4.72 lakh ha so far against 5.40 lakh ha last year. If rains continue, yield may drop by 10 to 15 % this year. However, acreage in UP and Maharashtra is likely to negate crop loss in Rajasthan to a certain extent. The major concern is lower acreage in MP, the largest Urad producing state, is lagging behind by 16.66% to 14.91 lakh ha. In other states, there is good rainfall and crop condition is said to be satisfactory so far. So better yield is expected in these states. Around 65 to 126 mm rainfall has been reported in the Hadauti region over the last three days.
- **Chana market traded steady despite weak demand from bulk buyers. Recent cancellation of tenders by Nafed due to lower bids has helped market to sustain at current level.** If Nafed sticks with its intention not to sell below MSP, cash chana market may stay steady to slightly firm. Total stock with govt and private hands is said to be around 50 lakh tonne. If consumption continues with 8 lakh tonne per month, market should move up by Rs 200 to 300 from current level. In Delhi market chana is being traded at Rs 4100 to Rs 4200 per qtl.
- **Tur Area in AP is down by 8.33 % to 1.98 lakh ha, It is down by 3.4 % to 6.24 in MP. However, it is up by 12.74 to 9.91 in Karnataka and 11.15 % to 2.77 lakh ha in Telangana. It is down by 4.05% to 12.20 in Maharashtra.** Overall Tur area is up slightly from last year. There is report of some damage in MP and Rajasthan. But higher acreage in other states and good rainfall may increase yield too. So there is a good hope for bumper crop once again. More downward trend in Tur is unlikely. Steady to slightly firm trend might be seen.
- **Moong market is unlikely to trade lower as stockists are unwilling to sell stock.** Despite higher area coverage amid commencement of procurement in Karnataka at MSP would keep market supported at current level. In some markets prices are ruling lower due to high moisture level in the crop. Demand is normal and cash market should stay steady at current level. Overall medium term outlook seems firm. In Jaipur moong is being traded at Rs 5100 per qtl. Central govt has approved 23,250 MT Moong buying from Karnataka. The entire quantity would be procured under price support scheme from ongoing kharif marketing season. It will continue for three months.
- **Lentil domestic market is likely to stay steady in the near term.** Demand from cash and bulk users is likely to improve by the end of this month and it may lend support to cash market to a certain level. Masur in Kanpur market is being traded at Rs 3850 -3900. Import flow remains very slow due to higher duty and good availability in domestic market. Stockists are unwilling to sell stock at current price. Overall outlook in the medium term remains firm.

### **Previous Update:**

- **Govt has published 4<sup>th</sup> Adv estimate for 2017-18 Vs 2016-17 on 28th Aug-2018. For Tur it is 4.25/4.87MMT, For Chana it is 11.23/9.38MMT, For Urad it is 3.56/2.83MMT, For Moong it is 2.01/2.17MMT, for Masur it is 1.61/1.21MMT.**
- **Lentil market is expected to trade steady to weak due to low domestic demand.** Furthermore export demand is also low as Nepal is offering lentils at \$820 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockists and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip. Government has offered 5998.528 tonnes of lentils in its tender on 21<sup>st</sup> August 2018. Government sales won't make much difference as the quantity is small and it will be consumed locally.

### Pulses International Fundamental:

#### Today's Update:

- **Stock position of lentil and peas in Canada has increased considerably due to lower exports.** Canada used to export a good share of lentil and peas to India. However, good domestic availability and import restrictions imposed by India have decreased exports from Canada. The Pea carryout has increased to 6.5 lakh tonnes compared to 3.0 lakh tonnes in previous year. Lentil ending stock has increased to 8.76 lakh tonnes, up by 178 percent compared to previous year.
- **Global chickpea markets were traded almost unchanged in amid limited trading activities during the week under review.** Price may dip further. Buyers are waiting for downward correction and they may start buying after slight correction for shipping needs for winter season. Harvesting in Canada is 30% over now and new crop availability is said to be around 80,000 MT, it is almost double that was seen last year. It was 37-38000 MT last year..
- **The global chickpea markets continued to trade weak during the past week, bidding prices for big caliber product could not be affected from medium and small caliber.** As per Statistics Canada, farmers thought yields would average 1,315 pounds per acre for a 264,100 MT crop, compared to last year's average of 1,251 pounds per acre for a 118,600 harvest result.

#### Previous Update:

- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.
- **France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year.** According to data released by Eurostat and TerresUnivia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased

from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.

- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for human consumption is another factor behind the strength in chickpeas market.

**Weekly Outlook:** -Pulses are likely to trade range bound.

**Comparative Import fig during May to Jul-2018 in India with Average CiF:**
