

#### **Pulses Domestic Fundamentals:**

#### **Today's Update:**

• Chana cash market traded weak in Delhi market and extended its loss by Rs 100 per qtl.to Rs 4200-4225. Nafed is selling chana at Rs 4000 to Rs 4100 per qtl.. while demand for dal mill is poor at this point of time against all expectations. Stock is ample in central pool and Nafed may increase selling in coming weeks as kharif procurement is about to start and its needs storage space. So any unexpected firmness in the near term is unlikely. Stock in private and public hands seems enough to take care of next 4-5 months demand. So market is expected tomove range bound in the near term. In the medium term, sowing area would decide price direction for chana. Price in Delhi market may hinge in the range of Rs4100 to Rs 4300 in Delhi market.

#### **Previous Update:**

- All India kharif Pulses area is lagging behind by 0.86 % to 137.41 against 138.60 lakh ha last year as on 14th Sep-2018. Farmers have covered 45.70 lakh ha against 45.31 last year under Tur till date, slightly higher than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 8.81 % to 40.20 against 44.09 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 7.50 % to 34.25 lakh ha against 31.86 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is down by 0.15 % than last year. It is 16,39 against 16.4 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has decreased by 6.30 % to 0.86 lakh ha against normal of 2.27 lakh ha so far.
- Chana cash market traded weak in Delhi market and extended its loss by Rs 100 per qtl.to Rs 4200-4225. Nafed is selling chana at Rs 4000 to Rs 4100 per qtl.. while demand for dal mill is poor at this point of time against all expectations. Stock is ample in central pool and Nafed may increase selling in coming weeks as kharif procurement is about to start and its needs storage space. So any unexpected firmness in the near term is unlikely. Stock in private and public hands seems enough to take care of next 4-5 months demand. So market is expected tomove range bound in the near term. In the medium term, sowing area would decide price direction for chana. Price in Delhi market may hinge in the range of Rs4100 to Rs 4300 in Delhi market.
- Arrival of chana in major markets have decreased drastically during last one week. Arrival in major mandi like Bikaner has decrteased to 10-12 thousand bags against normal of 50 thousand bags at this point of time. Poor arrival has lent support to chana cash market and it moved up Rs 150 per qtl to Rs 4050-4150. it is still lower by Rs 200 to 350 from MSP. However, futures traded lower at 3925-30 for Sep month. As Nafed is unwilling to sell chana below MSP, cash market is expected to move up further byRs 100-200 this month. demand for dal and besan is expected to improve in the weeks ahead. So Agriwatch expects market to recover soon. Sebi needs to have a close eye on bears in futures. Import is not possible due to 70% import duty and lower crop size in Australia..
- Standing crop of Tur in Uttar Pradesh due from mid Nov has got affected by heavy rains last week. If it continues further, area loss may increase to 10 % from actual planting of 45.20 lakh ha so far, almost same as last year. Besides, 25 % tur crop in Jatua region of Allahabad line too has got affected by water lodging. Slight damage is being reported too in Katniline of MP. So traders/bulk users have to depend on crop of Maharashtra and Karnataka, due in December. Import will not take place beyond 2 lakh tonne for the year, fixed by govt. So, Agriwatch expects market to recover by Rs 100 to Rs 150 from current level and then may stabilize.
- Lower area coverage by 12.5 to 38.02 lakh ha so far in comparison to last year till 1st week of Sep and import cap of 1.5 lakh tonne for the year amid report of crop loss in Rajasthan and Maharashtra may lend support to urad cash market in coming weeks. Arrival of old Urad in mandis is almost over now. However, old stock is available in Shivpuri, Katni Agra, Bhopal line in plenty.lower stock of imported Urad and likely procurement at new MSP may push up price to a certain extent. demand is weak and may improve from Oct.
- Burma offered Tur Lemon at \$350 per MT basis cNF Indian port. Linkly, Old and new lemon Tur quotes remain same. FAQ
  Urad is being offered at \$355 and SQ at \$475 per MT basis CNF Indian port. Kabuli Chana is being offered at 4655 and Hollan
  at 4690 per MT basis CNF. Moong Pakaku is being offered at \$710 per MT.CNF quotes have improved slightly in past two
  weeks.

• Govt has published 4t Adv estimate for 2017-18 Vs 2016-17 on 28th Aug-2018. For Tur it is 4.25/4.87MMT,For Chana it is 11.23/9.38MMT,For Urad it is3.56/2.83MMT,For Moon it is2.01/2.17MMT, for Masur it is1.61/1.21MMT.

#### **Pulses International Fundamental:**

#### Today's Update:

- Global chickpea market traded almost steady as demand from bulk buyers like India remained subdued, almost nil like previous month. Other buyers too are unwilling to buy as they hope market to move further down from current level. Growers and processors seem worried a lot due to weak demand for small and medium caliber product. Higher area in US is said to be higher at 853146 acres as per Farm Service Agency of US. However, NAss estimates area at 822,000 acres. As per FSA US farmers have covered 632,482 acres under large Kabuli, 209,338 acres under medium Kabuli and 11,326 acres under Desi chickpea. Fresh bout of buying might be seen from October as exporters may start buying for winter season shipping. Chickpea harvesting in Canada has reached 40 % and availability for new chickpea is said to be around 1 lakh tonne now. It was 45,000 MT last year at this point of time.
- Marketing year 2017-18 for chickpeas in US is over now and prevailing prices are ruling higher by 5% from last three years annual average price in local market. The average price paid for California 9mm Chickpeas was USD\$47.85 per 100 pounds (cwt), compared to an average annual bid of \$41.92 during the latest three year period for farmers. Farmers had received the highest bid(\$55 per cwt) in January while the lowest bid was received in August(\$34 per cwt).
- Farmers in Australia are facing rough winter season and it has prompted Abares (Australian government commodity forecaster) to revise down winter grain production by 12% from last year, s total winter grain production. The latest crop report is tipping winter production including wheat, barley, canola, pulses and oats, among others to yield 33.2 million tonnes. States like Queensland and New South Wales hit hard by drought, production is expected to drop by 38 to 46 per cent in both states. Chickpeas production is expected to drop by 69 % to 3.51 lakh tonne.

### **Previous Update:**

- With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas amarket in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern
  hemisphere countries. Pea harvesting in Canada has been pegged at 21 % against 28% last year till 20th August. However, it is
  higheer of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of
  harvesting would increase and pressure might be felt on physical market soon in Canada.
- As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018. Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It(production) was 16.7 lakh tonne last year.
- France Pea marketing season ended with 2.85 lakh tonne, down by 2% from last year. According to data released by Eurostat and Terres Univia export shipments during June totaled 16,775 metric tons, down 6% from the 17,910 MT shipped last month. Belgium was the most important destination, taking 10,560 MT. Netherlands was the second most important destination at 3,120 MT, followed by Italy at 1,535 MT and Spain at 587 MT.
- to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- Chickpeas area in Canada & US has been registered higher than previous intention. US farmers have planted6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics

Canada data suggests Canada planted 13,8000 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.

**Weekly Outlook:** -Pulses are likely to trade range bound.
