

Pulses Domestic Fundamentals:

Today's Update:

- ***This week is going to be very important from chana point of view. Market sources say that central govt may extend quantity limit/import restriction for another three months. Besides, govt may decide to prepare new commodity export policy in Cabinet meeting on Wednesday. Under new policy import can be limited and it is possible even under WTO norms. According to WTO norm any country who is member of WTO, can limit import at 10 % of total imported pulses last year. It means India can contain it as total import last year was around 6 lakh tonne. It would help market to recover. Market is waiting for tomorrow (today) decision.***
- ***As per trade Sources, India has imported 14266 MT of Lentil at an average CiF of \$430.65 per tonne during the month of August -2018. Of the total quantity around 11963.11 tonnes has been purchased from Canada and the remaining quantity from Unites States and Australia.***

Previous Update:

- ***India imported 29172 MT chickpea from March to Aug-2018 at an average price of \$633.49 per tonne. In August it imported 14430MT against nil in July-2018. During the same period India exported 1.98 lakh MT including kabuli chana and dal at an average price of \$1132.98 per MT. For other pulses see table at page no-12. Total import in August was registered at 261005MT. With 84401MT Tur scored the highest volume followed by Urad at 68910 MT.***
- ***All India kharif Pulses area is lagging behind by 1.11 % to 137.93 against 139.49 lakh ha last year as on 20th Sep-2018. Farmers have covered 45.83 lakh ha against 45.56 last year under Tur till date, higher by 0.58% from last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 8.97 % to 40.37 against 44.35 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 7.41 % to 34.36 lakh ha against 31.99 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is down by 0.45 % than last year. It is 16.46 against 16.53 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has decreased by 13.08 % to 0.92 lakh ha against normal of 2.27 lakh ha so far.***
- ***kharif 1st adv estimates for foodgrains production-2018-19 for MP and Rajasthan have been released and according to new estimate Tur production is expected to decrease by 24.55 % to 6.33 lakh tonne from last year (8.39 lakh tonne). Urad production is expected to decrease slightly by 1.09 % to 17.25 lakh tonne against 17.44 lakh tonne last year. Even moong production estimate is lower by 9.49% to 1.24 lakh tonne against 1.37 lakh tonne last year. In MP Tur, Moong and Urad production is likely to decline further due to recent heavy rains.***
- ***In Rajasthan kharif moong production has been pegged at 12.09 lakh tonne for 2018-19, up by 21.87 lakh tonne from last year (9.76 lakh tonne). Moth production has been pegged at 3.99 lakh tonne, up by 23.34 % from last year (3.23 lakh tonne). Tur production has been pegged at 0.12 lakh tonne against 0.13 lakh tonne last year. It is down by 4.52% from last year. Urad production has been pegged down by 5.19 % to 4.96 lakh tonne against 5.24 lakh tonne last year. Moong and moth production in Rajasthan is expectedly up.***
- ***MP state govt. has extended the date for kharif crops registration for 10 days to 29th Sep-2018. The decision has been taken on the basis of information received from various farmers association that many farmers could not get themselves registered till 19th Sep. The decision would help farmers who are still unregistered.***
- ***Standing crop of Tur in Uttar Pradesh due from mid Nov has got affected by heavy rains last week. If it continues further, area loss may increase to 10 % from actual planting of 45.20 lakh ha so far, almost same as last year. Besides, 25 % tur crop in Jatua region of Allahabad line too has got affected by water lodging. Slight damage is being reported too in Katniline of MP. So traders/bulk users have to depend on crop of Maharashtra and Karnataka, due in December. Import will not take place beyond 2 lakh tonne for the year, fixed by govt. So, Agriwatch expects market to recover by Rs 100 to Rs 150 from current level and then may stabilize.***
- ***Lower area coverage by 12.5 to 38.02 lakh ha so far in comparison to last year till 1st week of Sep and import cap of 1.5 lakh tonne for the year amid report of crop loss in Rajasthan and Maharashtra may lend support to urad cash market in coming weeks. Arrival of old Urad in mandis is almost over now. However, old stock is available in Shivpuri, Katni Agra, Bhopal line in***

plenty. lower stock of imported Urad and likely procurement at new MSP may push up price to a certain extent. demand is weak and may improve from Oct.

- **Burma offered Tur Lemon at \$350 per MT basis cNF Indian port. Linkly, Old and new lemon Tur** quotes remain same. FAQ Urad is being offered at \$355 and SQ at \$475 per MT basis CNF Indian port. Kabuli Chana is being offered at 4655 and Hollan at 4690 per MT basis CNF. Moong Pakaku is being offered at \$710 per MT. CNF quotes have improved slightly in past two weeks.
- **Govt has published 4th Adv estimate for 2017-18 Vs 2016-17 on 28th Aug-2018. For Tur it is 4.25/4.87MMT, For Chana it is 11.23/9.38MMT, For Urad it is 3.56/2.83MMT, For Moon it is 2.01/2.17MMT, for Masur it is 1.61/1.21MMT.**

Pulses International Fundamental:

Today's Update:

- **Global chickpea market traded steady during the week under review, Demand remains** weak and higher availability of medium and small chana continues to weigh on market fundamental. Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year. Average price is expected to decrease considerably as global supply side is ample right now. It may hinge in between \$450 to \$485 per MT. Area in US is expected to increase to 0.66 million acres. production in US may increase to 0.43MMT in 2018-19.

Previous Update:

- **Marketing year 2017-18 for chickpeas in US is over now and prevailing prices are ruling** higher by 5% from last three years annual average price in local market. The average price paid for California 9mm Chickpeas was USD\$47.85 per 100 pounds (cwt), compared to an average annual bid of \$41.92 during the latest three year period for farmers. Farmers had received the highest bid (\$55 per cwt) in January while the lowest bid was received in August (\$34 per cwt).
- **With bearish USDA crop report global chickpea market traded under pressure. However,** lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting** in northern hemisphere countries. Pea harvesting in Canada has been pegged at 21% against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may** move up to 16.3 lakh tonne in 2018. Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. (production) was 16.7 lakh tonne last year.

Weekly Outlook: -Pulses are likely to trade range bound.
