

Pulses Domestic Fundamentals:

Today's Update:

- **Nafed is intended to sell chana stock from mid Oct around Rs 4000 per qtl. and it may cap uptrend** in the market. Higher MSP for Chana for crop year 2018-19 has been declared at Rs 4620 against 4400 last year including bonus of Rs 200. It has lent some support to cash market. As stock is at higher side and Nafed has to procure kharif pulses, selling by Nafed is inevitable. Import is not possible due to higher import duty. Despite all these bullish factors, sowing progress starting from End Oct would be main price affecting factor. If sowing decreases, as expected, price of chana may cross MSP level. So sowing progress from 15th Oct to Nov remains vital force for chana price trend in the third quarter of the year.
- **Lower kharif area by 8.97% to 40.37 lakh ha, likely lower yield in Latur & Udgir line and** unexpected rains at maturity stage affecting quality of crop would remain price supporting factors for urad cash market in coming weeks. Cash market may move up by Rs 200-300 from current level. Quality of Urad got affected in MP and Chhattisgarh too and lower yield in other area have encouraged mills to commence buying. Stockists too are active now and it has supported market to a certain extent. Yield loss in Udgir and Latur line is said to be 200 KG per ha against normal of 275-300 KG per ha. Mills would continue to buy for their immediate requirement. Besides, stock to use ration is coming down. So overall outlook for Urad seems positive.
- **Govt may decide incentives for agriexports too soon. If incentive is raised from 7 percent to 10 or 15 percent**, it may support all pulses market at current level. Demand too for all pulses is likely to increase. Procurement drive in major states too would commence from 20 Oct. So Agriwatch expects market to improve.
- **Burma offered Tur Lemon at \$350 per MT basis CNF Indian port. Linkly, Old lemon Tur** were quoted at \$365 per tonne. FAQ Urad is being offered at \$385 and SQ at \$520 per MT basis CNF Indian port. Kabuli Chana is being offered at \$630 and Hollan at \$660 per MT basis CNF. Moong Pakaku is being offered at \$710 per MT. CNF quotes have improved slightly during one week.

Previous Update:

- **Nafed has sold 6450 MT chana out of 91979 MT procurement in AP. Total stock available now is 85529 MT.** Telanga Nafed has 49900 MT out of 50,000 MT procured during rabi 2018 season. Karnataka has sold 13714 MT out of 136013.05 MT. Maharashtra has sold out 300 MT out of 181644.23 MT. Gujarat has sold out 1260 MT out of 90910 MT. MP and Rajasthan sold out 100 and 20770 MT respectively out of 1545341 MT and 579868.77 MT procured during rabi season. Maximum quantity has been sold (20770) in Rajasthan. So total stock available with Nafed is 2643818 MT. Nafed would prefer to sold chana at MSP and may hold it for one month. Till then price would move up to the level of MSP. Govt too is eager to support cash market ahead of Lok Sabha election in 2019. So pulses market is expected to recover once again..
- **DES has come out with 1st Adv est. for kharif pulses on 26th Sep-2018. Tur production for 2017-18** has been finalized at 4.25 MMT. It has estimated 4.05 MMT for 2018-19 against the set target of 4.25 MMT. It has fixed 2.28 MMT kharif Urad production for 2017-18. For 2018-19 it has projected 2.65 MMT against set target of 2.0 MMT. Rabi target has been fixed at 0.8 MMT for 2018-19 against 0.73 MMT in 2017-18. Moong kharif production has been pegged at 1.44 MMT for 2017-18. It has estimated 1.58 MMT for 2018-19 against set target of 1.4 MMT. Last year India had produced 0.57 MMT in rabi season in 2017-18. total pulses production would decrease from 9.34 to 9.22 MMT in 2018-19 in kharif season.
- **Lemon Tur in Mumbai market is being traded at Rs3375 to 3450 per qtl, depending on** quality of crop. millers are active in buying in narela, Bawana and Raiee line at Rs3550-3575 per qtl. new buying spree may push up price by Rs100 -150 from current level. Notably, arrival from Jaitua Tur in katni, Indore line has decreased considerably. There is no supply from Nimuch line. So Agriwatch expects market to move up despite imported stock from Sudan and Mozambique is available. Imported stock is decreasing now. Millers are buying imported Tur and selling it at Rs5500-5600 in Varanasi, Dewaria and Gorakhpur line on delivered basis. As imported stock is decreasing, market is expected to get support at this level. Report of crop loss in karnataka too seems favorable for cash market.
- **India imported 29172 MT chickpea from March to Aug-2018 at an average price of \$633.49 per tonne.** In August it imported 14430 MT against nil in July-2018. During the same period India exported 1.98 lakh MT including kabuli chana and dal at an average price of \$1132.98 per MT. For other pulses see table at page no-12. Total import in August was registered at 261005 MT. With 84401 MT Tur scored the highest volume followed by Urad at 68910 MT.

Pulses International Fundamental:

Today's Update:

- **Global chickpea market traded steady during the week under review, Demand remains weak and higher availability of medium and small chana continues to weigh on market fundamental.** Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year. Average price is expected to decrease considerably as global supply side is ample right now. It may hinge in between \$450 to \$485 per MT. Area in US is expected to increase to 0.66 million acres. Production in US may increase to 0.43 MMT in 2018-19.

Previous Update:

- **Marketing year 2017-18 for chickpeas in US is over now and prevailing prices are ruling higher by 5% from last three years annual average price in local market.** The average price paid for California 9mm Chickpeas was USD\$47.85 per 100 pounds (cwt), compared to an average annual bid of \$41.92 during the latest three year period for farmers. Farmers had received the highest bid (\$55 per cwt) in January while the lowest bid was received in August (\$34 per cwt).
- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Global field pea markets ended weak on the back of likely pressure from the commencement of harvesting in northern hemisphere countries.** Pea harvesting in Canada has been pegged at 21% against 28% last year till 20th August. However, it is higher of recent average of 19%. As condition for harvesting is very congenial due to dry and hot weather condition, pace of harvesting would increase and pressure might be felt on physical market soon in Canada.
- **As per the USDA first production estimate for new crop Chickpea and dry edible bean in US may move up to 16.3 lakh tonne in 2018.** Seeded area is estimated at 2.05 million acres, down 2% from 2017. Harvested area has been pegged at 1.99 million acres, down by 1 percent from last year. It (production) was 16.7 lakh tonne last year.

Weekly Outlook: -Pulses are likely to trade range bound
