

### Pulses Domestic Fundamentals:

#### Today's Update:

- **India exported total 224176 MT chickpea from March to Sep-2018.** However, volume of dal and kabuli chana is higher. In Sep, India exported 26195 MT chickpeas/dal at an average FoB price of \$936.41 per MT. In Aug, it has exported 22568 MT chickpea. If govt. gives higher incentive (10 to 15% likely), volume of export is likely to go up further. Australia has not much stock to offer due to lower crop size this year (3.51 lakh tonne only).
- **India imported total 47501MT chickpea from Mar to Sep-2018 .Import volume increased from 14430 to 18329MT in Sep.** Average monthly price of imported chickpea is coming down from \$634.56 in Aug to \$597.45 per MT in Sep. Import volume increased by 27.02 % to 18329MT while CiF price decreased by 5.84% to \$ 597.45 per MT.
- **Cash Moong and Urad market is likely to move further up on growing fear of lower yield and crop loss.** Festive demand and commencement of procurement too remains supportive to cash market fundamental. Moisture stress may affect Rabi sowing in south Indian states. Farmers are waiting for post monsoon rains. Overall market sentiment remains firm.
- **Tur crop in Karnataka is facing moisture stress right now and there is a dire need of showers to reduce moisture stress.** If south Indian states continue to face dry condition for a couple of weeks, yield of Tur crop would decrease and it would directly affect the overall production size. There is a gossip in the market that Tur crop would not be more than 38 to 3.9 MMT against govt.'s estimate of 4.2MMT. Festive demand and dwindling pipeline stock may support cash tur market to move up by Rs200 to 300 from current level. In Gulberga market Tur is being traded at Rs3650-3850.
- **Chana cash market too is expected to improve due to festive demand. Stockists have retained stock and south Indian traders are buying chana at current level.** Moisture stress remains a major obstacle for smooth sowing. Govt has stock of around 25 lakh tonne and private stock is said to be 16 to 18 lakh tonne against 5 months requirement of 35 to 38 lakh tonne. This means supply –demand side seems balanced. However, fear of lower area coverage amid remote possibility of import may support chana cash market. If weather turns rough in the growth stages, price may go up to the level of MSP. Chana in Delhi market is being traded at Rs 4350-4350 per qt. Sentiment remains firm
- **White pea, Chana & Masur stock at Mundra port as on 20th Oct-2018 was registered at 196783, 83587 & 67016MT respectively .It was 22695 MT, 14038MT & 13730 MT at Kandla port.** White pea and Chana stock at Hazira port was registered at 54991 and 13317 MT. In Mumbai white pea stock was registered at 10000MT. Total stock of white pea as on 20 Oct was registered 284469MT, Chana at 97615MT & Masur at 94064MT.

#### Previous Update:

- **Old, new and linkely Burma lemon tur was offered at \$340 basis CiF Indian ports .It was down by \$10-15 per tonne in last two-three days.** As prices remain stable in Indian market, demand from Indian importers has come down and pressure is being seen on Myanmar market. Even Urad FAQ and SQ was quoted down by \$10 to \$410 & \$550 per MT. Chana v2 Kabuli and Hollan were offered at \$630 and \$660 per MT at Indian port. Chana CiF price may move up further as domestic market may move up further. Chana stock in private hands is said to be much lower than 2 MMT. Moong Pakaku is being offered at \$765 per MT while rajma at \$1150 per MT.
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as Indian export quotes are high.** Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.

### Pulses International Fundamental:

#### Today's Update:

- **Chickpea market traded steady to slightly lower as supply from farmer's end was seen higher than actual demand.** Demand from North American millers/exporters remained weak. It continued to pressurize chickpea prices. Offering for farmers too

have decreased. Farmers are getting 21% lower price now in comparison to mid Aug-2018. Canadian Farmers too are getting 13 % lower price during the period. As demand remains weak, any spike in global chickpea market is unlikely. Major buyers, India, remains out of the market. Range bound movement might be seen in the short term.

- *USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.*

#### **Previous Update:**

- ***As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year. Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.***
- ***Canadian Dry edible bean and chickpea production in US is expected to increase by 6 % to 1.71 MMT from last year - according to the latest USDA crop production report. Other agencies have projected production in the range of 1.68 to 1.77 MMT this year. Chickpeas production has crossed the production size of pinto bean. However, harvested area is said to be 1 percent lower than last year to 2.01 million acres. Yield estimate has been put at 1884 pounds per acre, higher by 103 pounds per acre from last year. Notably, yield is at record high in Michigan, Minnesota, and Nebraska.***
- ***According to the latest data released from Eurostat Peas export from France in MY 2018-19 through August has not been up to the mark despite higher by 31 % from August-2018. France exported 22415 MT peas in Sep against 17310 MT in August. However, it is 74% lower than shipment in Sep-2017. It was 87310 MT in Sep 2018. Belgium was the most important destination, taking 10,970 MT. Norway was the second most important destination at 6,195 MT, followed by Netherlands at 2,350 and Spain at 1,375 MT.***
- ***Canadian chickpeas market traded unstable during the week under review as temperature in growing belts was seen at freezing point at the time of harvesting. Around 25 % crop is yet to be harvested. Quality concern for standing crop is increasing. Market experts say that crop size may be lower than previous expectation. It may decline from 2.83 to 2.58 lakh tonne as per Canada statistics.***
- ***Global chickpea market traded steady during the week under review, Demand remains weak and higher availability of medium and small chana continues to weigh on market fundamental. Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.***
- ***Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18 due to aggressive buying by Turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global supply side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year. Average price is expected to decrease considerably as global supply side is ample right now. It may hinge in between \$450 to \$485 per MT. Area in US is expected to increase to 0.66 million acres. Production in US may increase to 0.43 MMT in 2018-19.***
- ***With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.***

**Weekly Outlook:** -Pulses are likely to trade range bound.

**Kharif Sowing as on 20<sup>th</sup> Sep-2018:**
