

## Pulses Domestic Fundamentals:

### Today's Update:

- **Tur crop is passing through flowering to fruit formation stages and early sown crop is expected** to hit market by end Nov. Stockists are active as initial report hints lower crop size in Karnataka, Maharashtra, AP & Mp too. Govt expects 42 lakh tonne Tur production this year. However, incoming report hints around 10 % lower crop size this year. Private trades expects 20-25 % lower crop. Agriwatch has projected 38-39 lakh tonne crop this year. If crop continue to face drought like condition, production may decrease further. So Millers in Karnataka and Maharashtra are engaged in active buying. They are buying from Nafed. In Delhi market, millers are not active. They may start fresh buying once after Diwali, it may further drive price up. Overall sentiments hint towards upward momentum.
- **Commencement of moong procurement in Rajasthan, Maharashtra and other states has lent support to moong cash market.** Arrival of quality moong is much lower than expectation. Arrival of poor quality is normal. Millers are buying quality moong actively. despite higher kharif area coverage yield is lower and quality inferior. Moong in Delhi market is being traded at Rs 5400-6000 while in Jaipur market it is being traded at Rs 5500-6000. demand in Raj, Mah, Kar and AP is good and it would push price further up.

### Previous Update:

- **Chana arrival in Delhi market was registered at 25-30 motors. Price of Chana Rajasthan line was quoted at Rs4300 per qtl.** There was no trade at this price. Millers are buying lower quantity based on their need. Fresh buying spree is expected after Diwali. Even south Indian market buyers are active and may prefer to buy from central pool stock as they expect price to improve in coming weeks. Lower post monsoon rainfall and moisture stress in the field may affect early sowing of chana. Overall tone remains steady to firm. Area may decline in AP, Gujarat and Maharashtra. However, ample stock in central pool may cap any unexpected spike. Sowing progress in Nov, weather condition in Dec-Jan remains very crucial for chana price.
- **Dall millers all-round buying, lower crop size & shortage of stock in cash market drive urad and dal price up by Rs 150-200 in last three days.** Arrival in producing region is lower by 50 % now. Besides, govt's agencies are active and procuring Urad under PSS. Urad Dhoya dal too increased by 250-300 per qtl. Emerging scenario hints uptrend to continue in urad cash market. Arrival pressure is almost over due to crop failure in Latur, Udgir, and Shivpuri-Katni line. Stock of imported urad too is lower and importers have started increasing price of urad. Urad FAQ has increase by Rs 500-550 while SQ increased by 800-900 to Rs 5400-5450 per qtl. New crop is due now from Navgachhiya line. Fear of poor quality is still there. Arrival from Kota -Chandausi line to o is decreasing. Analysing the situation exporters in Myanmar have increased quotes to \$500 & \$640 per MT for FAQ and SQ respectively.
- **India exported total 224176 MT chickpea from March to Sep-2018. However, volume of dal and kabuli chana is higher.** In Sep, India exported 26195 MT chickpeas/dal at an average FoB price of \$936.41 per MT. In Aug, it has exported 22568 MT chickpea.. If govt. gives higher incentive (10 to 15% likely), volume of export is likely to go up further. Australia has not much stock to offer due to lower crop size this year (3.51 lakh tonne only).
- **India imported total 47501MT chickpea from Mar to Sep-2018 .Import volume increased from 14430 to 18329MT in Sep.** Average monthly price of imported chickpea is coming down from \$634.56 in Aug to \$597.45 per MT in Sep. Import volume increased by 27.02 % to 18329MT while CIF price decreased by 5.84% to \$ 597.45 per MT.
- **White pea, Chana & Masur stock at Mundra port as on 20th Oct-2018 was registered at 196783, 83587 & 67016MT respectively .It was 22695 MT, 14038MT & 13730 MT at Kandla port.** White pea and Chana stock at Hazira port was registered at 54991 and 13317 MT. In Mumbai white pea stock was registered at 10000MT. Total stock of white pea as on 20 Oct was registered 284469MT, Chana at 97615MT & Masur at 94064MT
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.

### Pulses International Fundamental:

#### Today's Update:

- **USDA production estimate for this year's crop is at higher side at 5.71lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.**
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada. the major difference has been seen in lentil production fig. Unofficial estimate points 23.7lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks.**

#### Previous Update:

- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year. Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.**
- **Canadian Dry edible bean and chickpea production in US is expected to increase by 6 % to 1.71 MMT from last year - according to the latest USDA crop production report. Other agencies have projected production in the range of 1.68 to 1.77 MMT this year. Chickpeas production has crossed the production size of pinto bean. However, harvested area is said to be 1 percent lower than last year to 2.01 million acres. Yield estimate has been put at 1884 pounds per acre, higher by 103 pounds per acre from last year. Notably, yield is at record high in Michigan, Minnesota, and Nebraska.**
- **According to the latest data released from Eurostat Peas export from France in MY 2018-19 through August has not been up to the mark despite higher by 31 % from August-2018. France exported 22415 MT peas in Sep against 17310MT in August. However, it is 74% lower than shipment in Sep-2017. It was 87310 MT in Sep 2018. Belgium was the most important destination, taking 10,970 MT. Norway was the second most important destination at 6,195 MT, followed by Netherlands at 2,350 and Spain at 1,375 MT.**
- **Global chickpea market traded steady during the week under review, Demand remains weak and higher availability of medium and small chana continues to weigh on market fundamental. Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.**
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18 due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.**
- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher**

area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly firm.

**Kharif Sowing as on 20<sup>th</sup> Sep-2018:**
