Pulses Domestic Fundamentals:

Today's Update:

- ***Chana sowing decreased around 40 % to 27.13 lakh ha against 40.46 lakh ha last year as on 07th*** *Nov-2018.Fear of lower crop size increased now.*
- ***There is no good report of standing Tur crop, almost ready to be harvested. Crop is expected to*** *be lower by 8 to 10% from previous estimate of 39 lakh tonne. Millers are active in buying.Stockists too have started restricting sale. Besides, quote in Myanmar too increased by $100 to $580 inlast 10 days.Tur lemon in Delhi market jumped from Rs 3800 to Rs 4350-4400.It is being traded at Rs 4200-4250 in Mumbai.Under emerging condition tur may move up by Rs500 more from current level There is good demand for Tur dal right now. Govt would start procuring new Tur from Dec at MSP, so firmness is likely to continue in the short to medium term.*
- ***Firmness in cash chana market continues on the back of poor arrival in major markets, good festive*** *demand and buyer's increased interest at current level. Millers from Indore are buying chana from Gwalior line while Millers in Delhi are active for Rajasthan and MP line chana. Growing fear of lower crop due to lower area coverage so far and prevailing moisture stress in the field are not favorable for sowing. Dry condition may further delay sowing. Farmers in MP, Maharashtra, AP and Gujarat are waiting for post monsoon rains .In major producing states like Raj, MP and Mah farmers have planted only 50 to 55% chana so far.Under emerging condition chana may move towards 5000 level soon. However, one correction is expected at this level. Chana is being traded at 4675-4700 in Delhi market.*

Previous Update:

- ***All India rabi Pulses area is lagging behind by 10.27 % to 32.07 against 35.74 lakh ha last year as*** *on 2nd Nov-2018.Farmers have covered 22.0 lakh ha against 25.94 last year under Chana till date, lower by 15.19 % from last year. Normal area under chana is 89.45 lakh ha. Rabi Urad area is lagging behind by 2.90 % to 0.67 against 0.69 lakh ha. Normal area of rabi Urad is 8.13 lakh ha. Moong area is running up by 127.27 % to 0.25 lakh ha against 0.11lakh ha last year. Normal area under Moong is 9.62 lakh ha. Other pulses area too is down by 5.08 % than last year .It is 0.56against 0.59lakh ha so far against normal of 3.92 lakh ha. Area under Kulthi has increased by 76.80 % to 2.21 lakh ha against normal of 2.09 lakh ha so far. Rabi sowing is likely to pick up this month*
- ***Dall millers all-round buying ,lower crop size & shortage of stock in cash market drive urad and*** *dal price up by Rs 150-200 in last three days. Arrival in producing region is lower by 50 % now. Besides, govt's agencies are active and procuring Urad under PSS. Urad Dhoya dal too increased by 250-300 per qtl .Emerging scenario hints uptrend to continue in urad cash market. Arrival pressure is almost over due to crop failure in Latur ,Udgir,and Shivpuri-Katni line. Stock of imported urad too is lower and importers have started increasing price of urad. Urad FAQ has increase by Rs 500-550 while SQ increased by 800-900 to Rs 5400-5450 per qtl. New crop is due now from Navgachhiya line. Fear of poor quality is still there. Arrival from Kota -Chandausi line to o is decreasing. Analysing the situation exporters in Mayanmar have increased quotes to $500 &640 per MT for FAQ and SQ respectively.*
- ***Commencement of moong procurement in Rajasthan, Maharashtra and other*** *states has lent support to moong cash market. Arrival of quality moong is much lower than expectation. Arrival of poor quality is normal. Millers are buying quality moong actively. despite higher kharif area coverage yield is lower and quality inferior. Monng in Delhi market is being traded at Rs 5400-6000 while in Jaipur market it is being traded at Rs 5500-6000.demand in Raj, Mah, Kar and APis good and it would push price further up..*
- ***India exported total 224176 MT chickpea from March to Sep-2018.However, volume of dal*** *and kabuli chana is higher. In Sep ,India exported 26195 MT chickpeas/dal at an average FoB price of $936.41 per MT.In Aug ,it has exported 22568 MT chickpea.. If govt. gives higher incentive (10 to 15% likely), volume of export is likely to go up further. Australia has not much stock to offer due to lower crop size this year (3.51 lakh tonne only.*
- ***India imported total 47501MT chickpea from Mar to Sep-2018 .Import volume increased from14430*** *to18329MT in Sep. Average monthly price of imported chickpea is coming down from $634.56 in Aug to $597.45 per MT in Sep. Import volume increased by 27.02 % to 18329MT while CiF price decreased by5.84% to$ 597.45 per MT.*

- ***Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils around $800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.*

Pulses International Fundamental:

Today's Update:

- *Global chickpea markets traded almost mixed. Kabuli traded slightly weak while desi type traded firm due to production concern in Australia. Planting started in mid Oct. Sowing progress in India too is not going well due to moisture stress in the field. Lower crop size in Australia may keep global market supported in coming weeks. Farmers in Australia have covered 1.46 million hectares, compared to 860,000 during the same period last year; while only 730,000 hectares of pulses have been planted so far, down from 2.417 million last year..*

Previous Update:

- ***USDA production estimate for this year's crop is at higher side at 5.71lakh MT. It is around** 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.*
- ***Agriculture department of Canada has estimated 1% higher yield than Statistics Canada. the major** difference has been seen in lentil production fig. Unofficial estimate points 23.7lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks*
- ***As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even** after 20 percent decrease in sowing as yields are expected to be higher compared to last year. Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.*
- ***Global chickpea market traded steady during the week under review, Demand remains** weak and higher availability of medium and small chana continues to weigh on market fundamental. Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400MT for 2018-19.Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18.Prices are likely to move in the range of $450 to $480per tonne.*
- ***Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to agressive buying by turkey and EU.Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year.The average price decreased slightly from $1000 to $950 per MT in 2017-18 due to tight global side side.This year(for 2018-19) production is expected to increase sharply due to higher area .Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced ,almost 90 percent.Totalsupply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19.Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.*
- ***With bearish USDA crop report global chickpea market traded under pressure. However,**lower crop size in Australia &Tanzania may support chickpeas market in coming weeks.Production of chickpea in US may jump to a record level this year.Area under chickpea in US has increased from 623800 acres to 822,000 acres.The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent.Fundamental for chickpea has started changing into positive now.It may continue to support global chickpea market.*

Weekly Outlook: -*Pulses are likely to trade steady to slightly firm.*

Rabi Sowing as on 2nd Nov-2018:

Rabi Pulses Progressive Sowing Area Coverage Till 02.11.2018 (Area in Lakh Ha)
