

Pulses Domestic Fundamentals:

Today's Update:

- **Cloudy weather and possibility of some light rains in coastal area of AP, Tamil Nadu, central and west India may help farmers to increase sowing activities and it may cap uptrend for a while. Farmers are desperately waiting for good rainfall. As of now situation is not favorable for sowing in central and north India. Cash pulses market may trade slightly lower despite inner tone remains firm.**
- **Burma offers lemon tur at \$520 per MT basis CiF Indian port. Linkly and old too are offered at same price. Situation for standing Tur crop in India is not good and exporters in Myanmar are well aware of the fact. They may increase quotes further for forward delivery.**
- **Urad FAQ is being offered at \$600 per MT and SQ at \$730 basis Indian port. It is obvious that availability of quality crop in India is lower and prospects for rabi too is not looking good. So CiF quotes in Myanmar are increasing. Chana Kabuli and Hollan are being offered at \$650 per MT basis Cif Indian port. Moong Pakaku is being offered at \$735 per MT.**

Previous Update:

- **Rabi pulses sowing was down by 28.11% to 39.06 lakh ha. as on 9th Nov-2018 .Chana sowing has been reported down by 32.92 % to 27.14 against 40.46 lakh ha, Masur sowing was down by 41.10 % to 3.11 lakh ha against 5.28 lakh ha, Pea sowing was reported down by 25.67 % to 2.49 against 3.35 lakh ha, Urad sowing was recorded 13.68% down by 0.82 lakh ha against 0.95 lakh ha and moong sowing was up by 61.11 % to 0.259 against 0.18 lakh ha.**
- **Crop failure in Rajasthan has started impacting supply availability in north India and stockists have restricted selling in anticipation of further upward momentum in the near to medium term. Nafed has stopped selling through tender, so millers are dependent on private market. In cash market moong is being traded at 5300-5600 per qtl and buyers are silent and increasing selling price. Quality moong is being sold at Rs5200-5400 in Ranchi, while in Jodhpur market it is being sold at Rs5800-6000 per qtl. New crop is from rabi season would be available from Feb-Mar amid procurement at MSP would further push moong price up. Myanmar too has increased CiF quote from \$735 to \$740 in last one week. Availability in Burma is lower too. Overall sentiments remain firm.**
- **Dall millers all-round buying ,lower crop size & shortage of stock in cash market drive urad and dal price up by Rs 150-200 in last three days. Arrival in producing region is lower by 50 % now. Besides, govt's agencies are active and procuring Urad under PSS. Urad Dhoya dal too increased by 250-300 per qtl .Emerging scenario hints uptrend to continue in urad cash market. Arrival pressure is almost over due to crop failure in Latur ,Udgir, and Shivpuri-Katni line. Stock of imported urad too is lower and importers have started increasing price of urad. Urad FAQ has increase by Rs 500-550 while SQ increased by 800-900 to Rs 5400-5450 per qtl. New crop is due now from Navgachhiya line. Fear of poor quality is still there. Arrival from Kota -Chandausi line to o is decreasing. Analysing the situation exporters in Myanmar have increased quotes to \$500 & \$640 per MT for FAQ and SQ respectively.**
- **India exported total 224176 MT chickpea from March to Sep-2018. However, volume of dal and kabuli chana is higher. In Sep ,India exported 26195 MT chickpeas/dal at an average FoB price of \$936.41 per MT. In Aug ,it has exported 22568 MT chickpea.. If govt. gives higher incentive (10 to 15% likely), volume of export is likely to go up further. Australia has not much stock to offer due to lower crop size this year (3.51 lakh tonne only).**
- **India imported total 47501MT chickpea from Mar to Sep-2018 .Import volume increased from 14430 to 18329MT in Sep. Average monthly price of imported chickpea is coming down from \$634.56 in Aug to \$597.45 per MT in Sep. Import volume increased by 27.02 % to 18329MT while CiF price decreased by 5.84% to \$ 597.45 per MT.**
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as Indian export quotes are high. Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.**

Pulses International Fundamental:**Today's Update:**

- **Global chickpea markets traded almost mixed. Kabuli traded slightly weak while desi type traded firm** due to production concern in Australia. Planting started in mid Oct. Sowing progress in India too is not going well due to moisture stress in the field. Lower crop size in Australia may keep global market supported in coming weeks. Farmers in Australia have covered 1.46 million hectares, compared to 860,000 during the same period last year; while only 730,000 hectares of pulses have been planted so far, down from 2.417 million last year..

Previous Update:

- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada. the major difference has been seen in lentil production fig.** Unofficial estimate points 23.7 lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even** after 20 percent decrease in sowing as yields are expected to be higher compared to last year. Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.
- **Global chickpea market traded steady during the week under review, Demand remains weak** and higher availability of medium and small chana continues to weigh on market fundamental. Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.
- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas market in coming weeks.** Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Rabi Sowing as on 9th Nov-2018:

Rabi Pulses Progressive Sowing Area Coverage Till 09.11.2018 (Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported
