

Pulses Domestic Fundamentals:

Today's Update:

- **Rabi pulses progressive sowing area coverage till 16 Nov-2018 was reported 69.96 lakh ha against normal of 141.07 in ongoing rabi season.** Last year rabi acreage was 18 % higher than this year till date to 85.32 lakh ha. Chana area is running down by 21.52% to 50.23 lakh ha (last year 64.00 lakh ha). Normal area under chana is 89.45 lakh ha. Lentil area is running behind by 20.63 % to 6.81 lakh ha against 8.58 lakh ha last year till date. Normal area under lentil is 13.94 lakh ha. Even pea area is down by 12.04 % to 4.09 lakh against 4.65 lakh ha as on 16 Nov-2018. Normal area under pea is 9.34 lakh ha. However, Urad area is up by 7.69 % to 1.68 lakh ha against 1.56 lakh ha last year. Normal area under rabi urad is 8.13 lakh ha. Moong area is 30.56 % higher 0.47 lakh ha against 0.36 lakh ha so far. Normal area under rabi moong is 9.62 lakh ha.

Previous Update:

- **Stock of urad at Indian port is down considerably and bulk import is not possible as stock in Burma** is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$630 and \$775 per MT basis Cif at Indian ports. Price of urad in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets. Even supply from Katni line is lower than normal expectation. Traders-millers in Kanpur are active in Katni line. New crop is far away right now so, Agriwatch expects market to improve once again.
- **New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Uzbekistan** is higher at around Rs 7700-7800 and Rs 6700-6800 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market and prices are increasing. However, Agriwatch expects market to decrease by Rs100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5300 while Jodhpur line is being traded at Rs5800. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm. Moong procurement on MSP in many states and decision to stop selling through auction would remain supportive for moong market in Dec.
- **Stock of desi chana in Bikaner line is decreasing fast. Millers have brought maximum stock offered in tenders** at comparatively lower price from cash market. Area coverage is lagging behind and sowing condition is not good in Central, North and South India so far. Under these emerging conditions demand for chalani dal is increasing. It may drive cash market further up by 150-250 from current level. Futures too are ruling at par with MSP. So, Agriwatch expects market to trade firm after a slight downward correction.
- **Tur** market traded slightly lower due to selling of lemon tur by importers at lower rate. Besides, millers too restricted buying in bulk that pushed cash market down by Rs100. But overall sentiments remain firm as incoming crop is not good yield-wise and production is bound to decline to 36-37 lakh tone this year. Nafed and other agencies would try to offload maximum stock at higher level. It would cap any hope for spike in the near term. However, medium term outlook remains firm despite import parity from Myanmar to some extent. India can't import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So, Agriwatch expects cash market to move up from current level.
- **Burma offers lemon tur at \$520 per MT basis Cif Indian port. Linkly and old too are offered at same price.** Situation for standing Tur crop in India is not good and exporters in Myanmar are well aware of the fact. They may increase quotes further for forward delivery. Urad FAQ is being offered at \$600 per MT and SQ at \$730 basis Indian port. It is obvious that availability of quality crop in India is lower and prospects for rabi too is not looking good. So Cif quotes in Myanmar are increasing. Chana Kabuli and Hollan are being offered at \$650 per MT basis Cif Indian port. Moong Pakaku is being offered at \$735 per MT.
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.

Pulses International Fundamental:

Today's Update:

- **Global chickpea market continued to trade slightly weak due to ample availability of stock in exporters hand against actual demand from importers.** Quality issue with Canadian and some issues related to crop in Argentina could not support medium calibri chana. However, some extra demand emerged from the United States and other origins for better quality. As per Saskatchewan Agriculture estimate 58% of the province's chickpea crop will grade No 1 Canada, 37% No 2 Canada, and 5% No 3 Canada or worse. Last year, roughly 78% chickpeas graded No 1 and 22% No 2 in Canada. This means availability of poor quality crop would be higher.

Previous Update:

- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada.** the major difference has been seen in lentil production fig. Unofficial estimate points 23.7 lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year.** Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.
- **Global chickpea market traded steady during the week under review, Demand remains weak and higher availability of medium and small chana continues to weigh on market fundamental.** Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.
- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Rabi Sowing as on 16th Nov-2018:

Rabi Pulses Progressive Sowing Area Coverage Till 16.11.2018 (Area in Lakh Ha)
