

Pulses Domestic Fundamentals:

Today's Update:

- **Chana area is likely to decrease as sowing is running behind amid moisture stress prevailing in the field.** Farmers have covered 13% lower area under chana to 62.65 lakh ha as on 22nd Nov-2018 against 71.98 last year till date. In AP area is 33% lower to 1.83 lakh ha against 2.76 lakh ha last year so far. Normal area under chana in AP is 4.50 lakh ha. As sowing is almost over in AP, any major change in area is unlikely. Production in AP is bound to decrease this year. Major producers like Maharashtra, Karnataka, MP and UP, it is running behind by 36.9, 18.8, 4.0 & 2.8 % to 6.55, 9.91, 26.54 & 4.23 lakh ha respectively. However, area coverage in Rajasthan increased by 1.7 % to 11.11 lakh ha. Normal area under chana is 89.45 lakh ha. Area under chana is likely to cross normal level but would be lower by 10 lakh ha from previous year. So production size is bound to decrease.
- **India imported total 19707.72 MT tonne chickpea at an average CiF of \$519.03 per MT in October-2018.** It is slightly higher than 18329.3 MT imported in Sep-2018. Importers have imported chickpeas at an average price of \$597.45 MT in Sep. Average imported price declined in Oct from \$597.45 to \$519.03 per MT. Total Chickpea/dal import from March to Oct was registered at 67209 MT. Against it chickpea export was registered at 244745.9 MT from Mar to Oct-2018. Indian exported 20570 MT chickpea/dal in Oct against 26194.87 MT in Sep. For other pulses see table given below at page no.3.

Previous Update:

- **India imported total 19707.72 MT tonne chickpea at an average CiF of \$519.03 per MT in October-2018.** It is slightly higher than 18329.3 MT imported in Sep-2018. Importers have imported chickpeas at an average price of \$597.45 MT in Sep. Average imported price declined in Oct from \$597.45 to \$519.03 per MT. Total Chickpea/dal import from March to Oct was registered at 67209 MT. Against it chickpea export was registered at 244745.9 MT from Mar to Oct-2018. Indian exported 20570 MT chickpea/dal in Oct against 26194.87 MT in Sep. For other pulses see table given below at page no.3.
- **Rabi pulses progressive sowing area coverage till 22nd Nov-2018 was reported 88.66 lakh ha against normal of 140.84 in ongoing rabi season.** Last year rabi acreage was 10.45 % higher than this year till date to 99.01 lakh ha. Chana area is running down by 12.96 % to 62.65 lakh ha (last year 71.98 lakh ha). Normal area under chana is 89.45 lakh ha. Lentil area is running behind by 9.07 % to 10.22 lakh ha against 11.24 lakh ha last year till date. Normal area under lentil is 13.77 lakh ha. Even pea area is down by 7.53 % to 5.77 lakh ha against 6.24 lakh ha as on 22 Nov-2018. Normal area under pea is 9.33 lakh ha. However, Urad area is up by 2.89 % to 1.78 lakh ha against 1.73 lakh ha last year. Normal area under rabi urad is 8.14 lakh ha. Moong area is 10.42 % higher 0.53 lakh ha against 0.48 lakh ha so far. Normal area under rabi moong is 9.62 lakh ha.
- **Stock of urad at Indian port is down considerably and bulk import is not possible as stock in Burma** is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$630 and \$775 per MT basis Cif at Indian ports. Price of urad in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets. Even supply from Katni line is lower than normal expectation. Traders-millers in Kanpur are active in Katni line. New crop is far away right now so, Agriwatch expects market to improve once again.
- **Tur market traded slightly lower due to selling of lemon tur by importers at lower rate.** Besides, millers too restricted buying in bulk that pushed cash market down by Rs100. But overall sentiments remain firm as incoming crop is not good yield-wise and production is bound to decline to 36-37 lakh tone this year. Nafed and other agencies would try to offload maximum stock at higher level. It would cap any hope for spike in the near term. However, medium term outlook remains firm despite import parity from Myanmar to some extent. India can't import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So, Agriwatch expects cash market to move up from current level.
- **Burma offers lemon tur at \$520 per MT basis CiF Indian port. Linkly and old too are offered at same price.** Situation for standing Tur crop in India is not good and exporters in Myanmar are well aware of the fact. They may increase quotes further for forward delivery. Urad FAQ is being offered at \$600 per MT and SQ at \$730 basis Indian port. It is obvious that availability of quality crop in India is lower and prospects for rabi too is not looking good. So CiF quotes in Myanmar are increasing. Chana Kabuli and Hollan are being offered at \$650 per MT basis Cif Indian port. Moong Pakaku is being offered at \$735 per MT.
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils

offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.

Pulses International Fundamental:

Today's Update:

- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in** For MY 2018-19. Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada,** may reduce pea production by 9 % to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US has been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.

Previous Update:

- **Global chickpea market continued to trade slightly weak due to ample availability of stock in** exporters hand against actual demand from importers. Quality issue with Canadian and some issues related to crop in Argentina could not support medium calibrichana. However, some extra demand emerged from the United States and other origins for better quality. As per Saskatchewan Agriculture estimate 58% of the province's chickpea crop will grade No 1 Canada, 37% No 2 Canada, and 5% No 3 Canada or worse. Last year, roughly 78% chickpeas graded No 1 and 22% No 2 in Canada. This means availability of poor quality crop would be higher.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada. the major** difference has been seen in lentil production fig. Unofficial estimate points 23.7 lakh MT production for lentil, which is almost 6% higher than Statistics Canada. Harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in** sowing as yields are expected to be higher compared to last year. Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.
- **With bearish USDA crop report global chickpea market traded under pressure. However,** lower crop size in Australia & Tanzania may support chickpeas market in coming weeks. Production of chickpea in US may jump to a record level this

year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Rabi sowing as on 22nd Nov-2018:

Rabi Pulses Progressive Sowing Area Coverage Till 22.11.2018 (Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported			
		This Year 2018-19	% of Normal for the whole season	Last Year 2017-18	% diff. till date from last year
