

Pulses Domestic Fundamentals:

Today's Update:

- Rabi pulses area decreased by 6.34 % to 140.67 lakh ha against 150.19 lakh ha last year as on 28 Dec-2018. Chana area is running behind by 10.63 % to 91.64 lakh ha against 98.40 last year till date. Farmers have covered 2.89 % lower area under lentil so far to 16.40 ha against 16.89 lakh ha last year. Pea area is up by 9.12 % to 9.97 lakh ha. Urad area is running behind by 8.95 % to 5.87 lakh ha against 6.45 lakh ha last year. However, moong area is running up by 5.42 % to 3.08 lakh ha against 2.92 lakh ha so far. As sowing is getting delayed, area under rabi pulses unlikely to touch last year level.. See sowing table on page no 3. Chana area decreased by 10.63 % and it helped chana cash market to recover. However, any spike is unlikely in coming weeks.
- Weak demand for urad dal discouraged buyers to continue buying. It caused the market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt. may decide to ban illegal import completely. Burma is offering urad FAQ and SQ at \$515 and \$645 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

Previous Update:

- Buyers remain reluctant to buy at current price sensing weak inner tone in chana cash market. However, selling decreased in decreasing market. Any spike in near term seems a remote possibility despite increasing fear of lowe production next year. Nafed has ample stock and selling still continues. New crop in South India is hardly two months away. So, stake holders should avoid trading assuming any major jump in chana market in the short term. Nafed has sold only 3.6 lakh tonne chana so far out of 27.24 lakh tonne. In Delhi market Chana is being traded at Rs 4575-4600 while Australian chana is being quoted at Rs 4750-4800. However, there was no trade reported at this price. Agriwatch expects chana market to move further down by Rs 100-150 from current level. Despite higher duty import continues amid weak demand for dal. So, steady to weak tone may prevail in chana cash market this week.
- India exported 16360.19 MT chickpea in Nov-2018 against 20569.83 MT in Oct this year. Against it India imported 24878.61 MT chana against 19707.72 MT in oct .In comparison to Oct chana import in Nov has increased from 19707.72 to 24878.61 MT in Nov. While at export front, chickpea export decreased from 20569.83 to 16360.19 MT in Nov. Total chana import and export from Mar to Nov-2018 were reaistered at 92087.61 MT and export at 261106.1 MT
- Total pulses import in Nov increased from 231826.99 to 260334.61 MT.The highest increased was seen in Urad import which increased from 76376.59MT in Oct to 115542.2 MT in Nov.Moong import decreased from 4243.07 to only 92.2MT in Nov. Even Kidney bean import increased from 5234.45 to 8041.17 MT in Nov-2018. Higher import of urad restricted urad price in domestic market and if import continues with current volume, it would continue to cap urad price in domestic market.
- Stock of lemon tur at Mumbai, Chennai, Kolkata port is not up to the mark. Pressure of Kartik crop is almost over now. Right now supply continues from Karnataka. However, higher price in Karnataka has negate the parity for central and north India. Even mills located in Karnataka are consuming old imported stock. The main region behind it is unwillingness of traders to buy Patka dal above 6100-6200 per qtl. If central and north Indian millers buy it, its costing goes up to the level of 7300-7500. Even in Karnataka it will cost-7000-7100. It has increased lemon tur price in Mumbai at Rs4500 in last two days. Sentiments remains firm.
- This year pressure of Rajasthan Moong was not seen in any cash market. The main reason behind it is lower supply from Kekri-Kishan garh line. Normally, supply from this region used to continue till Dec, but this year, it started drying up from Oct end. At this line local mills remain active and brought maximum stock. Supply from Jodhpur line was continued, however, buying by Jalgaon and Jaisalmer's millers has pushed prices up. Even supply from Shekhavati line is higher at Rs5450-5550 per qtl. Ther is no arrival from Allahabad, Kanpur and Ranchi line now .So Agriwatch expects improvement in price as soon as demand for dal increases.
- Recent rains in MP and Chhatisgarh have provided much life support to standing masur crop. However, lower area coverage
 would continue to support market as stockof Masur is decreasing continuously in major markets. Import flow too remains
 restricted and it would cause short supply in masur in coming months. Importers are facing money crunch and are unable to

strike forward deal. Stock with MMTC too have drying up. So Agriwatch expects market to move up from current level. New crop is expected from mid Feb.

Pulses International Fundamental:

Today's Update:

- Burma offers lemon tur,old and linkely at \$ 530 per MT basis Indian port. Urad FAQ is being offered at \$540 and SQ at \$660 per MT. Chana kabuli is being offered at \$590 while Hollan at \$600 per MT basis Indian port. Mung Pakaku is being offered at \$750. Red Rajma is being offered at \$1150per MT basis Indian port.
- Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- Global Chickpea market remains almost unaffected from final production data in Canada. USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.
- As per Canadian Grain Commission update Canada has exported 1,82,800 MT field pea in the month of Oct-2018. It does not include lentil exported in containers from non-reporting terminals. This lifted bulk export loadings for field peas to 592,3 MT so far this marketing year, down 30% from the 845,600 loaded during the same period in the previous marketing year.
- As per Canadian Grain Commission update Canada has exported 22,700 MT lentils in the month of Oct-2018. It is higher by 4500MT exported in Oct-2017. Canada has exported total 1,25,400 MT lentil in current MY. It was,88,000 MT last year till date. Improvement in export sales is likely to continue in Nov & Dec too. However, bulk loading is said to be lower than Sep-2018.

Previous Update:

- Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne for MY 2018-19.Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India export is expected to increase from 15.40 to 19 lakh tonne in MY2018-19.Domestic consumption has been pegged at 4. 2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada, may reduce pea production by 9 % to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. from Aug to Sep China, B, desh and US has been main buyres for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- USDA production estimate for this year's crop is at higher side at 5.71lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18 due to agressive buying by turkey and EU.Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side side. This year (for 2018-19) production is expected to increase sharply due to higher area . Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT

due to higher production estimate in 2018-19.Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.

Weekly Outlook: -Pulses are likely to trade range bound.
