

Pulses Domestic Fundamentals:

Today's Update:

- **Central govt. has allowed to export tur,moong and urad dal from India.It may help market to recover in the medium term.Exporters are expecting export incentives to be competitive in global market.Right now parity is not in favor of India as dal is available at very competitive price in global market.Myanmar.African countries are supply it at lower price.**
- **Govt has allowed export for Tur dal and it would support cash market from Jan end.As new arrivals in major markets are increasing, prices of tur may stay steady at current level.Private buyers are active and procurement drive is yet to begin,so Agriwatch expects firmness from mid Jan,supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end.In Gulberga market tur is being traded at Rs 4800-4900 per qtl.It may decrease by Rs 100 with increasing arrivals.However, with commencement of procurement,it would cross 5000 by mid Jan.**
- **More than one lakh tonne import in Nov & around 2 lakh tonne combined in Oct- Nov impacted urad cash market negatively during last two weeks despite 8.95% lower rabi acerage.Higher import and weak demand distorted market sentiment and it decreased by Rs 200 in cash market to Rs 4300-4400 per qtl. Now , market is expected to adjust excess supply from imported stock and may find balance once again in coming weeks.This week it may trade range bound and as soon as demand improves,it would move up once again.**
- **Demand for moong and dal was registered weak during review week and it affected firm sentiments.Higher availability of poor quality moong and its continuous supply have capped market right now.Demand is expected to improve from jan end.Besides,area under rabi moong is up by 5.42 % to 3.08 lakh ha so far.So,any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevailthis week in cash moong market.**
- **New chana in south India has started trickling in market.Production is likely to decrease due to unfavorable weather condition. Sensing lower production govt. seems alert and have instructed Nafed to go slow for pulses selling.Demand for chana and dal is likely to be nrmal.So Agriwatch expects market to stay steady to slightly firm in coming weeks. Chana and chana dal traded lower during review week.Actually weak demand for dal pressurized dal market.However, improvement in demand is expected now once again. In Delhi market chana is being traded at 4550-4600 per qtl while dal is being traded at Rs5600-5700 per qtl.**
- **Increasing cold in masur growing belt has started affecting standing crop and if it continues for more 10 days,it may impact yield 10 to 20 % from normal.So next 10 days are very crucialfor masur crop and its price trend.Market is trading steady currently,but may move up further if cold wave continues.**

Previous Update:

- **The restriction on pea import would continue and govt has extended it'stime from 31st Dec-2018 to Mar-2019.It has been notified by this week.It would be applicable from 1st Jan-2019 and end on 31st March-2019.As stock is lower at port, prices of pea are likely to improve by Rs100 -150 with this extended time restriction for import. Weak demand and easy availability of chana remain restrictive for pea market in the near to medium term. There is weak demand from besan udhog too as it is using imported chana from Sudan, available at cheaper price.**
- **Rabi pulses area decreased by 6.34 % to 140.67 lakh ha against 150.19 lakh ha last year as on 28 Dec-2018.Chana area is running behind by 10.63 % to 91.64 lakh ha against 98.40 last year till date. Farmers have covered 2.89 % lower area under lentil so far to 16.40 ha against 16.89 lakh ha last year. Pea area is up by 9.12 % to 9.97 lakh ha. Urad area is running behind by 8.95 % to 5.87 lakh ha against 6.45 lakh ha last year. However, moong area is running up by 5.42 % to 3.08 lakh ha against 2.92 lakh ha so far. As sowing is getting delayed, area under rabi pulses unlikely to touch last year level.. See sowing table on page no 3.Chana area decreased by 10.63 % and it helped chana cash market to recover. However, any spike is unlikely in coming weeks.**
- **Total pulses import in Nov increased from 231826.99 to 260334.61 MT.The highest increased was seen in Urad import which increased from 76376.59MT in Oct to 115542.2 MT in Nov.Moong import decreased from 4243.07 to only 92.2MT in Nov. Even Kidney bean import increased from 5234.45 to 8041.17 MT in Nov-2018.Higher import of urad restricted urad price in domestic market and if import continues with current volume,it would continue to cap urad price in domestic market.**

Pulses International Fundamental:

Today's Update:

- **Burma offers lemon tur, old and linkely at \$ 525 per MT basis Indian port. Urad FAQ is being offered at \$545 and SQ at \$650 per MT. Chana kabuli is being offered at \$590 while Hollan at \$600 per MT basis Indian port. Mung Pakaku is being offered at \$730. Red Rajma is being offered at \$1140 per MT basis Indian port.**

Previous Update:

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year**
- **Global Chickpea market remains almost unaffected from final production data in Canada. USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.**
- **As per Canadian Grain Commission update Canada has exported 1,82,800 MT field pea in the month of Oct-2018. It does not include lentil exported in containers from non-reporting terminals. This lifted bulk export loadings for field peas to 592,3 MT so far this marketing year, down 30% from the 845,600 loaded during the same period in the previous marketing year.**
- **As per Canadian Grain Commission update Canada has exported 22,700 MT lentils in the month of Oct-2018. It is higher by 4500 MT exported in Oct-2017. Canada has exported total 1,25,400 MT lentil in current MY. It was 88,000 MT last year till date. Improvement in export sales is likely to continue in Nov & Dec too. However, bulk loading is said to be lower than Sep-2018.**
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne for MY 2018-19. Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.**
- **Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada, may reduce pea production by 9% to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US has been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.**
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80% higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.**
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18 due to aggressive buying by Turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT**

due to higher production estimate in 2018-19.Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year.

Weekly Outlook: -Pulses are likely to trade weak

Rabi Sowing as on 28th Dec-2018:
