

## ***Pulses Domestic Fundamentals:***

### **Today's Update:**

- ***Moong procurement target in Rajasthan was set 2.39 lakh tonne. Against it around 2.28 lakh tonne has been procured so far. It is over 95 % of the target. Similarly, urad procurement target was 88 thousand tonne. Against it over 75 thousand tonne has been procured and it is over 85% of the target. Seeing the current pace of procurement, procurement may exceed the target in coming weeks.***
- ***Madras high court has extended hearing on pulses import issue to next date on 11<sup>th</sup> Jan-2019 Market expects result soon. There is a common view in the market that court will give decision in favor of govt. It means higher import than permitted quantity would not be allowed in any case. So, firmness in pulses in the medium term depends on court's decision. If decision does not come on 11<sup>th</sup> Jan evening, it would be delayed by 8 to 10 days due to one week holiday for Makar Sankranti in Tamil Nadu.***

### **Previous Update:**

- ***Cash lentil market traded Rs100-125 up from previous close and is likely to trade further up due to local and countryside demand. Supply side in coming months is expected to be tight as standing crop is not in good shape right now. Import cost is higher and demand continues. If cold wave in MP and UP continues, crop size would be lower than normal expectation. It would remain supportive for cash lentil market. Stock retained in central pool might be distributed through PDS, so supply in cash market would be tight until new crop hits the market in mid Feb.***
- ***Rabi pulses area decreased by 6.44 % at 143.56 lakh ha against 153.44 lakh ha last year as on 4th Jan-2019. Chana area is lagging by 10.86 % at 92.89 lakh ha against 104.21 last year. Farmers have covered 2.14 % lower area under lentil so far at 16.61 lakh ha against 16.97 lakh ha last year. Pea area is up by 10.21% at 10.10 lakh ha. Urad area is lagging by 10.17 % at 6.16 lakh ha against 6.86 lakh ha last year. Moong area too is lower by 0.44 % at 3.65 lakh ha against 3.67 lakh ha so far. Overall rabi area is unlikely to match last year's level as sowing has entered in last phase now. See sowing table on page no 3 for details.***
- ***Continued cold wave in parts of chana growing region in MP is likely to affect standing crop of chana, which are under flowering stages. In Maharashtra, moisture stress is still affecting late sown crop. Area under chana is almost 10 % lower and farmers in AP are unwilling to sell new crop at prevailing market price. Chana prices have decreased due to weak demand from mills. Nafed continuous selling and weak futures. However, fundamental for chana remains firm and market is expected to recover by end Jan once again. Nafed would reserve 4 lakh MT chana stock for PDS in MP. Nafed has 15.64 lakh tonne chana in stock in MP. This week too market would continue to trade under pressure.***
- ***Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed in various states has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnataka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including Markfed procurement. The rest quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement.***
- ***The restriction on pea import would continue and govt has extended it's time from 31st Dec-2018 to Mar-2019. It has been notified by this week. It would be applicable from 1st Jan-2019 and end on 31st March-2019. As stock is lower at port, prices of pea are likely to improve by Rs100 -150 with this extended time restriction for import. Weak demand and easy availability of chana remain restrictive for pea market in the near to medium term. There is weak demand from besan udhog too as it is using imported chana from Sudan, available at cheaper price.***
- ***Weak demand for urad dal discouraged buyers to continue buying. It caused the market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt. may decide to ban illegal import completely. Burma is offering urad FAQ and SQ at \$515 and \$645 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.***
- ***Stock of lemon tur at Mumbai, Chennai, Kolkata port is not up to the mark. Pressure of Kartik crop is almost over now. Right now supply continues from Karnataka. However, higher price in Karnataka has negate the parity for central and north India. Even mills located in Karnataka are consuming old imported stock. The main region behind it is unwillingness of traders to buy Patka dal above 6100-6200 per qtl.***

### Pulses International Fundamental:

#### Today's Update:

- **Lentil production in Canada is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19.
- **Supply increased slightly due to large carry-in stocks. Export has been forecast to increase to 18lakh tonne.** To-date Mexico, United Arab Emirates and India are the top export markets. Imports are expected to be lower than the previous year due to the above average grade distribution. Carry-out stocks are expected to fall due to the increase in exports. The overall average price is forecast to fall below the levels achieved in 2017-18 due to weaker world demand, larger domestic carry-out stocks and an above average proportion of grade distribution at the No.1 or 2 grade.
- **News is circulating in market that tur crop in Myanmar is 40 to 45 % lower than last year** and its impact is visible on port where it is being loaded. Import quotes are steady \$525 and is expected to move up soon as India crop too is not good this year. Total crop size may not be more than 35 lakh tonne this year. So, price of tur is bound to move up despite higher carry out stock.

#### Previous Update:

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- **Global Chickpea market remains almost unaffected from final production data in Canada.** USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.
- **As per Canadian Grain Commission update Canada has exported 1,82,800 MT field pea in the month of Oct-2018.** It does not include lentil exported in containers from non-reporting terminals. This lifted bulk export loadings for field peas to 592,3 MT so far this marketing year, down 30% from the 845,600 loaded during the same period in the previous marketing year.
- **As per Canadian Grain Commission update Canada has exported 22,700 MT lentils in the month of Oct-2018.** It is higher by 4500MT exported in Oct-2017. Canada has exported total 1,25,400 MT lentil in current MY. It was, 88,000 MT last year till date. Improvement in export sales is likely to continue in Nov & Dec too. However, bulk loading is said to be lower than Sep-2018.
- **Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada,** may reduce pea production by 9 % to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US has been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- **USDA production estimate for this year's crop is at higher side at 5.71lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.

**Weekly Outlook:** -Pulses are likely to trade weak.

#### **Rabi Sowing as on 04<sup>th</sup> Jan-2019:**

Rabi Pulses Progressive Sowing Area Coverage Till 04.01.2019 ( Area in Lakh Ha)
