

Pulses Domestic Fundamentals:

Today's Update:

- ***Rabi pulses area decreased by 5.57 % at 149.01 lakh ha against 157.80 lakh ha last year as on 18thJan-2019. Chana area is lagging by 9.96 % at 95.40 lakh ha against 105.95 last year. Farmers have covered 1.93 % lower area under lentil so far at 16.85 lakh ha against 17.18 lakh ha last year. Pea area is up by 10.93 % at 10.31 lakh ha. Urad area is lagging by 9.99 % at 6.75 lakh ha against 7.50 lakh ha last year. Moong area too is up by 1.82 % at 4.98 lakh ha against 4.89lakh ha so far. Overall rabi area is unlikely to match last year's level as sowing has entered the last phase ,almost over now. See sowing table on page no 3 for details.***

Previous Update:

- ***Chana traded slightly up taking clue from restricted arrivals from new crop in Maharashtra and Andhra Pradesh. In futures market, bears are trying to pressurize cash market against prevailing fundamentals. Chana traded at Rs 4450-4460 in Delhi market. Improved demand helped dal market to recover by Rs 25 to 40 per qtl. There is a common view in the market that buying chana in physical market at this level seems riskless. There is no pressure of arrival in Karnataka too. Crop condition in MP and Rajasthan is not satisfactory. If weather turns rough in Feb, it may push up chana cash market from current level. However, any major spike in the near term is unlikely ahead of new crop.***
- ***Tur cash market is likely to trade up and it may continue to move up further by Rs200-300 per qtl. from current level. Karnataka govt would buy Tur at Rs6100 per qtl, higher by Rs425 per qtl from MSP. Arrival in major markets is comparatively lower and private buyers are active. Only Telangana govt is procuring tur right now. Procurement in other states would likely by end Jan or mid Feb. Crop size is lower. So Agriwatch expects price to touch MSP level soon. Stockists should start releasing stock at that level. After touching MSP, higher selling might be seen, that may depress price in March & April. Seasonal chart too shows downward move in March April. However, if weather turns rough in Feb-Mar and govt restrict import, any major downfall is unlikely. Tur may trade in between 4900-5700 in the medium term in prevailing market condition.***
- ***Urad Trades Weak On Weak Demand, Firmness Depends On Madras High Court Decision*** Buying for imported Urad in cash Mumbai market was seen weak as traders preferred to wait decision on import restriction pending in Madras High Court. After hearing arguments of both parties the court has reserved decision and it is expected by the end of this week. It is clear that stay will not be given now. Hope for higher supply from Myanmar too remained price limiting factors. There is a news in local market that around 2000 containers of dals are bound to set from Myanmar to Chennai /Kolkatta port from 18 to 23 jan-2019. Demand for dal is weak and new URAD fAQ is being traded at Rs 4450-4500 in Mumbai market. Price impacting factor is court's decision. Govt may impose duty on import to check flow of Urad beyond limit of 1.5lakh tonne.
- ***Out of total 27.24 lakh tonne chana procurement, Nafed has sold 4.69 lakh tonne so far in various states. The highest quantity is available in MP. Out of 15.81 lakh tonne, Nafed has sold only 2.58% so far and it has still 15.41 lakh left in its stock. Nafed has sold 20% stock so far out of 5.80 lakh tonne in Rajasthan and 4.63 lakh tonne still available in its stock. AP, Telangana & Karnataka have sold out 92.74, 86.39 & 68.83% stock so far and have 6669, 6805 & 41834 MT chana available in Nafed stock. There is no selling in UP. In Maharashtra, Nafed has sold out 21.45 % stock so far and 1.42 lakh tonne is still left. Nafed in Gujarat has sold 58 % stock so far and 38138 MT is still left in Nafed godown. Nafed in MP would not sell 4 lakh tonne chana in open market in MP and it would be supplied to PDS. As new crop has started entering in AP and Mah mandis, supply side is expected to remain at comfortable level despite lower crop size in the short to medium term. Recovery might be expected in the second half of the year.***
- ***Continued cold wave in parts of chana growing region in MP is likely to affect standing crop of chana, which are under flowering stages. In Maharashtra, moisture stress is still affecting late sown crop. Area under chana is almost 10 % lower and farmers in AP are unwilling to sell new crop at prevailing market price. Chana prices have decreased due to weak demand from mills Nafed continuous selling and weak futures. However, fundamental for chana remains firm and market is expected to recover by end Jan once again. Nafed would reserve 4 lakh MT chana stock for PDS in MP. Nafed has 15.64 lakh tonne chana in stock in MP. This week too market would continue to trade under pressure.***
- ***Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed in various states has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnatka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including Markfed procurement. The rest quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement.***

Pulses International Fundamental:

Today's Update:

- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 6,167,4,668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Lentil markets traded firm tone on the back of strong opening season export pace and a relatively positive demand outlook.** By the end of November, Canada's lentil exports pushed ahead of last year, totaling just over 588,000 metric tons (MT) between August and November, compared to around 510,000 during the same period last season.

Previous Update:

- **Lentil production in Canada is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19.
- **Supply increased slightly due to large carry-in stocks. Export has been forecast to increase to 18 lakh tonne.** To-date Mexico, United Arab Emirates and India are the top export markets. Imports are expected to be lower than the previous year due to the above average grade distribution. Carry-out stocks are expected to fall due to the increase in exports. The overall average price is forecast to fall below the levels achieved in 2017-18 due to weaker world demand, larger domestic carry-out stocks and an above average proportion of grade distribution at the No.1 or 2 grade.
- **News is circulating in market that tur crop in Myanmar is 40 to 45 % lower than last year** and its impact is visible on port where it is being loaded. Import quotes are steady \$525 and is expected to move up soon as India crop too is not good this year. Total crop size may not be more than 35 lakh tonne this year. So, price of tur is bound to move up despite higher carry out stock.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- **Global Chickpea market remains almost unaffected from final production data in Canada.** USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.
- **Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada,** may reduce pea production by 9 % to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US has been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.

Weekly Outlook: -Pulses are likely to trade mixed.
