

Pulses Domestic Fundamentals:

Today's Update:

- **Pressure continues on pulses market as 2nd adv. estimate for foodgrains, likely by the end of this month,** is believed to be higher than normal market expectation. Bulk buyers are cautious amid weak demand and continued arrival from new crop. Weather is likely to be dry from next week and harvesting activities would increase. Procurement drive in limited region too are pressurizing market. Overall trend in pulses market seems bearish. Chana, tur and urad may trade Rs 100-150 lower from current level.
- **Increasing arrival of new Kabuli Chana in major growing region, MP and decreasing price of desi chana (gram)** have pressurized kabuli chana price in local market. As arrival in growing region of MP would continue to increase, kabuli may decrease by Rs 200 from current level. Dollar (white) chana in Ujjain is being traded at Rs 5500-6200 per qtl depending on quality. Arrival was reported at 800 qtl. In indore mandi 58-60 was traded at Rs 5600 and 44-46 was at Rs 7100-7200 per qtl. As demand in domestic market remains weak, market may move south ward in coming weeks.

Previous Update:

- **Weather remains a major concern in the north-central Indian states and light rains are expected** in coming days. Fear of rains with hailstorm is increasing and it may damage standing crop approaching maturity stages. Pressure continues on chana market. If damage spreads in larger area, sliding chana price may make a pause, otherwise it may decrease further by Rs 100-150 from current level. Chana in Delhi market is being traded at Rs 4200 to 4300. Weather condition in next 15 days would be very crucial for chana price direction. Nafed continues to sell chana through tender.

Urad import has already crossed fixed limit of 1.5 lakh tonne. However, the volume is likely to decline now as clearance at port is difficult now.
- **Overall rabi pulses area is unlikely to match last year's level as sowing is almost over now for chana, lentil and pea.** Urad and moong sowing would continue. Rabi pulses area decreased by 5.74 % at 156.30 lakh ha against 166.11 lakh ha last year as on 15th Feb-2019. Chana area is lagging by 10.02 % at 96.59 lakh ha against 107.57 last year. For Telangana 159.39 crores Have been allocated for chana farmers. Pressure on chana market continues and recovery in production in MP and Rajasthan seems very much in sight due to recent rains, lower temperature in night. Procurement activities in other states too May restrict downward trend. Overall trend in chana cash market is bearish. Pressure from new crop from MP and Raj might be felt from Mid March.
- **Lower crop size (35 to 36 lakh tonne), import restriction till 31st March-2019 and increasing interest of bulk buyers** would continue to support tur market and it may cross MSP soon. Govt has 4.5 lakh tonne stock. Besides, govt may import 2 lakh tonne from Mozambique in addition to 2 lakh tonne same quantity would be allowed for private trade, likely in the second half of the year. However, downward correction might be seen after general election. Govt has option to ease restriction, remove import duty. So price may come down in second half and may trade in the range of Rs 5200-6000.
