

Pulses Domestic Fundamentals:

Today's Update:

- **India imported 35.44 % lower pulses less pulses in Feb to 191274.9 MT against Jan-2019.** It includes Kidney bean too. Out of total import the highest volume was registered for yellow pea(50637.42MT) in Feb. Importers imported 35607.5 MT masur,31915.62 Mt urad,33728.1MT tur,21044.49 MT chana,9259.81 MT green pea and 1367.91 MT moong in Feb-2019. Volume of import has declined and it is likely to continue as pulses supply from rabi crop is increasing.
- **Pulses export up by 37.83 % to 7740 MT in February against 5615.51 in Jan-2019.** Out of total export chana contributed 4902.28MT, followed by moong(1011.41MT),tur(760.73MT), Masur (531.18 MT),Urad- (531.16MT) and moong (509.31MT). The rest were yellow and green pea. Due to disparity, export volume remains at lower ebb. See export –import table.

Previous Update:

- **According to Australian Bureau of Meteorology the Pacific Ocean is getting warmer and chances of El-Nino has increased** now from 50 to 70 %.If it materializes India would receive lower rainfall in monsoon season. It would affect production of kharif crops. Rabi production is almost 5 % lower from previous season. Impact of El-Nino affects differently in different parts of the world. It has potential to trigger flood and drought.
- **Chana procurement on MSP in Rajasthan commences with slower pace. However, farmers seem happy with ongoing procurement drive.**MP govt may start chana procurement after Holi, as arrival is expected to improve by then. Some farmers may resort to retain chana stock as they think market to improve in the second half of the year. Currently price of chana is ruling below MSP and some improvement is expected at current level. Production size is lower and import remains restricted. So, market should recover from current level to a certain extent. However, any big spike is unlikely. In Delhi market, chana is being traded at Rs4275-4350 per qtl. Demand remains weak.
- **Pressure on tur continues with increasing arrival from old and new stock amid weak demand.** Despite lower crop size tur market may extend its loss further by Rs 100-150.Weak demand, slower pace of procurement and availability of old stock remains unsupportive to cash market. Agriwatch expects demand to improve from mid-April, by then maximum old stock is likely to be consumed. So, stake holders should resume buying from mid -April, when crop from UP starts coming. Short term out for tur remains weak while medium and long term outlook seems bullish. Myanmar is offering tur at \$600 per MT basis Indian port.Crop damage in Myanmar would help market to move up in the second half of the year as supply side would be tight in Myanmar this year.
- **Increasing fear of El-Nino and decision of transferring 1.4 million tonne pulses for rebuilding buffer stock amid rough weather condition in major chana growing belts may support chana price at current level..** Arrival of chana in the mandis of MP and Rajasthan is expected to increase due to commencement of procurement at MSP. However, any major jump in chana price is unlikely in March. Chana in Delhi market is being traded at Rs4200-4300 per qtl. Steady to slightly firm tone may prevail in chana market this week. Demand is weak.As prices are ruling below MSP, farmers may release chana with slower pace.It may help market to recover.
- **Moong cash market traded steady during the week under review.Weak demand and** continuous sale by stockists and Nafed from central pool stock have pressurized market once again despite procurement drive for rabi season. Cash market may extend its loss further by Rs 100-200 in coming weeks.New crop from UP,Bihar and Odisha is expected by end March. So, improvement in the near term is unlikely. Moong is being traded at Rs5500 in Jaipur market.In other major markets it is being traded at Rs 5000 to 5500 per qtl. There is no parity for export while Myanmar is offering moong at \$680 per MT. Supply side seems at ease right now.
- **Urad market traded almost steady during the month under review. Slackened demand from mills and higher production** adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks.

With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs4100-4400 per qtl in various markets. In Chennai market urad is being traded at Rs4200-4250 per qtl. Burma is offering FAQ urad at \$490 & SQ at \$600 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market in March too. Buying at dip seems good

Pulses International Fundamental:

Today's Update:

- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20** against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Chickpeas production in Canada is likely to decline by 58 % to 1.3 lakh tonne in 2019-20.** It was 3.11 lakh tonne for 2018-19. Import too may decline from 25 to 18 thousand MT in 2019-20. Total supply is expected to decline from 3.5 to 3.43 lakh tonne in 2019-20. Domestic use is expected to increase by 4.61 % from 65 to 68 thousand MT. Carryout stock is expected to decline slight from 1.95 to 1.75 lakh tonne in 2019-20.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.

Previous Update:

- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Rabi Sowing as on 22nd Feb-2019:

Rabi Pulses Progressive Sowing Area Coverage Till 22.02.2019 (Area in Lakh Ha)
