

## Pulses Domestic Fundamentals:

### Today's Update:

- **Chana in cash market is being traded lower by Rs500-600 per qtl. from MSP.** New arrival in states like MP and Rajasthan has started increasing. New chana in MP is being sold at Rs4000-4050 against set MSP of Rs4650. As production is expected to decrease this year to 88/90 lakh tonne, as per trade estimate, procurement target by govt. too has been decreased this year. If state procurement agencies procure higher than expected quantity, price of chana may recover. However, under prevailing market condition amid weak demand Agriwatch expects chana to move down by Rs 100-150 from current level. Stake holders should buy below Rs3800/3900 and hold it. Recovery is expected May onward.
- **Urad arrival in cash market has started declining while stockiest have started** restricting selling having hope of improvement. Old stock is decreasing fast amid improvement in demand is expected with increasing temperature. Imported consignment too is getting costlier. Importers are active in Myanmar. Buyers from India and Pakistan are said to be active at current rate. This year urad crop in Myanmar is comparatively lower by 20/25 % due to poor yield. Total stock available in Myanmar is around 5.5 lakh tonne including 1 lakh tonne old stock. It has increased price of urad in Myanmar by \$15 to \$480 for FAQ and \$590 for SQ. There is uncertainty of incoming kharif crop, so Agriwatch expects urad market to improve in coming months. However, short term outlook is weak.
- **Pressure on tur continues with increasing arrival from old and new stock amid weak demand.** Despite lower crop size tur market may extend its loss further by Rs 100-150. Weak demand, slower pace of procurement and availability of old stock remains unsupportive to cash market. Agriwatch expects demand to improve from mid April, by then maximum old stock is likely to be consumed. So, stake holders should resume buying from mid April, when crop from UP starts coming. Short term out for tur remains weak while medium and long term outlook seems bullish. Myanmar is offering tur at \$600 per MT basis Indian port. Crop damage in Myanmar would help market to move up in the second half of the year as supply side would be tight in Myanmar this year. Current available stock in Myanmar is said to be 1 lakh tonne. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi.
- **Moong cash market traded slightly up with ongoing procurement drive and restricted** selling from central pool stock. Demand is from stockiest, not from millers. At higher level market may face demand crunch. So cash moong market may see downward correction once again. New crop from UP & Bihar is due and it may put pressure on moong price. Moong in Jaipur mandi is being traded at Rs5700-5800 right now and it may decrease by Rs 200 from current level. At this level there is no parity for export. Myanmar is offering moong at \$690 per MT. Supply side seems at ease right now.
- **Pulses export up by 37.83 % to 7740 MT in February against 5615.51 in Jan-2019.** Out of total export chana contributed 4902.28 MT, followed by moong (1011.41 MT), tur (760.73 MT), Masur (531.18 MT), Urad- (531.16 MT) and moong (509.31 MT). The rest were yellow and green pea. Due to disparity, export volume remains at lower ebb. See export –import table.

### Previous Update:

- **India imported 35.44 % lower pulses less pulses in Feb to 191274.9 MT against Jan-2019.** It includes Kidney bean too. Out of total import the highest volume was registered for yellow pea (50637.42 MT) in Feb. Importers imported 35607.5 MT masur, 31915.62 MT urad, 33728.1 MT tur, 21044.49 MT chana, 9259.81 MT green pea and 1367.91 MT moong in Feb-2019. Volume of import has declined and it is likely to continue as pulses supply from rabi crop is increasing.
- **Increasing fear of El-Nino and decision of transferring 1.4 million tonne pulses for rebuilding buffer stock amid rough weather** condition in major chana growing belts may support chana price at current level. Arrival of chana in the mandis of MP and Rajasthan is expected to increase due to commencement of procurement at MSP. However, any major jump in chana price is unlikely in March. Chana in Delhi market is being traded at Rs4200-4300 per qtl. Steady to slightly firm tone may prevail in chana market this week. Demand is weak. As prices are ruling below MSP, farmers may release chana with slower pace. It may help market to recover.

## Pulses International Fundamental:

### Today's Update:

- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20** against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small. Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155 lbs/ac average in 2017 to 1,512 lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.

### Previous Update:

- **Chickpea export from Russia increased from 9104 (Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19** against 1148 thousand produced in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

**Rabi Sowing as on 22<sup>nd</sup> Feb-2019:**

Rabi Pulses Progressive Sowing Area Coverage Till 22.02.2019 ( Area in Lakh Ha)					
Crop Name	Normal Area for whole Kharif Season	Area sown reported
