

Pulses Domestic Fundamentals:

Today's Update:

- **Tur buying by mills in cash market increased by Rs 100-150 to Rs 5050-5100 in Gulberga market.** However, liquidity crunch is not allowing bulk buyers to buy in bulk quantity. As crop size is lower this year, prices are expected to move up once again but would take time. Even old stock in central pool is said to be around 4 lakh tonne. So, supply side might be tight in the second half of the year. Import might be restricted to 3 lakh tonne. Private traders have started holding stock for better price and it would push tur price to the level of MSP at Rs 5675. Fear of increasing chances of El-Nino too has started impacting market sentiments. Lower rainfall may affect tur sowing. So overall outlook for tur market remains firm. New arrival from UP is expected from April end. So, one downward correction of Rs200 is expected at the time of arrival.
- **New crop of moong from UP and Bihar is expected to hit market by end April/May.** So, cash moong market may move further up by Rs200-300 as old stock is decreasing and demand from mills have improved. Besides, import too is not possible as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, Nafed would start selling moong from 1st April and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop.
- **New MY season for moong starts in Oct from Rajasthan and Maharashtra.** This year poor crop size (40% lower) could not help market to touch MSP as Nafed continued to sell crop at lower price. In Jaipur market moong traded higher at Rs 6000 in March. It may move up to Rs 6400 in April. Right now demand for moong in central and north India is being fulfilled by Shekhavati-Jodhpur line. Supply from these lines may be affected as stock is decreasing now. Right now moong taken through tender is being traded at Rs5400-5600. Moong of Jodhpur line is being traded at Rs5800. With increasing temperature demand for moong dal would increase and it may support price in coming weeks. Overall tone remains firm.
- **Maharashtra govt. has instructed all agriculture marketing boards to ensure selling of chana at MSP.** Notably, MSP of chana is Rs4620 per qtl. It is higher by Rs220 per qtl from MSP of last year. Chana price in mandis is ruling below MSP. Farmers are selling chana to private trades as they receive cash on spot and so they accept even lower price than fixed MSP. As procurement of chana at MSP has picked up, prices in cash market have recovered. Uptrend is likely to continue. How long it will sustain, remains to be seen. In brief, cash chana market may move up by Rs100-150 more from current level. In Delhi market chana moved up by Rs50 to Rs4300-4375.
- **Kolkatta Court has given permission to release pea cargo at 10% bank guarantee with 5% penalty.** For Urad cargo, it would be released at 10% bank guarantee. Release of cargo would impact price once again for a shorter period.
- **Higher offtake from millers has helped lemon cash market to improve by Rs 100 to Rs 5050 per qtl.** In Mumbai market. At this point of time there is a cash crunch in market and so stockists are unable to buy in bulk quantity. It may restrict upward momentum for a short time. Even, there is not much stock (around 5 lakh tonne) in central pool. So, overall trend sees bullish in the medium term. In Gulberga market lemon tur is being traded at Rs 5000-5100 per qtl.
- **Pulses export up by 37.83 % to 7740 MT in February against 5615.51 in Jan-2019.** Out of total export chana contributed 4902.28MT, followed by moong(1011.41MT), tur(760.73MT), Masur (531.18 MT), Urad- (531.16MT) and moong (509.31MT). The rest were yellow and green pea. Due to disparity, export volume remains at lower ebb. See export –import table.

Previous Update:

- **India imported 35.44 % lower pulses less pulses in Feb to 191274.9 MT against Jan-2019.** It includes Kidney bean too. Out of total import the highest volume was registered for yellow pea(50637.42MT) in Feb. Importers imported 35607.5 MT masur, 31915.62 Mt urad, 33728.1MT tur, 21044.49 MT chana, 9259.81 MT green pea and 1367.91 MT moong in Feb-2019. Volume of import has declined and it is likely to continue as pulses supply from rabi crop is increasing.
- **Increasing fear of El-Nino and decision of transferring 1.4 million tonne pulses for rebuilding buffer stock amid rough weather condition in major chana growing belts may support chana price at current level.** Arrival of chana in the mandis of MP and Rajasthan is expected to increase due to commencement of procurement at MSP. However, any major jump in chana price

is unlikely in March. Chana in Delhi market is being traded at Rs4200-4300 per qtl. Steady to slightly firm tone may prevail in chana market this week. Demand is weak. As prices are ruling below MSP, farmers may release chana with slower pace. It may help market to recover.

Pulses International Fundamental:

Today's Update:

- ***Demand for Chickpeas In Canada & US has improved slightly and it may help market to recover from current level. However, India may pose a tough challenge in large and medium caliber markets. India export chickpea from Feb to June as new crop starts hitting the market from mid Feb and there is a plenty of availability in India during this period. Mexico too would pose competition from March end. So, It would not easy to sell chickpeas at good price for any country.***
- ***As per Canada Grain Commission Canada has exported 91,200 MT lentils in Feb-2019 against 99,700 MT in Jan-2019. Canada had exported 51,200 MT in Feb-2018. Despite weak demand from India lentil export from Canada increased to 383,100 MT during the whole marketing year till Feb-2019. It was 180,700 MT last year during same period.***
- ***Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20 against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.***
- ***Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20 against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However, total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.***
- ***Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop. Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.***
- ***Lentil production in US is slightly down to 381384 MT against 339381 produced last year. Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.***
- ***All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small. Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155 lbs/ac average in 2017 to 1,512 lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.***

Previous Update:

- ***Chickpea export from Russia increased from 9104 (Oct) to 19,326 metric tons in Nov. However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.***
- ***Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct. This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.***

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.

Weekly Outlook: -Pulses are likely to trade firm
