

Pulses Domestic Fundamentals:

Today's Update:

- **Firmness in cash pulses market is likely to depend on monsoon rainfall during the first phase of sowing starting from June.** If India receives good rainfall (likely) as per IMD forecast, better kharif prospects seem on the card and it would cap upward momentum of price. In case of lower rainfall, production prospects may weaken and it would help market to move up. In normal condition cash market is likely to trade steady to slightly weak in the short term. Agriwatch expects market to improve in the second half. However, monsoon progress would remain crucial for pulses price. Right now rains in Rajasthan region have disturbed harvesting activities of chana and if it continues, chana may move up once again.
- **As per trade Sources, India has imported 137360.16 MT of Lentil at an average CiF of \$407.14 per tonnes during the month of March-2019.** Of the total quantity around 134052.78 tonnes has been purchased from Canada and the remaining quantity from Australia, Turkey, United States and UAE.
- **As per trade Sources, India has imported 130414.70 MT of yellow pea at an average CiF of \$287.47 per tonnes during the month of March-2019.** Of the total quantity around 114589.04 tonnes has been purchased from Canada and the remaining quantity from Argentina, Ukraine, Moldova and United States.

Previous Update:

- **India imported 351720.59 MT pulses in March-2019, higher by 83.88% from Feb-2019.** India had imported 191274.9 MT pulses in Feb-2019. Out of total import in March lentil import increased by 283% to 137360.16 MT against 35807.5 MT in Feb. Even chana /dal import increased by 87% to 39353.34 MT in March against 21044.49 MT in Feb. Yellow pea import increased by 157.54 % to 130414.7 MT against 50637.42 MT in Feb-2019. Green pea import increased by 11.35 % to 10310.8 MT against 259.81 MT. However, tur, urad and moong import decreased by 42.95, 80.56 and 22.67 % in March. India imported 19239.6 MT tur, 6202.08 MT urad and 1064.62 MT moong in March. Import flow has increased considerably. For details see weekly import table.
- **Nafed has procured over 40803 MT Chana on MSP so far. Out of total procurement maximum buying (34,500 MT) was registered in Telangana.** The procurement pace is likely to increase in Raj & MP from next week. As farmers are not getting MSP, arrival has not been up to the mark so far. Notably, the centre govt. had decided to procure 25 % of pulses out of total production. However, in MP procurement target for chana and masur has been fixed at 22% and 15%. At this fixed target MP Govt would procure 1,10,600 MT masur and 11,48,750 MT chana in MP. Total procurement target for chana has been fixed at 22,24,823 MT against 27.24 lakh MT last year. Govt would procure total 2,81,166 MT masur this year.
- **Urad cash market is bound to go up due to import cap at 1.5 lakh MT for the whole year, starting from 1st April-2019 to 31st March-2020.** No new crop is due now. Next new arrival (big crop) is expected only in Sep. Before this green urad (smaller crop size) would hit market from MP and Uttar Pradesh but mostly would be consumed in Dhoora dal. Currently, there is no parity for Delhi from Kota and Chandausi line. So, FAQ moved up by Rs 100 to Rs 4550-4600 and SQ to Rs 5500-5550. After a slight downward correction urad may move further up by Rs 200-300. Stake holders should buy on dip and hold stock.
- **New crop of moong from UP and Bihar is expected to hit market by end April/May.** So, cash moong market may move further up by Rs 200-300 as old stock is decreasing and demand from mills has improved. Besides, import too is not possible as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, Nafed would start selling moong from 1st April and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop.
- **India has extended 50% duty on pea import for 12 months and it may impact Australian pea area this year.** Pea import quota has been fixed at 1.5 lakh MT for the whole year with applicable duty of 50%. Under emerging scenario

it would be very difficult for exporters to export pea in India. It would affect pea price badly in global market in coming months. Pea production in Australia may drop 45 to 50 % In 2018-19 season.

Pulses International Fundamental:

Today's Update:

- ***Inclement weather in Ukraine may affect coverage area of pea and it may decrease by 20% to 3.47 Lakh ha. Due to quantities restriction in India production of pulses in major countries may decline this year. In this case if production decreases in India, prices of pulses may move up in domestic as well as global market too. So monsoon progress and actual rainfall would be major price drivers in weeks to come.***
- ***Lentil area coverage for the 2019 crop year in US is expected to decrease by 29 % from last year to 555,000 acres. Area may decline in Montana and North Dakota. Planting intentions in Idaho and Washington are expected to remain unchanged from a year ago. Based on area estimate/intention, it would be the lowest since 2015.***
- ***US farmers may plant 40% lower area under Chickpeas this year in US. As per pre sowing intention farmers may plant 5.19 lakh acres in 2019. They may plant 137,000 acres small chickpeas, 382,000 acres large chickpeas around 38 & 40 % lower than last year. It would be the lowest since 2016.***
- ***Dry peas area in US is expected to increase by 3% to 8.81 lakh acres this year based on pre-sowing intention of the farmer's. plantings are up in Idaho, Montana, South Dakota, and Washington. However, slightly decrease might be seen in Nebraska and North Dakota.***

Previous Update:

- ***As per USDA seeding intension report dry pea area in US is expected to increase by 3% to 8.81 lakh acres. The latest report shows that dry pea area is expected to rise in Idaho, Montana, South Dakota, and Washington. However, area would decline in Nebraska and North Dakota slightly from last season.***
- ***Demand for Chickpeas in Canada & US has improved slightly and it may help market to recover from current level. However, India may pose a tough challenge in large and medium caliber markets. India export chickpea from Feb to June as new crop starts hitting the market from mid Feb and there is a plenty of availability in India during this period. Mexico too would pose competition from March end. So, It would not easy to sell chickpeas at good price for any country***
- ***As per Canada Grain Commission Canada has exported 91,200 MT lentils in Feb-2019 against 99,700 MT in Jan-2019. Canada had exported 51,200 MT in Feb-2018. Despite weak demand from India lentil export from Canada increased to 383,100 MT during the whole marketing year till Feb-2019. It was 180,700 MT last year during same period.***
- ***Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20 aginst 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.***
- ***Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20 aginst 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However, total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.***
- ***Lentil production in US is slightly down to 381384 MT against 339381 produced last year. Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing***

condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Rabi Sowing as on 22nd Feb-2019:
