

Pulses Domestic Fundamentals:

Today's Update:

- **Tur import quota for private trade has been fixed at 2 lakh MT. In addition to this govt.** would import 1.75 lakh MT tur from African countries this year, starting from 1st April-2019. This means total import would be around 3.75 lakh MT this year. Despite import, lower crop size (3.5 to 3.6 MMT) this year may push tur cash market up towards MSP level in the medium term. Crop in Burma is one and a half month away now and forward deals have been struck at \$ 700-710 per MT. It hints market to move up. Demand from bulk buyers is improving with increasing temperature.
- **Improved offtake from millers helped cash urad market to improve by Rs 75 to 125 per qtl.** to Rs 4550 to Rs 4650. Importers have started holding stock and it pushed urad price in Myanmar too by \$10 to 15 per tonne. In south Indian market SQ is being quoted at Rs5500-5600. As crop size was lower, so arrival in market is decreasing. So there is no chance of coming it down. Demand from bulk buyers may push up market again. Stake holders should buy at correction and hold it.
- **Govt. will import 1.75 lakh MT tur from African countries under G2 G basis. It is over and** above 2lakh MT allowed for private trades/millers in this financial year starting from 1st April-2019. This means total import would be 3.75 lakh MT this year. Millers in India are now active as arrivals in markets have decreased considerably. New crop in Myanmar is one and a half month away from now. With lower crop size, tur may trade further up in coming weeks.
- **India exported total 254685.19 MT chana in MY 2018-19. It exported 22131.42MT** in March against 4902.28 MT in February-2019. In March India has exported at an average price of \$649.56 per MT. It includes chana and dal also. In February India had exported chana/dal at an average price of \$825.74 per MT. Due to higher price chana export could not increase despite incentives offered to exporters. Against this India imported 192850.1 MT chana in MY 2018-19. It imported 39353.34MT in March against 21044.49 MT in February-2019. India imported chana/dal at an average price of \$637.92 per MT. In Feb it had imported chana at an average price of \$603.03 per MT. Higher import duty has impacted import volume considerably in MY 2018-19.

Previous Update:

- **Slower procurement pace of Rabi crops has affected procurement target of 43.89 Lakh MT** (valued at `19,786 crore) for ongoing rabi harvesting season under PM-Aasha scheme. Till mid- April, procurement agencies have procured only 5% of fixed target for rabi season. rabi procurement season continues till 30th june, so improvement in volume is likely in coming weeks. However, target is unlikely to meet in next two months
- **Gov.t has allowed only millers to import pulses under procurement license. The quota of pulses** import has been fixed at 6.5 lakh tonne annually as last year. Out of total allowed import the share of tur 2lakh MT, of moong & Urad 1.5 lakh MT each and all peas including Kaspas and green 1.5 lakh MT. The no of applicants for import license is likely to increase 8 to 10 times this year as importers booked good profit last year. No of applicants may touch from 300 to 1800-2000.
- **India imported 351720.59 MT pulses in March-2019, higher by 83.88% from Feb-2019.** India had imported 191274.9 MT pulses in feb-2019. Out of total import in March lentil import increased by 283% to 137360.16MT against 35807.5MT in Feb. Even chana /dal import increased by 87% to 39353.34MT in March against 21044.49MT in Feb. Yellow pea import increased by 157.54 % to 130414.7 MT against 50637.42MT in Feb-2019. green pea import increased by 11.35 % to 10310.8MT against 259.81MT. However, tur, urad and moong import decreased by 42.95, 80.56 and 22.67 % in March. India imported 19239.6 MT tur, 6202.08MT urad and 1064.62 MT moong in March. Import flow has increased considerably. For details see weekly import table.
- **India has extended 50% duty on pea import for 12 months and it may impact** Australian pea area this year. Pea import quota has been fixed at 1.5 lakh MT for the whole year with applicable duty of 50%. Under emerging scenario it would be very difficult for exporters to export pea in India. It would affect pea price badly in global market in coming months. Pea production in Australia may drop 45 to 50 % In 2018-19 season.

Pulses International Fundamental:

Today's Update:

- **As per the latest update from Agriculture Canada Chickpeas production may decrease in 2019-20 to 1.30 lakh MT** lower from 3.11 lakh MT from last year. Canada may seed 75,000 ha this year against 1.79 lakh ha last year. Export volume may touch 1 lakh MT in 2019-20 against 90,000 MT this season. In 2017 Canada had exported 1.16 lakh MT. Domestic consumption is expected to increase slightly from 65,000 to 68,000 MT in 2019-20.
- **Inclement weather in Ukraine may affect coverage area of pea and it may decrease by 20%** to 3.47 Lakh ha. Due to quantities restriction in India production of pulses in major countries may decline this year. In this case if production decreases in India, prices of pulses may move up in domestic as well as global market too. So monsoon progress and actual rainfall would be major price drivers in weeks to come.
- **Lentil area coverage for the 2019 crop year in US is expected to decrease by 29 %** from last year to 555,000 acres. Area may decline in Montana and North Dakota. Planting intentions in Idaho and Washington are expected to remain unchanged from a year ago. Based on area estimate/intention, it would be the lowest since 2015.
- **US farmers may plant 40% lower area under Chickpeas this year in US. As per pre sowing intention farmers may plant 5.19 lakh acres in 2019.** They may plant 137,000 acres small chickpeas, 382,000 acres large chickpeas around 38 & 40 % lower than last year. It would be the lowest since 2016.
- **Dry peas area in US is expected to increase by 3% to 8.81 lakh acres this year based on pre-sowing intention of the farmer's.** plantings are up in Idaho, Montana, South Dakota, and Washington. However, slightly decrease might be seen in Nebraska and North Dakota.

Previous Update:

- **As per USDA seeding intension report dry pea area in US is expected to increase by 3% to 8.81 lakh acres.** The latest report shows that dry pea area is expected to rise in Idaho, Montana, South Dakota, and Washington. However, area would decline in Nebraska and North Dakota slightly from last season.
- **As per Canada Grain Commission Canada has exported 91,200 MT lentils in Feb-2019 against 99,700 MT in Jan-2019.** Canada had exported 51,200 MT in Feb-2018. Despite weak demand from India lentil export from Canada increased to 383,100 MT during the whole marketing year till Feb-2019. It was 180,700 MT last year during same period.
- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20 against 20 lakh tonne in 2018-19.** Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20 against 3.11 lakh tonne in 2018-19.** Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However, total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Lentil production in US is slightly down to 381,384 MT against 339,381 produced last year.** Earlier USDA had projected 398,384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been

pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm..
