

## **Pulses Domestic Fundamentals:**

### **Today's Update:**

- **Arrivals of chana in all major producing markets were seen limited amid firm futures helped market to recover once again.** It moved up by Rs 75 to Rs 4675-4700 in Delhi market. Price of dal and besan too moved proportionally. Arrival got slowed down from Bikaner line as there is no parity at this level. However, buyers in Kanpur are active in M.P. So any major downward trend is unlikely despite ample stock in private as well as public hands. Total stock of chana with Nafed is 22.45 lakh MT. Out of total old stock share is 16.25 lakh MT while new share is 6.17 lakh MT. It would increase further as govt has allowed to buy till 6th June-2019. As stockist are unwilling to sell, chana is bound to move up again. In June chana in Delhi market may trade in the range of Rs 4600-4950. At this level, stock from cold storage would start coming out. It would restrict uptrend.
- **Moong market traded lower due to new arrival and poor demand for dhoya dal. New moong in MP was traded at Rs 6300-6400.** Arrival was registered at 6 to 7 motors. Moong sourced from Jodhpur is in strong hands. As arrival pressure decreases, moong may trade up Rs 200 from current level.
- **Nafed has purchased total 638799.38 lakh tonne chana till 28th May-2019. Nafed has procured 486781 lakh tonne in MP, 80320.69 MT in Raj, 34500 MT in Telangana, 18892.71 MT in Maharashtra, 15491.76 in Gujarat, 2594.65 MT in AP, 207.60 MT in Haryana and 10.25 MT in UP so far.** Total stock of chana in Nafed custody is 22,41,547 MT right now and it may go up further as procurement is on. Out of total stock old is 1624310 MT while new is 617237 MT. The fig taken is on 27th May-2019.
- **Details of other pulses stock in Nafed custody are as follows:** Tur-838355 MT (old-562969 & old-275386 MT, Urad-334552 MT (old-320720, new-13832 MT), Moong-177374 MT (old-162868, new-14506 MT), Masur-191444 MT (old-150802, new 40642 MT).

### **Previous Update:**

- **DGFT has delayed decision on pea import at least for two months.** The reason behind it is attributed to higher import so far. Importers have already imported 1.75 lakh MT pea against set quantity of 1.5 lakh MT. Govt. is in no hurry to allow pea as it may affect market price and prices of other pulses too. If pea prices increase unexpectedly in coming months then govt may consider import. As there is lower stock in domestic market, so prices of pea are bound to go up.
- **Pressure was seen on cash moong market with the commencement of new arrival. However, lower stock for quality crop and good demand at current level would not allow moong market to decrease beyond a certain level.** Summer crop in Bihar, MP and UP is almost ready to be harvested now. However, demand from Papper industries and dal mills continues. It would help market to sustain at current level. Once the pressure from summer crop decreases, moong would trade firm again. It is being traded at Rs 6500-6900 in Delhi market.
- **There is a short supply of imported peas. Stockiest have brought desi matar in Lalitpur and Jhansi line at lower rate.** However, variety of desi matar are coming in markets of MP and UP. So, selling of imported matar (Canadian) got affected. Imported stock of Canadian and Ukrainian matar is depleting fast. So quotes increased by Rs 200-300 at ports. However, buyers remain silent at higher level. As there is no loading for Canadian matar, tight supply side might be seen for imported pea. Any major correction is unlikely at this point of time.
- **Against the market trend moong traded lower by Rs 200-250. However, it is seen as correction in the market.** Moong would move up again as there is shortage of quality moong while next big crop is 3 months away from now. After formation of new govt, it would try to check inflation and may take action to control price of essential commodities. Pulses too would not be out of it. Nafed may start releasing stock. So stake holders should avoid buying at higher level at least for a week or two.
- **Tur market continued to trade firm and may move up further. Lower crop size in India, declining old stock and lower availability of Tur sourced from African countries have helped market to trade above MSP first time after 2.5 years.** Import has been restricted at 2 lakh MT while govt would import 1.75 lakh MT. Besides, there is a scope of

more import through G2G basis if prices moves beyond 6000 level. in Gulberga market tur is being traded at Rs5550-5750. overall tone remains firm.

- **Nafed. has sold 216174 MT moong through online auction so far in Rajasthan ,MP and Karnataka.** It had procured 261004.7 MT. This means it has still 44830.76 MT moong in stock. It is 82.83 % of procurement. It has sold 3180 MT moong during last two weeks at Rs5761 & Rs5826 per qtl. In Chomu it has sold 90 MT at Rs 5800, 310MT at Rs5761 in Kishangarh, 260MT at Rs 5826 in Dooni, 700 MT at Rs5790 in Mandalgarh and 1820MT at Rs5802 in Chomu.

### **Pulses International Fundamental:**

#### **Today's Update:**

- **Australian pulses growers are finding it difficult to sell their nugget type lentils.** However, there are buyers for nipper type lentils right now. There is slight difference of price between nugget and nipper type lentils. Indian importers prefer nugget type while nipper type is preferred by B, desh. In Australian market pulses price has decreased by 17 to 20% since the beginning of the ongoing MY year. The major reason behind this is mainly attributed to Indian import duty (40%) applicable on import from Canada & Australia. Area under pulses in Canada & Australia is bound to decline this year. If India receives less rainfall this year and kharif planting gets affected, govt may consider some relaxation on import duty and quantity restriction on various pulses. Currently, there are ample stocks in central pool and there is no panic at supply front.
- **As per monthly update of Canadian Chickpeas Agriculture Canada chickpeas production** in Canada is expected to decrease from 3.11 lakh MT to 2.3 lakh MT in 2019-20. This year area under chickpeas is expected to decrease from 1.79 lakh ha to 1.35 lakh ha. Export has been pegged at 1 lakh MT in 2019-20 against 90,000 MT this season. Canada had exported 1.16 lakh MT chickpeas in previous season. Domestic use is expected to decrease slightly from 70,000 MT to 68,000 MT in coming marketing season. Carryout is expected to remain at higher level at 1.75 lakh MT. It was 1.95 in 2018-19. In 2017-18 it was only 13 thousand MT.
- **As per the latest data updates by Australia Bureau of Statistics chickpeas export** from Australia declined considerably during March-2019. Australia exported 25364 MT chickpeas in March against 46866 MT in Feb-2019. Australia has exported total 167043 MT chickpeas during the ongoing MY. It is down by 76 % from last year till March 2018. In March B, desh purchased 18525 MT chana from Australia, followed by UAE 2170 MT and Pakistan 2025 MT.
- **Lentil area coverage for the 2019 crop year in US is expected to decrease by 29 %** from last year to 555,000 acres. Area may decline in Montana and North Dakota. Planting intentions in Idaho and Washington are expected to remain unchanged from a year ago. Based on area estimate/intention, it would be the lowest since 2015.
- **US farmers may plant 40% lower area under Chickpeas this year in US.** As per pre sowing intention farmers may plant 5.19 lakh acres in 2019. They may plant 137,000 acres small chickpeas, 382,000 acres large chickpeas around 38 & 40 % lower than last year. It would be the lowest since 2016.
- **As per USDA seeding intention report dry pea area in US is expected to increase by 3% to 8.81 lakh acres.** The latest report shows that dry pea area is expected to rise in Idaho, Montana, South Dakota, and Washington. However, area would decline in Nebraska and North Dakota slightly from last season.
- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh MT to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT in 2019-20** against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However, total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-

20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

### Rabi Sowing as on 22<sup>nd</sup> Feb-2019:
